OPŠTI PODACI O BOSNI I HERCEGOVINI

Službeni naziv: Bosna i Hercegovina (B i H)

Geografska lokacija: Bosna i Hercegovina se nalazi na zapadnom dijelu Balkanskog poluotoka

Pogranicne zemlje: SR Jugoslavija na istoku, Republika Hrvatska na sjeveru, zapadu i jugu.

Administrativna podjela: BiH je podjeljena na dva entiteta: Federaciju Bosne i Hercegovine (F BiH) i Republiku Srpsku (RS) i distrikt Brcko.

Entitetska struktura: FBiH je administrativno podjeljena na 10 kantona-županija. Kantoni-županije su podjeljeni na općine. Na području F BiH je 84 općina.

Republika Srpska je administrativno podjeljena na 64 općine. Grad Brcko je zasebna administrativna jedinica - Distrikt.

Površina:

Bosna i Hercegovina ukupno pokriva

	51 209,2 km ²
Kopno	51 197 km ²
More	12,2 km ²

Klima: Pretežno kontinentalna, mediteranska na jugu

Broj stanovnika: Procjena prisutnog stanovništva (30.06.2000) 3.781.183

Struktura stanovnika: Bošnjaci, Hrvati i Srbi i pripadnici ostalih naroda

Glavni grad: Sarajevo (F BiH-Sarajevo, RS-Banja Luka)

Službeni jezici: Bosanski, Hrvatski i Srpski (bosanski, i hrvatski se pišu latinicnim pismom, a srpski se piše cirilicnim pismom).

Zvanicna valuta: Konvertibilna marka (KM), (1KM = 1 DM)

GENERAL DATA ABOUT BOSNIA AND HERZEGOVINA

Official name: Bosnia and Herzegovina (BiH)

Geographical location: Bosnia and Herzegovina is situated in the west part of the Balkan Peninsula

Border countries: SR of Yugoslavia on the east, Republic of Croatia on the north, west and south

Administrative distribution: B&H is divided on two entities: Federation of Bosnia and Herzegovina (F B&H) and Republica Srpska (RS) and district Brcko

Entity's structure: FB&H is administratively divided on 10 cantons/districts. These cantons/districts are divided into municipalities. There are 84 municipalities in Fed. BiH. The Republika Srpska is administratively divided into 64 municipalities. The city Brcko is a separated administrative unit -District.

Surface: Bosnia and Herzegovina cover totally

	51 209,2 km ²
Land	51 197 km ²
Inland	12,2 km ²

Clime: In the majority continental, mediterranean on south

Number of habitants: Estimation of current population (30.06.2000) 3.781.183

The structure of population: Muslims, Croats, Serbs and other participants of others nations

Capital city: Sarajevo (FB&H-Sarajevo, RS-Banja Luka)

Official languages: Bosnian, Croatian and Serbian (Bosnian, and Croatian are written on Alphabet, and Serbian are written on Cyrillic).

Official value: Konvertible mark (KM), (1KM = 1 DM)

U V O D
INTRODUCTION

U V O D

Podaci za BiH publikovani u ovom Biltenu predstavljaju realizaciju Plana statističkih aktivnosti za BiH u 2002. godini koji je uskladen sa programima statističkih istraživanja Federalnog zavoda za statistiku Federacije BiH i Republickog zavoda za statistiku Republike Srpske i zahtjevima ministarstava u sklopu Vijeca ministara i Središnje banke BiH.

Prema Odluci Vijeca ministara Bosne i Hercegovine od 20.08.1998. godine ("Službeni glasnik BiH", broj 16/98) Agencija za statistiku BiH nadležna je da u skladu sa međunarodno prihvaćenom metodologijom izrađuje i objavljuje statističke podatke za Bosnu i Hercegovinu, a na temelju podataka zavoda za statistiku entiteta, distrikta Brcko i drugih institucija na nivou BiH.

Za ovu publikaciju Agencija za statistiku BiH obezbjedila je podatke za one oblasti statističkih istraživanja koja se provode po istoj metodologiji. Aktivnosti na uskladivanju metodologija za druge oblasti statističkih istraživanja su trajan zadatak Agencije i zavoda za statistiku entiteta, distrikta Brcko i drugih Institucija.

U narednom periodu bit ćemo u mogućnosti da publikujemo podatke za više oblasti za prethodne godine, kao i za 2002. godinu.

Sve sugestije korisnika statističkih podataka koje vode daljem poboljšanju ove publikacije sa zadovoljstvom ćemo prihvatiti.

Sarajevo, mart/ožujak 2002.

POSLOVODNI ODBOR

INTRODUCTION

The data for B&H published in this Bulletin represent the beginnings of the realisation of the Plan of Statistical Activities for B&H in 2002, which are harmonised with the programs of the Federation of B&H and of the Republika Srpska Statistical Offices.

According to the Decision of the Council of Ministry of Bosnia and Herzegovina, made on 20.08.1998. ("Official Gazette B&H", number 16/98) the Agency of Statistics of Bosnia and Herzegovina is in charge "of the production and publishing, of aggregated statistics for Bosnia and Herzegovina in accordance with the International accepted methodology, based on data submitted by the Entity Statistical Institutes".

For this publication the Agency for Statistics of Bosnia and Herzegovina provides data for statistical areas in which the same methodology has been used. The harmonisation of methodologies of other statistical areas is the lengthy task of this Agency and of the Offices of the Entities.

Soon we will be able to publish data on previous years for other areas.

All suggestions by users of statistical data, which lead to further improvement of this publication, will be gratefully accepted.

Sarajevo, March 2002.

MANAGEMENT BOARD

KRATICE I ZNAKOVI

U statistickim tabelama primjenjeni su slijedeci znakovi:

-	nema pojave
...	ne raspolaže se podatkom
0	podatak je manji od 0,5 od date jedinice mjere
()	nepotpun, nedovoljno provjeren, odnosno procijenjen podatak
*	ispravljen podatak
Φ	prosjeak
AV	prosjeak
1)	oznaka za napomenu ispod tablice
Δ	promjena
(BiH)	statisticki podaci na razini Bosne i Hercegovine
(Fed)	statisticki podaci na razini Federacije
(RS)	statisticki podaci na razini Republike Srpske
CV	koeficijent varijacije
KM	konvertibilna marka, zvanicna valuta u BiH
JKD	Jugoslovenska klasifikacija ekonomskih aktivnosti
EUROSTAT	Statisticki ured Europske Unije
CIF	(<i>Cost, Insurance, Freight</i>) troškovi, osiguranje, prijevoz-vrijednost za uvoz
FOB	(<i>Free On Board</i>) franko do broda-vrijednost za izvoz
SITC	(<i>Standard International Trade Classification</i>) standardna medunarodna klasifikacija trgovine
USD	americki dolar

ABBREVIATIONS AND SYMBOLS

In statistical tables we have following signs

-	no entry
...	data not available
0	value is less than 0,5 of the unit of measure being used
()	uncomplete, not reliable, estimated data
*	corrected data
Φ	average
AV	average
1)	indicates note beneath table
Δ	change
(BiH)	state level statistics
(Fed)	Federation level statistics
(RS)	Republic Srpska level statistics
CV	coefficient of variation
KM	convertible currency (mark), official currency of B&H
JKD	Yugoslavian classification of economic activities

STATISTIKA RADA

Cilj statistike zaposlenosti, nezaposlenosti i placa, koja je važna oblast društvene statistike, je da pruži informacije o tržištu rada i o odgovarajućim pitanjima putem administrativnih informacija, pojedinačnih intervjua ili drugih načina putem kojih će se dobiti informacije o ovoj materiji.

Cilj Statistike rada je da prikupi podatke o radnom stanovništvu (15 godina i više) i da ih razvrsta u **tri uzajamno isključive** grupe: zaposlene osobe, nezaposlene osobe i neaktivne osobe. Ukrštanjem drugih informacija (ukupan broj stanovništva, starost, spol, prethodni posao, naredni posao itd.) zajedno sa ovim moguće je napraviti interesantne (zajednicke) indikatore. Dobar primjer je Europska Anketa radne snage, koju provode zemlje članice EU i koju koordinira EUROSTAT od 1973.

Definicije zaposlenosti i nezaposlenosti korištene u zemljama EU, u skladu su sa usvojenim na 13. Međunarodnoj Konferenciji Statisticara rada koja je održana u Ženevi 1982. godine.

PLACE

Metodološka objašnjenja

Prosječne mjesečne bruto i neto place po zaposlenom dobivene su na temelju mjesečnog statističkog istraživanja o zaposlenim i placama. Prema metodologiji koja se koristi u BiH nema razlike između poslodavca i zaposlenih radnika. Podaci o neto i bruto placama su dostupni. U podacima o prosječnoj neto i bruto placi nisu obuhvaćene isplate zaposlenih u Ministarstvu obrane i Ministarstvu unutarnjih poslova.

Mjesečna neto placa obuhvata place zaposlenih za izvršene poslove na temelju redovitog radnog odnosa i naknada za godišnji odmor, bolovanja do 30 dana, državnih blagdana, plaćenog dopusta, čekanja i zastoja bez krivnje zaposlenog. Nisu obuhvaćena primanja koja terete materijalne troškove, naknade za bolovanja preko 30 dana i primanja na temelju ugovora o djelu.

Mjesečna bruto placa obuhvata sve vrste neto isplata na temelju redovitog radnog odnosa i zakonom propisanih obveznih izdvajanja, doprinosa i poreza

Prosječna neto i bruto placa po zaposlenom izračunava se dijeljenjem ukupnih isplata s brojem zaposlenih koji su primili placu.

Prosječna mjesečna placa dobivena je pomoću formule:

$$\bar{X} = \frac{\sum_{i=1}^{n_i} X_i + \sum_{j=1}^{n_j} X_j}{n_i + n_j}$$

STATISTICS ON LABOUR FORCE

The objective of statistics on employment and wages, an important branch of social statistics, is to provide information on the labour market and related issues by means of administrative data, personal interviews or other relevant sources of data.

The main statistical objective of the Labour Force data is to divide the population of working age (15 years and above) into three mutually exclusive groups: persons in employment, persons unemployed and inactive persons. Within these groups other characteristics (total population, age, sex, previous job, second job, etc) are identified to provide key indicators. The European Labour Force Survey for example, has been carried out by the Member States of the EU and co-ordinated by EUROSTAT since 1973.

The definitions of employment and unemployment used in EU countries, closely follow those adopted by the 13th International Conference of Labour Statisticians, in 1982.

WAGES

Notes on Methodology

Data on average monthly gross and net salaries (wages) were obtained on the basis of monthly reports of the enterprises and not enterprises. According to the methodology currently used in B&H, there is no distinction made between employers and employees. Data related to net wages and gross wages are available. Data related to net and gross salaries, including wages of the employers in the Ministry of Defence and the Ministry of Foreign Affairs, are not.

Net monthly earning includes the income of a person in employment earned for work during regular working hours and some additional income, annual leave, sick pay up to 30 days, public holidays, paid leave, redundancy and work curtailment payments which are involuntary and non prejudicial.

Gross monthly earning includes all kinds of the net payments derived from on permanent employment plus participation, co-payments, contributions and taxes, as prescribed by law.

Average net and gross earning per one person in employment are calculated by dividing the total of payments by the number of persons in paid employment.

Average monthly pay at the state level can be calculated by the following formula:

$$\bar{X} = \frac{\sum_{i=1}^{n_i} X_i + \sum_{j=1}^{n_j} X_j}{n_i + n_j}$$

gdje je

\bar{X} - prosjecna placa

X_i - isplacena masa placa u Federaciji;

X_j - isplacena masa placa u Republici Srpskoj;

n_i - broj zaposlenih koji su primili placu u Federaciji BiH;

n_j - broj zaposlenih koji su primili placu u Republici Srpskoj.

Ovdje postoji **jedna specificna poteškoca**: velike su neredovitosti u isplatama, a statistika podrazumijeva placanja u mjesecu, a ne mjesecno ugovorene, uobicajene ili prosjecne place. To znaci da u tijeku jednog mjeseca, na primjer, jedna osoba nije primila ni jednu konvertibilnu niti njemacku marku, a u narednom mjesecu ta osoba može primiti i dvije place.

\bar{X} - is average monthly pay

X_i - is the total pay of the enterprise i , that belongs to the Federation

X_j - is the total pay of the enterprise j , that belongs to the Republic Srpska

n_i - is the total number of persons working in the Federation enterprises

n_j - is the total number of persons working in the Republic Srpska enterprises

One principal difficulty exists: there is great irregularity in payments while the statistics reflect pay in each individual month and **not** monthly contractual, usual or average salaries. This means that in one month, for instance, one person may receive zero KM (1 **K**onvertible **M**ark = 1 **D**eutsche Mark) and in the next month twice his normal salary. When BHAS publishes longer monthly series with wages, convergence indicators are included (see Bulletin 2). In this bulletin it is not necessary.

2. POLJOPRIVREDA ***AGRICULTURE***

POLJOPRIVREDA

Metodološka objašnjenja

Podaci o zasijanim i požnjevenim površinama i prinosima ratarskih kultura prikupljaju se redovnim statističkim istraživanjima, a za gazdinstva individualnih poljoprivrednih proizvođača podaci su dobiveni procjenom. Procjenu vrše stručna lica za poljoprivredu u općinama. Požnjevene površine mogu biti manje od zasijanih površina u slučaju kada su usjevi uslijed elementarnih i drugih nepogoda potpuno uništeni, tako da na tim površinama nije obavljena žetva niti ubran prinos.

Poljoprivredna površina je zemljišna površina koja se koristi za poljoprivrednu proizvodnju. Poljoprivrednu površinu čine: obradiva površina, pašnjaci, ribnjaci, trstici i bare.

Obradiva površina je zemljišna površina na kojoj se gaje ratarski i povrtni usjevi, višegodišnji zasadi i trave i na kojima se vrši obrada, kosidba, i drugi poljoprivredni radovi i po pravilu ubiru prinosi svake godine. Obradivu površinu čine: oranice i bašte, vocnjaci, vinogradi i livade.

Oranicna površina je zemljišna površina na kojoj se obavlja ratarska proizvodnja. Na njoj se po utvrđenom redu (plodoredu) siju ratarski usjevi: žita, industrijsko bilje, povrtno bilje i stocno krmno bilje. U oranice površine se uracunavaju i površine koje su "radi odmora" ostale neobrađene. Pored toga, oranicama se smatraju i površine pod loznicima i vocnim rasadnicima, kao i djetelišta i lucerišta.

AGRICULTURE

Notes on Methodology

Data on the sown and harvested areas and on the yield of agricultural cultivation were collected on the basis of regular statistical surveys.

Data on holdings of individual producers were got by estimation.

Experts in agriculture do the estimation of municipalities.

Harvested areas can be less than sown areas when crops, due to climate problems, are completely or partially destroyed.

Agricultural areas are land areas used for agricultural production and are composed of arable land, pastures, fishponds, reeds and pools.

Cultivated arable land is the area on which yearly agriculture crops are sown and also the areas for crops and vegetables for long term plants. Meadows are also included in this measure.

A cultivable area is used for agriculture production and comprises arable land, garden, orchards, vineyards and meadows.

In these areas, agriculture crops are sown in a particular order as follow: cereals, industrial crops, vegetables, feed crops.

The areas that stay uncultivated due to rest are also considered cultivable land. Orchards, clover and alfalfa are also arable land.

3. ŠUMARSTVO ***FORESTRY***

ŠUMARSTVO

Metodološka objašnjenja

Podaci o proizvodnji, prodaji i zalihama šumskih sortimenata, obradjeni u ovom biltenu, uradjeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja. Mjesečne izvještaje podnose sva poduzeca koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Stoga je podacima obuhvaćena samo proizvodnja, prodaja i zalihe šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Podaci se daju na temelju izvršenog premjera šumskih sortimenata. Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Industrijsko drvo je ono drvo koje ima povoljna fizička i kemijska svojstva za daljnju industrijsku upotrebu i preradu. Industrijsko drvo razvrstava se u dvije grupe: industrijsko drvo za mehanicku preradu (trupci, drvo za ploce i sl.) i industrijsko drvo za kemijsku preradu (celulozno drvo, drvo za suhu destilaciju i sl.).

Tehnicko drvo namjenjeno je za razne tehnicke svrhe (rudnicko drvo, stupovi za elektro i telefonske vodove i sl.), te njegova fizička i kemijska svojstva upravo odgovaraju toj namjeni. Ogrjevno drvo je namjenjeno neposredno za ogrjevanje ili za proizvodnju drvenog uglja.

FORESTRY

Notes on Methodology

Data on production, sales and stock of forestry products in this bulletin were prepared from regular monthly surveys processed by the entity statistical offices.

All companies engaged in permanent production of forestry items from state forests submit monthly statistical reports regardless of whether the exploitation of forests is a basic or a secondary activity for them.

Therefore, this data covers only production, sales and stock of forestry products from state forests, while forestry products, which are produced by private forestry, are not included.

Quantities are given in net wood of mass product which are measured in cubic metres.

Industrial wood is one whose properties allow for further industrial use and processing.

Industrial wood is classified into two groups: industrial wood for mechanical processing (trunks, wood for plates etc.) and industrial wood for chemical processing (cellulose fibre, wood for dry distillation).

Technical wood is for other technical uses (mining timbers, poles for electric and telephone cables), and its physical and chemical features are appropriate to these uses.

The fuel wood is for burning or the production of charcoal.

4. GRAĐEVINARSTVO CONSTRUCTION

GRAĐEVINARSTVO

Metodološka objašnjenja

Podaci u ovom biltenu dati su temeljem obrade statističkih podataka mjesečnog izvješća građevinarstva koji zavodima za statistiku u oba BiH entiteta dostavljaju poduzeca koja se bave građevinskim radovima.

Pod pojmom građevinski radovi obuhvacene su djelatnosti: pripremni radovi na gradilištu (uključujući rušenje građevinskih objekata, zemljane radove i ispitivanje terena za gradnju); izgradnja objekata visokogradnje, niskogradnje i hidrogradnje (izgradnja kompletnih objekata ili njihovih dijelova, rekonstrukcija, dogradnja i održavanje objekata); svi instalacioni radovi (struja, voda, plin, grijanje, ventilacija i hlađenje); izolacioni radovi i završni građevinski radovi (fasaderski radovi, malterisanje, ugradnja stolarije, postavljanje podnih i zidnih obloga, molerski, staklarski i ostali završni radovi).

Grđevinski objekat je svaka nadzemna i podzemna gradnja kao i vodogradnja, koja u građevinskom smislu predstavlja odvojenu samostalnu cjelinu sa unaprijed određenom namjenom, a fiksirana je za određenu lokaciju.

Podaci o vrijednosti izvršenih radova računati su temeljem privremenih mjesečnih situacija i predstavljaju obracunatu vrijednost izvršenih radova, a ne vrijednost naplacenih radova. Vrijednost je data u tekucim cijenama, a iskazana je u hiljadama KM. Ovaj podatak podlozan je korekcijama pri izradi konacnih obracuna.

Podatak o izvršenim efektivnim satima rada predstavlja ukupan broj sati koji su ostvarili radnici na građevinskim objektima u izvještajnom mjesecu u redovnom i prekovremenom radu, bez obzira da li su placeni po satu, normi ili akordu.. U ovaj broj nisu uključeni sati rada inženjera i tehnicara.

Podatak o broju radnika odnosi se na stanje zaposlenih radnika posljednjeg dana u mjesecu na koji se podaci odnose, a ne uključuje radnike na administrativnim i inženjersko - tehničkim poslovima.

Za mjerenje promjena podataka o radnoj snazi u građevinarstvu (broj izvršenih efektivnih radnih sati i broj radnika na gradilištima) računati su stope promjena u odnosu na prethodni mjesec za obje varijable. Podaci su računati prema slijedećoj formuli:

$$\Delta = \{ [\text{Vrijednost (t)} - \text{Vrijednost (t-1)}] / \text{Vrijednost (t-1)} \} \times 100$$

gdje (t) predstavlja vrijednosti iz tekućeg mjeseca, a (t-1) vrijednosti iz prethodnog mjeseca.

CONSTRUCTION

Notes on methodology

The data in this bulletin are gathered from monthly reports on construction, which are submitted to both entity Statistics Offices by construction companies.

The term “construction works” covers the following activities: preparatory works on building sites (including demolition of construction objects, land works and area exploration for building), buildings, civil engineering and hydraulic engineering (building complete objects or their parts, reconstruction, rebuilding and maintenance of objects); all installation works (electricity, water, gas, heating, ventilation and air devices); insulation works and final construction works (façade works, plastering with mortar, joiner’s trade, installing floor and wall linings, painting, glazing and other final works).

The construction object is any above-ground, underground or aquatic building, resulting from a separate and pre-visualised plan in a pre-determined, fixed location.

Data on the value of completed works is calculated on a monthly basis and represent the estimated value of work completed, and not the construction costs incurred to date.

The value is given at current prices, in thousands of convertible marks (KM). This data is subject to corrections after final calculations.

Data on effective hours completed represents the total number of hours that workers have spent on the building sites in a given month in regular and overtime work, independently of whether they are paid by the hour, norm or agreement.

This number does not include the hours worked by engineers and technicians.

Data on number of workers refer to the number of workers employed on the last day of the month to which the data are related.

This information does not include workers in the administrative, engineering or technical sector.

To calculate the change of data on employment in construction (number of completed effective working hours and number of workers on building sites) the rates of change in relation to the previous month for both variables were taken into account. Change is calculated according to the following formula:

$$\Delta = \{[\text{Value } t - \text{Value } (t-1)] / \text{Value } (t - 1)\} \times 100$$

Where Value (t) represents the value of the current month, and Value (t-1) the value from previous month.

PRIJEVOZ I VEZE

Metodološka objašnjenja

Podaci o drumskom i željezničkom prometu dobiveni su obradom mjesečnih statističkih izvješća, koja su entitetski statistički zavodi prikupili od poduzeca i drugih poslovnih subjekata koji se bave prijevozom putnika i robe (tereta) u unutrašnjem i međunarodnom prijevozu.

Za željeznički prijevoz u ovom biltenu su raspoloživi slijedeći pokazatelji: broj prevezenih putnika, tone prevezene robe (tereta) i broj putničkih i tonskih kilometara. Za drumski prijevoz, pored naprijed navedenih indikatora, raspoloživi su i podaci o pređenim kilometrima vozila .

U drumskom prijevozu nije obuhvaćen prijevoz putnika i robe koji, svojim prijevoznim sredstvima, poduzeca obavljaju za vlastite potrebe (interni transport) .

Pod pojmom prijevoz u prometu, podrazumjeva se kretanje putnika ili tereta od jednog mjesta (mjesto ukrcaja) do drugog mjesta (mjesto iskrcaja) i predstavlja mjeru aktivnosti prijevoznih poduzeca.

Putnički kilometar je izračunata jedinica mjere koja uslovno predstavlja prijevoz 1 putnika na udaljenosti od 1 kilometra. Indikator - putnički kilometar je kompleksan indikator koji je izračunat i dostavljen od strane poduzeca – izvještajnih jedinica. Ovaj indikator iskazuje agregiranu jedinicu mjere broja prevezenih putnika u odnosu na predenu dionica puta. Radi se o mjeri fizičkog obima prijevoza i pokazatelj je rentabilnosti rada prijevoznog poduzeca.

Na isti način, tonki kilometar je jedinica mjere koja predstavlja prijevoz 1 tone robe na udaljenosti od 1 kilometra.

Gradski prijevoz predstavljen je podacima o pređenim kilometrima vozila i prevezenim putnicima na određenim gradskim linijama sa fiksiranim postajama i utvrđenim voznim redom. Podacima je obuhvaćen prijevoz putnika koji se obavlja gradskim autobusima, tramvajima i trolejbusima. U Republici Srpskoj ne postoje tramvajske i trolejbuske linije.

Oblast telekomunikacija u biltenu je predstavljena osnovnim indikatorima o poštanskom, telegramskom i telefonskom prometu, a ulazni podaci dobiveni su na temelju mjesečnih izvješća poduzeca registriranih za tu djelatnost.

Podaci za pismonosne i paketne pošiljke u unutrašnjem i međunarodnom prometu sadrže transvere: pisama, preporučenih pošiljki, vrijednosnih pisama i paketa primljenih za otpremu i prispjelih za dostavu i isporuku, bez tranzita, a uključena je i otprema časopisa i tiska upućena pretplatnicima.

Platni promet obuhvata uplate i isplate poštanskim uplatnicama, žiro i tekucim računima, računskim knjižicama, štednim ulozima i sl., na poštanskim šalterima.

U unutrašnjem telegramskom prometu obuhvaćeni su samo otpremljeni telegrami, a u međunarodnom prometu i otpremljeni i primljeni telegrami.

Mjesni i međumjesni, unutrašnji telefonski razgovori, obuhvataju samo polazne, a međunarodni, polazne i dolazne razgovore.

Telegramski promet i telefonski razgovori iskazani su brojem impulsa, koji predstavlja tehničku jedinicu mjere za tu vrstu saobraćaja.

Podaci o mobilnim telefonskim razgovorima odnose se samo na Federaciju BiH, obzirom da u Republici Srpskoj još uvijek nije uspostavljena mreža mobilne telefonije.

TRANSPORT AND COMMUNICATIONS

Notes on methodologies

Data on road and railway transport were obtained by processing monthly statistical surveys, which the entity Statistical Office collected from enterprises and other business units which provide domestic and international transport of passengers and goods.

For railway transport the following indicators are available in this bulletin: number of transported passengers, tons of transported goods (freight) and number of passengers and tons/kilometre.

For road transport, besides the above mentioned indicators, data are available on kilometres covered by means of transport.

Road transport does not include the transport of passengers and goods undertaken by firms for their own needs and with their own means.

By transport we mean the movement of passengers or cargo from one place (place of loading) to another (place of unloading).

Passenger kilometre is an indicator representing the transport of one passenger for the distance of one kilometre. This indicator is a complex one, which is calculated and delivered by firms. It is obtained from the aggregated number of transported passengers in relation to the distance of transportation. It concerns a measure of physical quantity of transport and is an indicator of rentability work of a transport company.

In the same way, ton kilometres is a unit which represents the transportation of one ton of goods for the distance of one kilometre.

Urban transport is represented by data on kilometres covered by means of transportation and transported passengers on certain urban lines with fixed stations and schedules drive time.

The data comprise transport of passengers on city buses, trams and trolley buses. Republika Srpska has neither trams nor trolley bus lines.

In the bulletin the area of telecommunications is presented by basic indicators on post, telegram and telephone traffic. Input data were obtained from monthly reports by firms, which are registered for these activities.

Data for letters and parcels in internal and international transport comprise: letters, special letters, valuable letters and parcels received for delivery, including delivery of magazines and newspapers sent to subscribers, excluding transit.

Payment of turnover comprises the payments at the post office window, postal invoices, giro and current accounts, accounting books and savings deposits.

Domestic telegraph service covers only delivered telegrams, while the international services covers both, delivered and received telegrams.

Local and inter-local domestic telephone calls, comprise only departure calls, while international calls comprise both outgoing and incoming calls.

Telegraph services and telephone calls are given by the number of telephone impulses, which represent a technical unit for this type of communication.

The data on mobile telephone calls refer only to the territory of the Federation, as the network for mobile telephony in Republika Srpska has not yet been established.

6. TURIZAM I UGOSTITELJSTVO
TOURISM , HOTELS AND
RESTAURANTS

TURIZAM

Metodološka objašnjenja

Podaci o turističkom prometu (dolasci i nocenja) su rezultat statističkih istraživanja koja se provode u entitetskim zavodima za statistiku, a dobiveni su temeljem mjesečnih izvješća koja dostavljaju poslovni subjekti koji se bave pružanjem smještajnih usluga turistima. Izvješća se sastavljaju temeljem evidencija u knjigama gostiju.

Podacima je obuhvaćen broj dolazaka i nocenja, a ne broj turista.

Turistom se smatra svaka osoba koja putuje u neko mjesto izvan svog prebivališta i provede najmanje jednu noc u ugostiteljskom ili nekom drugom objektu za smještaj gostiju, a motiv boravka u ugostiteljskom objektu može biti: odmor, poslovi (kongresi, sajmovi i izložbe, misije međunarodnih organizacija i sl.), zdravlje, učešćivanje u sportskim aktivnostima i sl.

Domacim turistom se smatra svaka osoba s prebivalištem u Bosni i Hercegovini koja u nekom mjestu u Bosni i Hercegovini, izvan mjesta svog prebivališta, provede najmanje jednu noc u ugostiteljskom ili drugom objektu za smještaj gostiju.

Strani turist je svaka osoba s prebivalištem izvan Bosne i Hercegovine koja privremeno boravi u Bosni i Hercegovini i koja provede najmanje jednu noc u ugostiteljskom ili drugom objektu za smještaj gostiju.

UGOSTITELJSTVO

Metodološka objašnjenja

Podaci o prometu u ugostiteljstvu prikupljeni su redovitim tromjesečnim izvješćima koja popunjavaju poduzeca u Federaciji BiH i Republici Srpskoj, a koja obavljaju ugostiteljsku djelatnost.

Ugostiteljska djelatnost je djelatnost pripremanja hrane i pružanja usluga prehrane, pripremanja i usluživanja pica i napitaka i pružanja smještajnih usluga.

Promet u ugostiteljstvu obuhvata vrijednost izvršenih ugostiteljskih usluga-posluživanja hranom, picima, smještaja i ostalih usluga koje se uobicajeno pružaju uz temeljne ugostiteljske usluge.

TOURISM

Notes on Methodology

Data on tourist turnover (number of guests and overnight stays) are collected from the monthly reports by business entities or parts of business entities, which provide accommodation services to tourists or act as agencies. The reports are usually made on the basis of registration records in guest books.

Data cover the number of arrivals and the number of guests and overnight stays.

A **tourist** is considered any person travelling outside of his place of permanent residence, and spending at least one night in catering or some other accommodation facility for one of the following reasons: rest, business, (congresses, fairs, exhibitions, mission of international organisation etc), health and participation in sports activities.

A **domestic tourist** is a person with permanent residence in B&H spending at least one night at a location in Bosnia and Herzegovina outside his or her place of normal accommodation or other accommodation facilities for guests.

A **foreign tourist** is any person with permanent residence outside B&H, but that temporally resides in B&H and spends at least one night in catering or in some other accommodation facility.

CATERING

Notes on Methodology

Data related to turnover in catering are collected at regular quarterly reports made by the enterprises in Federation B&H and Serbs Republic carrying out catering activities.

Catering activity is activity of food preparations and nutrition services, preparing and serving drinks as well as accommodation services.

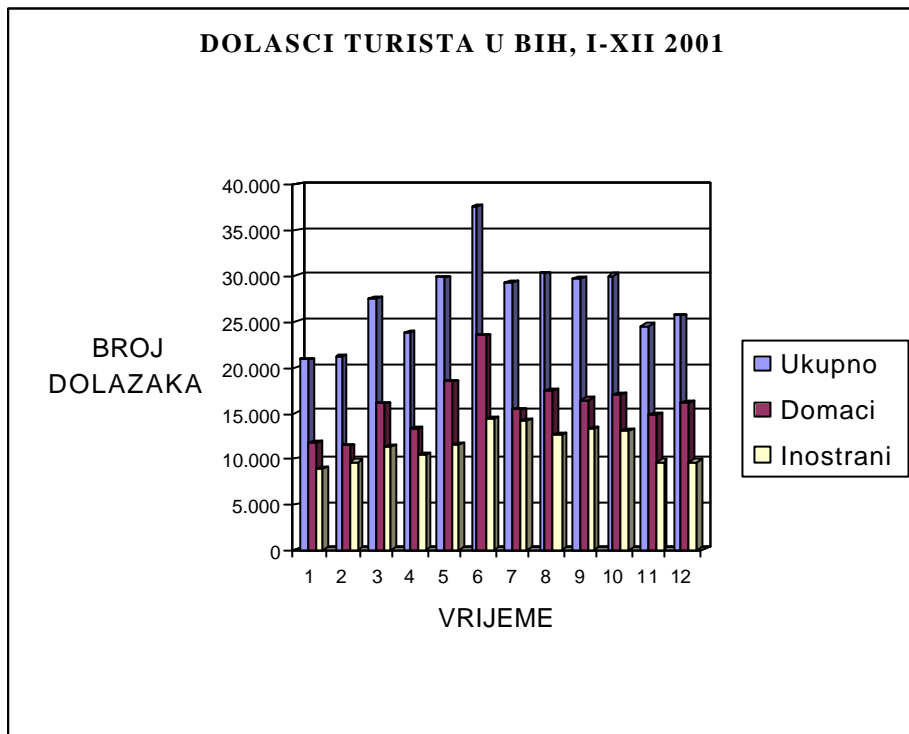

Catering turnover involves the value of carried out catering services – food serving, drinks, accommodation and other services usually in conjunction with primary catering services

7. STANOVNIŠTVO
POPULATION

STANOVNIŠTVO

Metodološka objašnjenja

Ovdje se daju samo kraca objašnjenja definicija jedinice promatranja.

Definicija jedinice promatranja

U statistici je jedinica promatranja rođenih svako živorođeno i mrtvorodeno dijete.

Kao živorođeno smatra se ono dijete koje poslije rođenja, čak i za najkraće vrijeme pokazuje znake života (disanje, odnosno kucanje srca) bez obzira na trajanje trudnoce majke. Ako dijete ubrzo po rođenju umre, onda se najprije registruje kao živorođeno, a zatim kao umrlo. Ako je dijete rođeno, odnosno izvađeno iz tijela majke bez ikakvih znakova života, tj. ako nije disalo niti pokazivalo neki drugi znak života, kao što je kucanje srca ili pokreti mišića, a nošeno je duže od 28 tjedana (približno 7 mjeseci), smatra se mrtvorodeno. Ne registruje se kao rođenje izbacivanje mrtvog ploda koji je bio nošen manje od 28 tjedana. Za prikupljanje statističkih podataka o živorođenoj i mrtvorodenoj djeci služi statistički listić o rođenju.

U statistici je jedinica promatranja umrlih svako umrlo lice. Za prikupljanje podataka o umrlim licima služi statistički listić o slučaju smrti. Umrlo je svako živorođeno lice kod kojeg je nastupio trajni prestanak svih vitalnih funkcija koje započinju rođenjem bez mogućnosti ponovnog oživljavanja. Ovdje nisu uključeni mrtvorodeni. Umrlo dojenčadi smatraju se djeca koja su umrla prije navršene prve godine života.

Kod statistike sklopljenih brakova jedinica promatranja je svaki zakonito sklopljen brak, a kod statistike razvoda brakova svaki brak koji je pravosnažnom presudom nadležnog suda razveden, poništen, odnosno proglašen nevažećim. Za prikupljanje podataka o sklopljenim brakovima služi statistički listić o sklopljenom braku, a o razvedenim brakovima statistički listić o razvedenom braku.

Podaci dati u tablicama su rezultat statističkih istraživanja koja se provode u entitetskim zavodima za statistiku, a dobiveni su na temelju mjesečnih izvješća maticara.

Vitalni indeks je odnos između broja živorođenih i broja umrlih.

POPULATION

Notes on Methodology

In this text we present only the definitions for the observation units

Definitions of the observation units

In statistics, the unit of observation of a born person includes both live births and stillborn babies.

A live birth is any child who exhibits signs of life at birth. Live birth is the complete expulsion or extraction from its mother of the product of conception, irrespective of the duration of the pregnancy, which, after such separation, breathes or shows any other evidence of life such as heartbeat, pulsation of the umbilical cord, or definite movements of voluntary muscles, whether or not the umbilical cord has been cut or the placenta detached. If a product of such a birth dies, it is first registered as live-birth and then as dead. For collection of data on live-born and stillborn children a statistical questionnaire about birth is employed.

In statistics, the unit of observation of a dead person is every dead person. For collection of data on dead persons, a statistical questionnaire about death is employed. A dead person is every live-born person in whom there is permanent disappearance of all evidence of life at any time after live birth has taken place, without chance of resuscitation. Stillborn children are not included here. A dead infant is considered to be a child who dies at an age of less than one year.

In statistics regarding marriages, the unit of observation is every legal marriage, and in statistics regarding divorces, every marriage that was divorced, revoked, or proclaimed invalid by a valid decision of the municipal court in charge. For data collection regarding marriages and divorces a statistical questionnaire is employed for each.

Data presented in the tables are gathered by statistical surveys realised in the Institutions for statistics in the entities, collected through monthly reports of registrars.

The vital index is a ratio between live births and death.

Metodološke napomene

Statistika robne razmjene sa inostranstvom uradena je od strane Agencije za statistiku BiH u saradnji sa Zavodom za statistiku Republike Srpske i Federalnog zavoda za statistiku.

Korišteni metod zasniva se na metodološkim preporukama Statistickog ureda Evropske unije (EUROSTAT) i Statistickog ureda Ujedinjenih nacija.

Predmet posmatranja statistike robne razmjene sa inostranstvom su robe koje se izvoze odnosno uvoze.

Izvoz obuhvaca svu robu koja se izvozi iz zemlje, a potjece iz domace proizvodnje ili unutrašnjeg robnog prometa.

Uvoz obuhvaca svu robu koja je uvezena iz inostranstva radi potrošnje u zemlji.

Podaci ukljucuju izvoz i uvoz ostvaren na osnovi poslova oplemenjivanja tj. poslova obrade, dorade i prerade.

Promet na osnovi poslova oplemenjivanja može biti aktivan u slucaju kada se privremeno uvozi roba u zemlju da bi se tu obavili poslovi obrade, dorade ili prerade nakon cega se roba vraca u inostranstvo. Ovaj promet je pasivan u slucaju kad se roba privremeno izvozi u inostranstvo da bi se tamo obavila prerada, obrada ili dorada, a nakon tog posla roba se vraca u zemlju.

Izvor podataka za statistiku robne razmjene sa inostranstvom jesu carinske deklaracije o izvozu i uvozu roba, koje u ime poslovnog subjekta, podnose carinarnicama otpremnicka preduzeca prilikom carinjenja robe. Za prikupljanje i kontrolu ispravnosti carinskih deklaracija odgovorne su Carinske uprave entiteta, od kojih Zavodi za statistiku entiteta preuzimaju kontrolirane carinske deklaracije u obliku slogova na magnetnom mediju i nakon obrade dostavljaju ih Agenciji za statistiku BiH.

Od 1998 godine carinski postupak u entitetima odvija se u skladu sa Opcim pravilima za carinske tarife (Službeni glasnik BiH, br.1/98).

Vrijednost uvoza i izvoza iskazuje se u konvertibilnim markama KM. U tabelama za 1997 i 1998 godinu uradena je konverzija vrijednosti robnog prometa iz USD prema KM, u skladu sa važecim prosjecnim kursom Centralne banke BiH.

Zbog nedostatka sveobuhvatnih podataka o robnoj razmjeni sa državama, u tabelama je prikazana robna razmjena sa jednim brojem država koje se mogu izdvojiti kao vodeći trgovinski partneri BiH.

Za statistiku robne razmjene sa inostranstvom osnovni kriterij podjele po zemljama jeste zemlja namjene kod izvoza, odnosno porijekla kod uvoza. Zemlja namjene je zemlja kojoj je namjenjena potrošnja izvezenih proizvoda ili njihova dalja prerada. Zemlja porijekla je zemlja u kojoj je roba proizvedena ili je iz nje porijeklom.

TRADE

Notes on Methodology

Statistics of foreign trade is prepared by Agency for Statistics of B&H in the cooperation with the Institute of Statistics of Republika Srpska and Institute of Statistics of Federation B&H.

Used methodologies is based on the methodological recommendations of Statistical Office of European Union (Eurostat) and Statistical Office of United Nations.

As object of observing in foreign trade are all goods exported or imported.

Exports refer to all exported goods which origin by domestic production, respectively from home turnover trade.

Imports cover all imported goods from abroad due to its consuming in country. In the framework of regular exports and imports, it is included reworking trade, namely export and import based on finishing process, processing and treatment. The active reworking trade cover imports for processing and exports after that, while passive reworking trade cover exports for processing and import after that.

Source of data for foreign trade are custom declaration (SAD) on export and imports, which on behalf of legal entity, delivering of shipping company processing goods.

The custom administrations of entity are authorized to collect and control of custom declarations.

The Institutions of Statistics of entity takes over the checked custom declarations. In terms of letters on magnetic medium and after processing they send to Agency for Statistics of B&H.

Since 1998 custom procedure in entity are being performed in accordance with the general rules for custom tariff (Official gazeta B&H, N° 1/98).

Value of imports and exports is accounted by convertible marks (KM). In tables for 1997 and 1998 were done conversion of value of foreign trade from USD to KM, accordingly validity average of exchange rate of Central Bank of B&H.

Due to lack of comprehensive data on foreign trade, in tables are given statistics with a number of countries which could separate as leading trade partners of B&H.

Collection data of foreign trade by countries are performed on the basis principle by country for which exported goods are intended by export, or the country of origin by imports. That means, that in export registered a country in which the goods spending or processing, and in import country in which the goods by manufacturing or finishing process led in status in which are imported.

Da bi se dala realnija ocjena sadašnje vrijednosti robnog prometa BiH sa inostranstvom, prikazani su podaci o robnoj razmjeni BiH sa inostranstvom iz 1990. godine.

Vrijednost robe u spoljnoj trgovini iskazana je na osnovu pariteta franko bivša jugoslovenska granica: FOB cijene za izvoz, CIF cijene na uvoz.

Konverzija tadašnjeg JU-dinara izvršena je prema važećem deviznom kursu u odnosu na njemacku marku, u omjeru 1 DEM=700,00 dinara.

Klasifikacija izvoza i uvoza roba u spoljnoj trgovini u 1990. godini vršila se prema Nomenklaturi statistike spoljne trgovine koja se bazirala na Standardnoj medunarodnoj trgovinskoj klasifikaciji SITC Rev.3.

Podaci za 1997,1998,1999 i 2000 godinu takode su uradeni na bazi iste klasifikacije SITC Rev.3. tako da je omogucena njihova medusobna komparabilnost.

In order to give a real picture on currently value of foreign trade of B&H, it was presented data on foreign trade of B&H from 1990.

Value for the goods in foreign trade is stated on the basis of parity of franco ex-Yugoslavia border: FOB prices for export, CIF prices for imports.

Conversion Yu-dinar was done to valided exchange rate in the relation Deuchland mark, 1 DEM = 700,00 dinars.

The goods are classified in 1990 according to the Nomenclature of Statistics Foreign Trade based on the Standard International Trade Classification SITC Rev.3.

Data for 1997, 1998, 1999 and 2000 are also prepared on the basic same classification of SITC Rev.3, so that it was enabled its mutual comparasion.
