1. FOREWORD

Bulletin „Consumer Price Index in Bosnia and Herzegovina“ is a publication of the Agency for Statistics of Bosnia and Herzegovina and it contains a comprehensive overview of official statistical data on consumer price movements at the level of Bosnia and Herzegovina. The Bulletin is done within the regular activities of the Agency for Statistics of Bosnia and Herzegovina on the aggregation and publication of data for the level of Bosnia and Herzegovina.

By the Law on statistics of Bosnia and Herzegovina (Official Gazette of Bosnia and Herzegovina, No. 34/2002) Agency for Statistics of Bosnia and Herzegovina is in charge of production and publishing of aggregated official statistics for the level of Bosnia and Herzegovina in accordance with internationally accepted Methodology of Consumer Prices, using the data delivered by entity statistical institutes (Federal Office of Statistics and Republika Srpska Institute of Statistics) and its branch office in District Brčko.

The data on the consumer price movements have been collected uniformly since the year 2005, and first results were published at mid 2007 which was the starting point for the regular publication of the CPI data.

This Bulletin is composed of five segments. First segment contains the methodological explanations and definitions, second segment contains results for the years 2008 and 2009, third segment contains statistical tables, fourth segment contains graphical analyses of the results and fifth segment contains a glossary. Detailed methodological explanations of the consumer price indices can be found on the official web site of the Agency for Statistics of Bosnia and Herzegovina (www.bhas.ba).

The data presented in the Bulletin are the result of joint work of Agency for Statistic of Bosnia and Herzegovina (BHAS), Federal Office of statistics (FOS), Republika Srpska Institute of Statistics (RSIS) and BHAS branch in Brcko District. We would like to take this opportunity to express our gratitude to them for providing the necessary data for this publication.

*Director:
Zdenko Milinović*

1. PREDGOVOR

Bilten „Indeks potrošačkih cijena u Bosni i Hercegovini“ je publikacija Agencije za statistiku Bosne i Hercegovine, koja na sveobuhvatan način prikazuje službene statističke podatke o kretanjima potrošačkih cijena za razinu Bosne i Hercegovine. Bilten je urađen u okviru redovitih aktivnosti Agencije za statistiku Bosne i Hercegovine na agregiranju i publiciraju podataka za razinu Bosne i Hercegovine.

Prema Zakonu o statistici BiH (Službeni glasnik BiH, broj 34/2002), Agencija za statistiku Bosne i Hercegovine je nadležna da, sukladno međunarodno prihvaćenoj metodologiji, izrađuje i objavljuje službene statističke podatke za razinu Bosne i Hercegovine, koristeći podatke entitetskih zavoda za statistiku (Federalni zavod za statistiku i Republički zavod za statistiku Republike Srpske) i podružnice Agencije za statistiku BiH u Brčko distriktu BiH.

Podaci o kretanjima potrošačkih cijena u Bosni i Hercegovini se na jedinstven način prikupljaju od 2005. godine, a prvi rezultati su publicirani sredinom 2007. godine od kada se redovito publiciraju.

Bilten sadržava pet dijelova. Prvi dio sadrži metodološka obješnjenja i definicije, drugi dio sadrži rezultate za 2008. i 2009. godinu, treći dio sadrži statističke tablice, četvrti dio sadrži grafičke analize rezultata, a peti dio sadrži pojmovnik. Detaljan prikaz metodologije indeksa potrošačkih cijena se nalazi na web stranici Agencije za statistiku Bosne i Hercegovine (www.bhas.ba).

Podaci predstavljeni u Biltenu rezultat su zajedničkog rada Agencije za statistiku Bosne i Hercegovine (BHAS) sa Federalnim zavodom za statistiku (FZS), Republičkim zavodom za statistiku Republike Srpske (RZSRS) i podružnicom BHAS-a u Brčko distriktu BiH. Ovom prilikom im izražavamo zahvalnost, jer su Agenciji za statistiku BiH omogućili da na temelju njihovih podataka pripremi ovu publikaciju.

METODOLOŠKA OBJAŠNJENJA
METHODOLOGICAL EXPLANATIONS

2. METHODOLOGICAL EXPLANATIONS AND DEFINITIONS

Definition of Consumer Price Index

Consumer Price Index allows to measure the consumer price inflation that is the rate of change of the consumer prices of goods and services purchased by the households through monetary transactions in the economic territory of Bosnia and Herzegovina for products that directly satisfy consumers needs.

Consumer Price Index with temporary reduction of prices represents a specific mode of consumer prices that includes temporary reduction of prices in accordance with the EU regulations No. 2602/2000.

Purpose

Consumer Price Index represents a measure of inflation in state. It serves as a guarantee the value of recurrent payments in escalator clauses for contractual relationships, it enables a comparison of inflation between countries as well as a comparison of price movements within particular country and regions, it can also serve as a base for deflating national accounts data and other purposes.

Consumer Price Index in Bosnia and Herzegovina

CPI is calculated on the basis of the representative list of products that consists of 624 different items in year 2008 and of 626 items in the year 2009. Each month over 21 000 prices are being collected in accordance with defined sample of outlets on 12 geographical locations.

Geographic coverage

The prices are being collected in 12 geographic locations – towns (Banja Luka, Bihać, Bijeljina, Brčko, Doboj, Istočno Sarajevo, Mostar, Prijedor, Sarajevo, Trebinje, Tuzla, Zenica) chosen by the criterion of their weight in terms of population and their importance with respect to the geographical areas they belong to.

Product coverage

All relevant goods and services bought by the reference population for the purpose of final consumption are included in the index. The coverage of goods and services is reviewed regularly in order to ensure the representativeness of the basket with respect to the consumer tastes and purchasing practices.

2. METODOLOŠKA OBJAŠNJENJA I DEFINICIJE

Definicija indeksa potrošačkih cijena

Indeks potrošačkih cijena predstavlja mjeru promjena cijena proizvoda i usluga koje kućanstva kupuju radi zadovoljenja svojih osobnih potreba na gospodarskoj teritoriji Bosne i Hercegovine.

Indeks potrošačkih cijena sa privremenim umanjenjima cijena je poseban oblik indeksa potrošačkih cijena, jer se kod njegovog izračunavanja uzimaju u razmatranje privremena sniženja cijena sukladno Regulativi EU broj 2602/2000.

Namjena

Indeks potrošačkih cijena predstavlja mjeru inflacije u državi. On služi za usklađivanje plaća i zarada sukladno kolektivnim ugovorima, te mirovina i socijalnih davanja. Također se koristi i za očuvanje vrijednosti kod ugovora s indeksnim klauzulama, omogućuje uporedbu stope inflacije s drugim zemljama, uporedbu kretanja cijena unutar zemlje između pojedinih regiona, te služi kao osnova za deflacioniranje pojedinih makroekonomskih agregata u statistici nacionalnih računa i u druge svrhe.

Indeks potrošačkih cijena u Bosni i Hercegovini

Indeks potrošačkih cijena u Bosni i Hercegovini izračunava se na temelju reprezentativne liste proizvoda koju u 2008. godini čine 624, a u 2009. godini 626 proizvoda. Svakog mjeseca prikuplja se oko 21 000 cijena na unaprijed definiranom uzorku prodajnih mjesta na dvanaest geografskih lokaliteta.

Geografski obuhvat

Cijene se prikupljaju na dvanaest lokaliteta - gradova (Banja Luka, Bihać, Bijeljina, Brčko, Dobojski, Istočno Sarajevo, Mostar, Prijedor, Sarajevo, Trebinje, Tuzla, Zenica) odabranih prema kriteriju broja stanovnika i njihovoj ulozi u geografskom području kojem pripadaju.

Obuhvat proizvoda

Obuhvaćeni su najvažniji proizvodi i usluge koje kupuje stanovništvo radi finalne potrošnje. Obuhvat dobara i usluga redovito se revidira kako bi se očuvala reprezentativnost liste proizvoda s obzirom na ukuse potrošača i njihove navike u pogledu kupovine.

Price collection

All the prices are being collected by the collectors of the statistical institutions in both entities and BHAS. The price collectors receive a clear specifications of the item name, it's COICOP code and unit of measure that they should collect in specific outlet. They choose a concrete item for price collecting in specific outlet, in accordance with the criterion of the most sold products in that outlet.

In order to be sure that the collector is collecting prices for exactly the same items each month, the form for the price collecting also includes the informations on detailed product description in terms of brands, variety and quantity, as well as the informations on possible replacements of items.

All of this allows us to monitor the exact price change in two different periods, but not the comparison of average prices between different geographical locations.

For the purposes of CPI calculations, the price collection is scheduled as follows:

- *for agricultural products sold on green markets the prices are being collected twice a month, in the first and third week of a month;*
- *for other items the prices, in accordance with European Regulative, are being collected once a month (on the 1 and 21 of the month) with the obligation of maintaining the interval of price collection.*

Weights

Weights used for calculating the CPI reflect relative importance of the sampled goods or services in the total consumption of resident households within the domestic territory. They are used for elementary indices calculations as the weighted averages. They are based on the data linked to the Household Final Consumption and resident population.

The most important data source for calculating the weights used in the consumer price indices is the Household Budget Survey. Since January 2007, the compilation of the CPI has been based on the weights derived from household expenditures from the Household Budget Survey 2004, updated every year according to changes in prices in a previous year.

Classification

The classification of products used in the CPI is the Classification of Individual Consumption by Purpose (COICOP). The COICOP breaks consumer expenditures into twelve different divisions of consumer goods and services.

Snimanje cijena

Sve cijene se prikupljaju lokalno na način da snimatelji od entitetskih Zavoda za statistiku i Agencije za statistiku BiH dobijaju jasne specifikacije naziva proizvoda, njegove COICOP šifre, te jedinice mjere koje trebaju posmatrati na terenu. Snimatelji na temelju tih informacija samostalno biraju konkretni proizvod čiju će cijenu snimati na određenome prodajnome mjestu. Snimatelj mora izabrati konkretni proizvod sukladno kriteriju najprodavanijeg proizvoda na datom prodajnom mjestu.

Kako bi se osiguralo da snimatelji iz mjeseca u mjesec snimaju cijene istih proizvoda, te kako bi se moglo pratiti koje proizvode snimatelji posmatraju na terenu, oni u upitnik unose i unaprijed definiran skup dodatnih karakteristika proizvoda, te informacije o eventualnim zamjenama proizvoda ukoliko ih bude.

Takav način snimanja omogućuje praćenje promjene kretanja cijena između dva razdoblja, ali ne i poređenje prosječne cijene između različitih geografskih lokaliteta.

Za potrebe indeksa potrošačkih cijena, snimanje cijena se vrši sljedećih dana u mjesecu:

- za poljoprivredne proizvode koji se prodaju na tržnicama cijene se prikupljaju dva puta mjesечно, i to u prvom i trećem tjednu u mjesecu;
- za sve ostale proizvode cijene se, sukladno važećim Evropskim regulativama, prikupljaju jedanput mjesечно (između 1. i 21. u mjesecu), s tim da se nužno održava isti interval između prikupljanja.

Ponderi

Ponderi koji se primjenjuju za izračun indeksa potrošačkih cijena su koeficijenti koji odražavaju relativnu važnost odabranih proizvoda i usluga u ukupnoj potrošnji kućanstava na domaćem teritoriju. Pomoću njih se izračunavaju elementarni indeksi kao ponderirani prosjeci. Temelje se na podacima povezanim sa finalnom potrošnjom kućanstava i na podacima o broju stanovnika.

Osnovni izvor podataka za izradu pondera za obračun indeksa potrošačkih cijena je Anketa o potrošnji kućanstava. Za izračunavanje indeksa potrošačkih cijena od siječnja 2007. godine primjenjuju se ponderi koji se temelje na podacima iz Ankete o potrošnji kućanstava za 2004. godinu. Ponderi se svake godine korigiraju kretanjem cijena u prethodnoj godini.

Klasifikacija

Za klasificiranje proizvoda iz statistike potrošačkih cijena upotrebljava se Klasifikacija osobne potrošnje prema namjeni (Classification of Individual Consumption by Purpose-COICOP), koja dijeli izdatke na dvanaest osnovnih odjeljaka proizvoda i usluga za koje se izračunavaju indeksi.

Aggregation

Consumer Price Index calculation begins with the calculation of elementary aggregate indices (items indices) and representative position indices at the level of towns. Elementary aggregate indices are calculated by using Laspeyres-type formula starting from the level of representative indices at the level of entities to the overall index at the level of Bosnia and Herzegovina. Reference base year for index calculation is 2005. For the CPI calculation two different types of weights are used: population weights (horizontal weights) for the level of entities and value of consumption of goods and services of the households on the territory of Bosnia and Herzegovina (vertical weights).

Agregiranje

Izračunavanje indeksa potrošačkih cijena počinje izračunavanjem elementarnih indeksa (indeksa proizvoda) i indeksa reprezentativnih stavki na razini gradova. Pri tome se kao mjera srednje vrijednosti koristi geometrijska sredina. Agregirani indeksi se nakon toga izračunavaju korištenjem formule Laspeyres-ovog tipa počevši od indeksa reprezentativnih stavki na razini entiteta sve do općeg indeksa za Bosnu i Hercegovinu. Referentna baza za izračunavanje indeksa je 2005. godina. Pri izračunavanju Indeksa potrošačkih cijena koriste se dva tipa pondera: ponderi stanovništva entitetski nivo (horizontalni ponderi) i ponderi vrijednosti potrošnje proizvoda u kućanstvima na teritoriji BiH (vertikalni ponderi).

REZULTATI ZA 2008. I 2009. GODINU
RESULTS FOR THE YEARS 2008 AND 2009

3. DATA FOR BOSNIA AND HERZEGOVINA FOR THE YEARS 2008 AND 2009

3.1. Consumer Price Index in Bosnia and Herzegovina for the year 2008

This Annual Bulletin represents a compilation of the monthly data on Consumer Price Indices from the January to December of 2008. The entire dataset presented in statistical tables, graphs and their analyses for the level of Bosnia and Herzegovina is devided according to divisions of the COICOP classification.

For each month of the year 2008 the consumer price indices are presented with and without temporary reduction of prices. The rates of change compared to the previous month and to the same month of the previous year were also presented. This Bulletin also contains the average annual indices compared to the base year 2005 and compared to the previous year.

The graphs represent overall indices by months with and without temporary reductions of prices, and the share of each COICOP division in annual price change calculated as the average of the year 2008 in respect to the average of the years 2005 as well as 2007.

3.2. Average annual inflation in the year 2008 in respect to the year 2005

If we consider the average 2008 CPI flow at the territory of Bosnia and Herzegovina in respect to the situation evidenced three years ago, meaning in respect to the average of 2005 CPI, we can conclude that the inflation in that particular period of time was 15,7 %. The large part of this increase of the overall level of prices was a result of VAT introduction in January of 2006 and the other part was a result of fluctuations of oil prices on the global market.

If we compare an average inflation rates in 2008 and 2005 as the base year it is noticeable that all divisions except the division of Clothing and Footwear have registered price increase.

The largest increase of prices was registered in the divisions: Housing, water, electricity, gas and other fuels 25,6%, Food and Non-Alcoholic beverages 24,8%, Communications 21,4%, Transport 17,2%, Restaurants and Hotels 14,3%, and Recreation and culture and Health 10,6%.

A slightly slower growth was registered in divisions: Education 9,0%, Other goods and services 4,9%, Furniture, household equipment and routine maintenance of the house 3,8% and Alcoholic beverages and tobacco 1,5%.

As we said only the division Clothing and Footwear has registered an average decrease of prices of 5,9%.

3. PODACI ZA BOSNU I HERCEGOVINU ZA 2008. I 2009. GODINU

3.1. Indeks potrošačkih cijena u Bosni i Hercegovini u 2008. godini

Godišnji bilten Agencije za statistiku BiH sadrži analizu mjesecnih podataka o indeksima potrošačkih cijena od siječnja do prosinca 2008. godine. Svi podaci prikazani u statističkim tablicama i grafovima, te njihova analiza sačinjeni su prema COICOP klasifikaciji po odjeljcima za razinu Bosne i Hercegovine.

Za svaki mjesec 2008. godine u biltenu su prikazani indeksi potrošačkih cijena sa i bez privremenih umanjenja cijena, te stope promjena u odnosu na prethodni mjesec i stope promjena u odnosu na isti mjesec prethodne godine. Također su prikazani i prosječni godišnji indeksi u odnosu na baznu 2005. godinu, te u odnosu na prethodnu godinu.

Na grafovima su prikazani opći indeksi po mjesecima sa i bez privremenih umanjenja cijena, te učešće pojedinih COICOP odjeljaka u godišnjoj promjeni cijena, izračunato kao prosjek 2008. godine u odnosu na prosjek 2005. odnosno 2007. godine.

3.2. Prosječna godišnja inflacija u 2008. godini u odnosu na 2005. godinu

Ukoliko posmatramo prosječno kretanje indeksa potrošačkih cijena u Bosni i Hercegovini u 2008. godini u odnosu na situaciju od prije tri godine, dakle u odnosu na prosjek 2005. godine, možemo zaključiti da je u tom razdoblju inflacija u prosjeku iznosila 15,7%. Dio velikog rasta opće razine cijena uzrokovan je uvođenjem PDV-a u siječnju 2006. godine, a dio velikim oscilacijama cijena nafte na globalnom tržištu.

Ako posmatramo prosječne stope inflacije u 2008. godini u odnosu na prosjek iz 2005. godine prema namjeni potrošnje, primjetit ćemo da je u svim odjeljcima osim Odjeće i obuće zabilježen rast cijena.

Posmatrano po COICOP odjeljcima, najveći rast cijena bio je u odjeljcima: Stanovanje, vodopskrba, električna energija, plin i drugi energeti za 25,6%, Hrana i bezalkoholni napici za 24,8%, Veze za 21,4%, Prijevoz za 17,2%, Restorani i hoteli za 14,3%, te Rekreacija i kultura i Zdravstvo za 10,6%.

Manji rast cijena zabilježen je u odjeljcima: Obrazovanje za 9,0%, Ostala dobra i usluge 4,9%, Namještaj, kućanski uređaji i redovito održavanje doma za 3,8%, te Alkoholni napici i duhan za 1,5%.

Jedino je u odjeljku Odjeća i obuća u prosjeku zabilježen pad cijena za 5,9%.

3.3. Average annual inflation in the year 2008 in respect to the year 2007

If we consider the average 2008 CPI flow at the territory of Bosnia and Herzegovina in respect to average of 2007 CPI, we can conclude that the inflation in that particular period of time was 7,4%.

If we compare average inflation rates in 2008 and 2007 as the base year it is noticeable that all divisions except the division of Clothing and Footwear have registered price increase.

The largest price increase was registered in the divisions: Food and non-alcoholic beverages 12,0%, Transport 11,2%, Housing, water, electricity, gas and other fuels 8,5% and Restaurants and hotels 7,1%.

The lower increase of prices was registered in divisions: Communications 4,4%, Recreation and culture 4,0%, Other goods and services 2,8%, Education 2,5%, Furniture, household equipment and routine maintenance of the house 2,2%, Alcoholic beverages and tobacco 1,1% and Health 0,4%.

As we said only the division of Clothing and footwear has registered the decrease of prices of 2,1%.

3.4. Graphical analyses of 2008 inflation in Bosnia and Herzegovina

The graphical analyse of the 2008 inflation in Bosnia and Herzegovina has also been presented in this Bulletin. The graphs present monthly overall indices with and without temporary reductions of prices, as well as the share of each COICOP division in annual price change as the average of the year 2008 in respect to average of the years 2005 as well as 2007.

For overall indices we presented the indicators of the indices level in respect to the December 2007 and to the same month of the 2007. At the level of COICOP divisions we have presented their shares in the average annual inflation.

Analyzed indices represent very important and wide presentation of the key inflation flow in Bosnia and Herzegovina, based on unique methodological approaches for different areas and harmonized with the main principles of the European Regulative.

3.3. Prosječna godišnja inflacija u 2008. godini u odnosu na 2007. godinu

Ukoliko posmatramo prosječno kretanje indeksa potrošačkih cijena u Bosni i Hercegovini u 2008. godini u odnosu na prosjek iz 2007. godine, možemo zaključiti da je u tom razdoblju inflacija u prosjeku iznosila 7,4%.

Ako posmatramo prosječne stope inflacije u 2008. godini u odnosu na prosjek iz 2007. godine prema namjeni potrošnje, primetit ćemo da je u svim odjeljcima osim Odjeće i obuće zabilježen rast cijena.

Najveći rast cijena u 2008. godini u odnosu na 2007. godinu bio je u odjeljcima: Hrana i bezalkoholni napici za 12,1%, Prijevoz za 11,2%, Stanovanje, vodoopskrba, električna energija, plin i drugi energeti za 8,5% i Restorani i hoteli za 7,1%.

Nešto manji rast cijena zabilježen je u odjeljcima: Veze za 4,4%, Rekreacija i kultura za 4,0%, Ostala dobra i usluge za 2,8%, Obrazovanje za 2,5%, Namještaj, kućanski uređaji i redovito održavanje doma za 2,2%, Alkoholni napici i duhan za 1,1% i Zdravstvo 0,4%.

Jedino je u odjeljku Odjeća i obuća u 2008. godini u odnosu na 2007. godinu zabilježen pad cijena za 2,1%.

3.4. Grafička analiza inflacije u Bosni i Hercegovini u 2008. godini

U ovom biltenu prikazana je i grafička analiza inflacije u Bosni i Hercegovini u 2008. godini. Grafici prikazuju opće indekse potrošačkih cijena po mjesecima, sa i bez umanjenja cijena, kao i učešće pojedinih odjeljaka po COICOP klasifikaciji u godišnjoj promjeni cijena, izračunatih kao prosjek 2008. godine u odnosu na prosjek 2005. odnosno 2007. godine.

Za opće indekse prezentirani su pokazatelji razine indeksa u odnosu na prosinac 2007. I u odnosu na isti mjesec 2007. godine. Na razini COICOP odjeljaka prikazana su njihova učešća u prosječnoj godišnjoj inflaciji.

Analizirani indeksi predstavljaju važnu i široku predstavku ključnog inflatornog kretanja u Bosni i Hercegovini, temeljenu na jedinstvenim metodološkim pristupima za različita područja i usklađenu sa glavnim principima određenim europskom regulativom.

3.5. Consumer Price Index in Bosnia and Herzegovina for the year 2009

This Annual Bulletin represents a compilation of the monthly data on Consumer Price Indices from the January to December of 2009. The entire dataset presented in statistical tables, graphs and their analyses for the level of Bosnia and Herzegovina is devided according to divisions of the COICOP classification.

For each month of the year 2009 the consumer price indices are presented with and without temporary reduction of prices. The rates of change compared to the previous month and to the same month of the previous year were also presented. This Bulletin also contains the average annual indices compared to the base year 2005 and compared to the previous year.

The graphs represent overall indices by months with and without temporary reductions of prices, and the share of each COICOP division in annual price change calculated as the average of the year 2009 in respect to the average of the years 2005 as well as 2008.

3.6. Average annual inflation in the year 2009 in respect to the year 2005

If we consider the average 2009 CPI flow at the territory of Bosnia and Herzegovina in respect to the situation evidenced four years ago, meaning in respect to the average of 2005 CPI, we can conclude that the inflation in that particular period of time was 15,3%. Although we have to always keep in mind that the part of it was a result of VAT introduced in January of 2006 and the part of it was a result of a large increase in the overall price level in the year 2008.

If we compare a average inflation rates in 2009 and 2005 as the base year it is noticeable that all divisions except the division of Clothing and Footwear have registered price increase.

The largest increase of prices was registered in the divisions: Housing, water, electricity, gas and other fuels 30,5%, Food and Non-alcoholic beverages 23,7%, Communications 23,1%, Restaurants and hotels 20,0%, Recreation and culture 14,1%, Health 11,5% and Alcoholic beverages and tobacco 11,4%.

A slightly lower growth was registered in divisions: Education 8,8%, Other goods and services 7,2%, Transport 5,6% and Furniture, household equipment and routine maintenance of the house 4,6%.

As we said only the division Clothing and Footwear has registered an average decrease of prices of 9,6%.

3.5. Indeks potrošačkih cijena u Bosni i Hercegovini u 2009. godini

Godišnji bilten Agencije za statistiku BiH sadržava i analizu mjesecnih podataka o indeksima potrošačkih cijena od siječnja do prosinca 2009. godine. Svi podaci prikazani u statističkim tablicama i grafovima, te njihova analiza sačinjeni su prema COICOP klasifikaciji po odjeljcima i skupinama za razinu Bosne i Hercegovine.

Za svaki mjesec 2009. godine u biltenu su prikazani indeksi potrošačkih cijena sa i bez privremenih umanjenja cijena, te stope promjena u odnosu na prethodni mjesec i stope promjena u odnosu na isti mjesec prethodne godine. Također su prikazani i prosječni godišnji indeksi u odnosu na baznu 2005. i u odnosu na prethodnu godinu.

Na grafovima su prikazani opći indeksi po mjesecima sa i bez privremenih umanjenja cijena, te učešće pojedinih COICOP odjeljaka i skupina u godišnjoj promjeni cijena, izračunato kao prosjek 2009. godine u odnosu na prosjek 2005. odnosno 2008. godine.

3.6. Prosječna godišnja inflacija u 2009. godini u odnosu na 2005. godinu

Ukoliko posmatramo prosječno kretanje indeksa potrošačkih cijena u Bosni i Hercegovini u 2009. godini u odnosu na situaciju od prije četiri godine, dakle u odnosu na prosjek 2005. godine, možemo zaključiti da je u tom razdoblju inflacija u prosjeku iznosila 15,3%. Kada poredimo ova dva razdoblja ne smijemo zaboraviti da u 2005. godini nismo imali porez na dodatnu vrijednost (PDV), tako da je dio navedenog rasta cijena uzrokovan uvođenjem PDV-a u siječnju 2006. godine, a dio velikim porastom opće razine cijena u 2008. godini.

Ako posmatramo prosječne stope inflacije u 2009. godini u odnosu na prosjek iz 2005. godine prema namjeni potrošnje, primjetit ćemo da je u svim odjeljcima osim Odjeće i obuće zabilježen rast cijena.

Posmatrano po COICOP odjeljcima, najveći rast bio je u odjelicima: Stanovanje, vodoopskrba, električna energija, plin i drugi energeti za 30,5%, Hrana i bezalkoholni napici za 23,7%, Veze za 23,1%, Restorani i hoteli za 20,0%, Rekreacija i kultura za 14,1%, Zdravstvo za 11,5% i Alkoholni napici i duhan 11,4%.

Manji rast cijena zabilježen je u odjelicima: Obrazovanje za 8,8%, Ostala dobra i usluge 7,2%, Prijevoz 5,6% i Namještaj, kućanski uređaji i redovito održavanje doma za 4,6%.

Jedino je u odjeljku Odjeća i obuća u prosjeku zabilježen pad cijena za 9,6%.

3.7. Average annual deflation in the year 2009 in respect to the year 2008

If we consider the average 2009 CPI flow at the territory of Bosnia and Herzegovina in respect to average of 2008 CPI, we can conclude that the inflation in that particular period of time was 0,4%.

If we compare average inflation rates in 2009 and 2008 as the base year it is noticeable that four out of twelve divisions have registered an average decrease of prices and the other divisions have registered an average increase of prices.

The largest price decrease was registered in the divisions: Transport 9,9%, Clothing and footwear 3,9%, Food and non-alcoholic beverages 0,9% and Education 0,2%.

The increase of prices was registered in divisions: Alcoholic beverages and tobacco 9,8%, Restaurants and hotels 4,9%, Housing, water, electricity, gas and other fuels 3,9%, Recreation and culture 3,2%, Other goods and services 2,3%, Communications 1,5%, Health 0,8% and Furniture, household equipment and routine maintenance of the house 0,7%.

3.8. Graphical analyses of 2009 inflation in Bosnia and Herzegovina

The graphical analyse of the 2009 inflation in Bosnia and Herzegovina has also been presented in this Bulletin. The graphs present monthly overall indices with and without temporary reductions of prices, as well as the share of each COICOP division in annual price change as the average of the year 2009 in respect to average of the years 2005 as well as 2008.

For overall indices we presented the indicators of the indices level in respect to the December 2008 and to the same month of the 2008. At the level of COICOP divisions we have presented their shares in the average annual inflation.

Analyzed indices represent very important and wide presentation of the key inflation flow in Bosnia and Herzegovina, based on unique methodological approaches for different areas and harmonized with the main principles of the European Regulative.

3.7. Prosječna godišnja deflacija u 2009. godini u odnosu na 2008. godinu

Ukoliko posmatramo prosječno kretanje indeksa potrošačkih cijena u Bosni i Hercegovini u 2009. godini u odnosu na prosjek iz 2008. godine, možemo zaključiti da je u tom razdoblju deflacija u prosjeku iznosila 0,4%.

Posmatrano po odjeljcima prema namjeni potrošnje, tj. prema međunarodnoj klasifikaciji COICOP, primjetit ćemo da je prosječan pad cijena zabilježen u četiri od ukupno dvanaest odjeljaka, dok su drugi odjeljci zabilježili prosječan rast cijena.

Najveći pad cijena u 2009. godini u odnosu na 2008. godinu bio je u odjeljcima: Prijevoz za 9,9%, Odjeća i obuća 3,9%, Hrana i bezalkoholni napici za 0,9% i Obrazovanje 0,2%.

Rast cijena zabilježen je u šest od ukupno dvanaest odjeljaka: Alkoholni napici i duhan za 9,8%, Restorani i hoteli za 4,9%, Stanovanje, vodoopskrba, električna energija, plin i drugi energenti za 3,9%, Rekreacija i kultura za 3,2%, Ostala dobra i usluge za 2,3%, Veze za 1,5%, Zdravstvo za 0,8% i Namještaj, kućanski uređaji i redovito održavanje doma za 0,7%.

3.8. Grafička analiza inflacije u Bosni i Hercegovini u 2009. godini

U ovom biltenu prikazana je i grafička analiza inflacije u Bosni i Hercegovini u 2009. godini. Grafici prikazuju opće indekse potrošačkih cijena po mjesecima, sa i bez umanjenja cijena, kao i učešće pojedinih odjeljaka po COICOP klasifikaciji u godišnjoj promjeni cijena, izračunati kao prosjek 2009. godine u odnosu na prosjek 2005. odnosno 2008. godine.

Za opće indekse prezentirani su pokazatelji razine indeksa, stope promjene u odnosu na prethodni mjesec i stope promjene u odnosu na isti mjesec prethodne godine. Na razini COICOP odjeljaka prikazana su njihova učešća u prosječnoj godišnjoj inflaciji.

Analizirani indeksi predstavljaju važnu i široku predstavku ključnog inflatornog kretanja u Bosni i Hercegovini, temeljenu na jedinstvenim metodološkim pristupima za različita područja i usklađenu sa glavnim principima koji su određeni europskom regulativom.

POJMOVNIK
GLOSSARY

8. GLOSSARY

Aggregate indices: indices that are calculated by weighted averages of the elementary indices and that are referred to hierarchical positions starting from the voices of products.

Aggregation (of indices): the combination of related categories, usually within a common branch of a hierarchy, to provide information at a broader level to that at which detailed observations are taken.

Average data: values that are calculated on the basis of the elementary prices collected. They are either average prices or average indices referred to a specific product. In general, for B&H CPI they are calculated as geometric mean. The average data are calculated by the Module 1 of the procedure at town level and used for the calculation of the aggregate indices at town, entity and country level.

Base period: the period of time for which data used as the base of an index number, or other ratio, have been collected.

Basket of product: the selection of products purchased by households by monetary transaction and for which prices is collected. It is selected in order to represent the prevalent consumer behaviour in terms of final monetary expenditure.

Calculated indices: the indices that are calculated on base December of the previous year as index reference period.

Chain indices: the indices that have been linked adopting a common index reference period for the calculation indices that are based on December of the previous year.

Frequency: number of collection of elementary prices during the month. For the CPI BiH were selected collection once or twice a month (bimonthly).

Hierarchy: the classification structure by which consumer price indices are classified. It presents a pyramidal structure, starting from the most detailed level to the aggregate level.

Index reference period: the period for which the index base is set to 100. B&H consumer price indices are calculated either on base December of the previous year (Calculation indices) or on base 2005 (Reference Indices) that is the common base that allows to carry on the comparison between different years.

Price reference period: the period in which base prices are valued. In general for B&H CPI this period is December of the previous year.

Products: any consumer goods or services that can be purchased, a term covering both goods and services.

8. POJMOVNIK

Agregatni indeksi: indeksi koji su izračunati kao ponderisani prosjeci elementarnih stavki, a odnose se na hijerarhijske pozicije počinjući od proizvoda.

Agregati (indeksa): kombinacija povezanih kategorija, obično unutar zajedničke grane hijerarhije, koja pruža informacije na široj razini nego što je ona na kojoj su izvršena posmatranja.

Bazno razdoblje: vremenski razdoblje čiji se prikupljeni podaci koriste kao baza za indeksne brojeve ili druge prosjeke.

Hijerarhija: struktura po kojoj su klasificirani indeksi potrošačkih cijena i koja je predstavljena piramidalnom strukturom, počinjući od najdetaljnije do agregatne razine.

Izračunati indeksi: indeksi koji se izračunavaju sa bazom prosinac prethodne godine kao referentnim indeksnim razdobljem.

Košarica proizvoda: izbor proizvoda koja kućanstva kupuju novčanim transakcijama. Odabire se s ciljem predstavljanja najčešćeg ponašanja potrošača u smislu njihove finalne potrošnje.

Lančani indeksi: indeksi povezani usvajanjem zajedničkog referentnog indeksnog razdoblja za izračunavanje indeksa s bazom prosinac prethodne godine.

Mjesto prikupljanja: osnovne jedinice (prodajna mjesta) u kojima se prikupljaju cijene.

Ponderi: koeficijenti kojima se izražava važnost proizvoda u košarici i po kojima se izračunavaju agregatni indeksi počevši od elementarnih indeksa kao ponderisanih prosjeka. Bazirani su na podacima povezanim s finalnom potrošnjom kućanstava ili na podacima o procijenjenom broju stanovnika prema rezultatima HBS ankete provedene 2004. godine.

Proizvod: bilo koji proizvod ili usluga za ličnu potrošnju koji se mogu kupiti; skupni naziv za proizvode i usluge.

Prosječni podaci: vrijednosti izračunate na bazi prikupljenih elementarnih cijena. Radi se o prosječnim cijenama ili prosječnim indeksima koji se odnose na specifični proizvod. Općenito, za CPI u BiH oni su izračunati kao geometrijske sredine. Prosječni podaci se koriste za izračunavanje agregatnih indeksa na razini grada, entiteta ili države.

Referentni indeksi: indeksi izračunati na bazi 2005. Dobijeni su ulančavanjem izračunatih baznih indeksa.

Referentni indeksni period: period za koji je indeksna baza 100. CPI u BiH je izračunat s bazom prosinac prethodne godine (Izračunati indeksi) ili s bazom 2005 (Referentni indeksi) koja je zajednička baza koja omogućuje poređenje između različitih godina.

Rate of change: the rate of change in a specified time reference period compared to the values at the beginning of the period or at a specified earlier time reference. In general for the consumer price indices the most important rates of change are those that represent the comparison between the current month and the previous one or the same month of the previous year (they represent monthly and annual inflation in reference period).

Reference indices: the indices that are calculated on base 2005. They are obtained by chaining the calculation base indices.

Representative position: lowest level of product aggregation, i.e. item in an outlet in a geographic location with an attributed weight. The items at the lower levels of aggregation do not have weights attributed due to the lack of relevant data.

Weight reference period: the period from which the expenditures for weights are obtained.

Weights: coefficients that express the relevance of a product in the basket and by which the aggregate indices are calculated starting from the elementary indices by weighted averages. The weights are based on the data concerning the Household Final Monetary Consumption Expenditure or on the data on population that have been estimated on the base of the HBS survey carried out in 2004.

Referentno razdoblje cijena: razdoblje u kojem je vrijednovana cijena. Općenito za CPI u BiH ovaj period je prosinac prethodne godine.

Referentno razdoblje pondera: razdoblje iz kojeg su uzeti troškovi sa ciljem izračunavanja pondera.

Reprezentativna stavka: proizvod na najnižoj razini agregacije, odnosno proizvod u prodajnom mjestu na jednom geografskom lokalitetu za koji se može procijeniti ponder. Proizvodima iz nižih razina agregacije nije moguće dodijeliti ponder, jer za to ne postoje reprezentativni podaci.

Stopa promjene: stopa promjene razine cijena u specifičnom referentnom razdoblju u poređenju s vrijednošću s početka tog razdoblja ili iz konkretno definiranog ranijeg razdoblja. Općenito za redovito prečenje CPI su najznačajnije stope promjena koje predstavljaju poređenje tekućeg mjeseca u odnosu na prethodni mjesec i u odnosu na isti mjesec prethodne godine (one predstavljaju mjesечnu i godišnju inflaciju u posmatranom mjesecu).

Učestalost prikupljanja: broj prikupljanja elementarnih cijena u toku mjeseca. Za CPI u BiH odabrana su prikupljanja jednom ili dva puta mjesечно.
