Official currency	Convertible mark (KM)
Climate	Moderate continental and mediterranean

Administrative structure of Bosnia and Herzegovina (BiH):

The Federation of Bosnia and Herzegovina (FBiH), Republika Srpska (RS) i Brčko District BiH (BD BiH).

The capital of Bosnia and Herzegovina is Sarajevo.

The Federation of Bosnia and Herzegovina is administratively divided into 10 cantons, and cantons are subdivided into municipalities and cities. Republika Srpska is administratively divided into municipalities and cities. Brčko District of BiH is a separate administrative unit.

In BiH there are three National parks and two Nature parks. National parks are Sutjeska, Kozara and Una. Nature parks are Hutovo Blato and Blidinje.

In the 2013 Census, the concept of “usual residents” was applied for the first time in order to determine the total number of population. Under this concept, a person shall be considered as a resident of the place at which s/he alone (in the case of a one-person household) or with members of her/his household spends most of time, that is, daily rest, irrespective of where the person's place of residence is registered. Therefore, the total population of a certain place includes persons who lived in that place for a continuous period of at least one year prior to the Census Critical Moment, and persons who at that particular moment lived there less than 12 months but intend to stay at that place for at least one year.

For the census conducted earlier in our country, before 1991, the official results referred to the so-called resident population, i.e. population who reside in the territory of Bosnia and Herzegovina, regardless of whether at the critical moment of the census, the persons were present at the place of residence or were temporary absent, in the country or abroad, due to some other reasons.

In the Population Census in 1961 and 1971 as a resident population persons were registered at the place where they worked at the Census moment, while in the 1981 and 1991 Census these persons were enumerated as a resident population in the places where their families lived.

2020	27 255	14 166	44 427	23 040	-17 172

Natural change is the difference (surplus or deficit) between the number of livebirths and the number of deaths in a given period.

Births and deaths: according to the legal regulations on registration, events of births and deaths are obligatory registered in population registers.

A liveborn child is every child that breathes at birth or shows any other signs of life (beating of the heart, pulsation of the umbilical cord, definite movements of voluntary muscles).

Total fertility rate in BiH 2011-2020

The total fertility rate (TFR) is the number of children that would be born alive to a woman during her childbearing years, if she were to pass through all her childbearing years conforming to the age-specific fertility rates of a given year.

Stillborn is considered a child delivered, or extracted from its mother displaying no signs of life, that is if it did not breath or display any other signs of life, and was carried longer than 22 weeks (approximately 6 months) with more than 500 g birthweight.

METHODOLOGY

Pre-school education is an activity that includes education, care and protection of children aged six months to the beginning of primary school and it is practiced in public and private pre-school institutions.

In the education statistics, **the school** is considered as a group of pupils/students organized into one school unit who follow the teaching of a particular type and level, according to a unique plan and at a particular location.

The class is a group of pupils/students who are trained during a school year by one teacher or more teachers successively, at the same time in the same room.

Grade is a level of education in which pupils/students acquire a certain amount of knowledge according to the curriculum of a particular type of school in a certain interval of time, but the longest one in a school year.

Higher education institutions are colleges and universities.

College refers to a higher education institution, that implements at least one study program in one area of education.

University refers to a higher education institution that implements at least five different study programs from at least three fields of education.

Enrolled student is any person enrolled in a higher education institution.

Graduate student is a person who receives a bachelor's degree from a college, faculty or art academy.

Graduates in higher education in BiH
2004-2020

NUMBER OF PATENT APPLICATIONS IN NATIONAL PROCEDURE, 2010-2020

The number of patent applications submitted to the Institute for Intellectual Property of BiH in 2020 amounted 55, out of which 49 were filed by resident and 6 by non-resident applicants.

RESEARCH AND DEVELOPMENT EXPENDITURE AS A PROPORTION OF GDP (%)

Investments in research and development are mainly incurred higher education, ca. 55,7% of total domestic expenditure in 2019.

NUMBER OF PATENTS GRANTED IN NATIONAL PROCEDURE, 2010-2020

In 2020, 11 patents were granted in the national procedure, which of one was a domestic applicant and 10 non-resident applicants.

Working age population: includes all persons of 15 years of age or older, divided in two basic categories: labour force (economically active) and economically inactive population.

The Labour Force or the active population is composed of the employed and the unemployed persons.

The inactive are all persons of 15 years of age or older who were not employed during the reference week and who during four weeks (the reference and the three preceding weeks) did not look for employment, as well as persons who were not ready to start work in following weeks should they be offered employment.

Methodological principles behind the Labour Force Survey are based on the recommendations and definitions of the International Labour Organization (ILO) and in accordance with the recommendations and regulations of the European Statistical Office (Eurostat) which enables comparability of survey data to other countries.

Since January 2020, Labour Force Survey is implemented annually in Bosnia and Herzegovina with quarterly data release, which has interrupted the data series published in the previous years.

Aiming at harmonization with the EU regulations and EUROSTAT requirements, since 2020, the process of weight calibration is carried out according to population estimates by five-year age groups and gender.

Employed by sections of economic activity classification in BiH, 2020 (%)¹⁾

¹⁾ groups of activity's section (NACE Rev 2): agriculture (A), industry (B,C,D,E,F,G,H,I,J,K,L,M,N), services (O,P,Q,R,S,T,U,V)

Working age population by highest completed education in BiH, 2020 (%)

Average usual working hours per week at the main job by sections of economic activity and gender in BiH, 2020 (%)¹⁾

¹⁾ groups of activity's section (NACE Rev 2): agriculture (A), industry (B,C,D,E,F,G,H,I,J,K,L,M,N), services (O,P,Q,R,S,T,U,V)

The employed are the persons who, during the reference week (Monday – Sunday):

- performed any type of job for a salary/profit (in cash, goods or in kind) for at least one hour,
- did not work in the reference week (due to sickness, vacation, national or religious holidays, education, training, maternity leave, reduced production and other temporary incapacity for work) but had a job to return to.

The unemployed are the persons who:

- did not work during the reference week (they are not in paid employment nor in self-employment, nor did they perform any type of paid job),
- were actively looking for employment during four previous weeks,
- were available to start working within two weeks period in the reference week.

Persons who have found a job and who will start working in the coming period are also included in the unemployed.

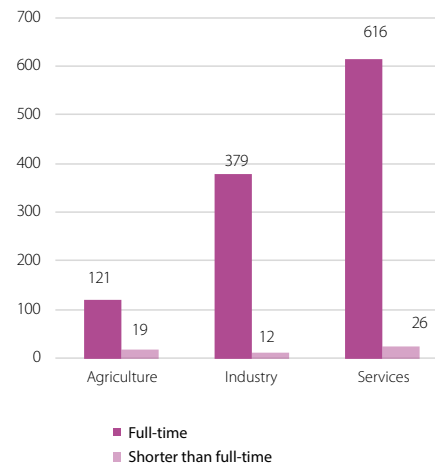

Employed persons by employment status in BiH, 2020 (%)

The employed segment is composed of:

- a) **employed** (employed persons who receive salary or fees for their work);
- b) **the self-employed** (employers who manage a business subject and employ one or more employees, and persons who work for their own account and do not have employees);
- c) **unpaid family members** (working in family business).

Employees on full-time and shorter than full time in BiH by sections of economic activity, 2020 (in thousands)

¹ groups of activity's section (NACE Rev 2): agriculture (A), industry (B,C,D,E,F,G,H,I,J,K,L,M,N), services (O,P,Q,R,S,T,U,V)

Activity rate by sex in BiH, 2020 (%)

Activity rate is calculated as the ratio of labour force and the working age population.

The employment rate is calculated as the ratio of employed persons and the workingage population.

The unemployment rate is calculated as the ratio of unemployed persons and the labour force.

GROSS VALUE ADDED AT BASIC PRICES BY SECTIONS IN BIH

Sections of activity (NACE Rev. 2)	Gross value added, thousands KM		Structure %	
	2019	2020 ¹⁾	2019	2020 ¹⁾

¹⁾ Not all activities nor the enterprises of the indicated activities are covered. Coverage is presented in the Notes on Methodology of Thematic bulletin Structural Business Statistics 2019 (www.bhas.gov.ba)

Structural business statistics aim to collect, process and publish statistical data on the structure, competitiveness and characteristics of business entities and their results at different levels of activity.

Number of enterprises covers all legal and natural persons engaged in market production and which are registered in the statistical business register of the population that is the subject of observation.

Number of persons employed is defined as the total number of persons who work in the observation unit (including owners who work, partners working regularly in the unit and unpaid family members working regularly in the unit), as well as persons who work outside the unit to which they belong and which pays them (e.g. sales representatives, delivery personnel).

Turnover covers revenues calculated from sales of products, goods and services provided by reporting unit to third parties during the reference period.

Value added at factor cost is the gross income from operating activities after adjusting for operating subsidies and indirect taxes.

Personnel costs are the total remuneration, in cash or in kind, paid by the employer to an employee (regular and temporary employees as well as home workers) in return for work done by the employee during the reference period.

Total purchases of goods and services include the value of all goods and services purchased during the accounting period for resale or consumption in the production process, excluding capital goods the consumption of which is registered as consumption of fixed capital.

Structure of the number of persons employed in the total of covered activities

Structure of value added at factor costs in the total of covered activities

BASIC STRUCTURAL BUSINESS INDICATORS BY SECTION OF ACTIVITY in 2019

KD BiH 2010 (EU NACE Rev. 2) Sections of activity		Turnover per person employed (KM)
TOTAL OF COVERED ACTIVITIES		126 804
B	Minning and quarrying	54 199
C	Manufacturing	102 677
D	Electricity, gas, steam and air conditioning supply	197 320
E	Water supply; sewerage, waste management and remediation activities	56 907
F	Construction	105 009
G	Wholesale and retail trade; repair of motor vehicles and motor-cycles	237 122

¹⁾ Not all activities nor the enterprises of the indicated activities are covered. Coverage is presented in the Notes on Methodology of Thematic bulletin Structural Business Statistics 2019 (www.bhas.gov.ba).

INDICATORS are calculated on the basis of the calculated values of the variables.

Turnover per person employed is obtained by dividing the total turnover with a total number of persons employed. This indicator expresses the ability of selling of business unit of specific activity.

Value added per person employed is obtained by dividing the total value added with a total number of persons employed. This indicator is used to measure productivity.

Value added at factor cost in production is obtained by dividing the total added value with a total value of production.

Average personnel costs per employee is obtained by dividing the total personnel costs with number of employees. This indicator shows average costs of employees in certain activity.

Gross operating rate represents share of gross operating surplus in turnover.

Turnover per person employed by activity section, KM

Value added per person employed by activity section, KM

Comparative CPI by groups in 2020

Consumer Price Index allows to measure the consumer price inflation that is the rate of change of the consumer prices of goods and services purchased by the households through monetary transactions in the economic territory of Bosnia and Herzegovina for products that directly satisfy consumers needs.

Consumer Price Index represents a measure of inflation in state. It serves as a guarantee the value of recurrent payments in escalator clauses for contractual relationships, it enables a comparison of inflation in country with inflation in other countries as well as a comparison of price movements within particular country and regions, it can also serve as a base for deflating national accounts data and other purposes.

CPI is calculated on the basis of the representative list of products that consists of 616 items in the year 2020. Each month over 21 000 prices are being collected in accordance with defined sample of outlets on 12 geographical locations (5 towns in Federation of B&H, 6 towns in Republika Srpska and in District Brcko).

In comparison to the year 2019, average price level in the year 2020 was lower by 1,1% due to the average price decrease in divisions of Clothing and footwear by 10,0%, Housing, water supply, electricity, gas and other fuels by 0,4%, Furniture, household appliances and regular maintenance by 1,1%, Transport by 8,6%. Highest increase of prices was registered in division of Alcoholic beverages and tobacco by 4,5%.

INDUSTRIAL PRODUCER PRICE INDICES IN BIH, 2020 (Ø2015=100)

	ϕ2020/ ϕ2015
TOTAL INDEX	103,3
Energy	108,8
Intermediate goods	102,4
Capital Goods	102,7
Durable consumer goods	99,4
Non-durable consumer goods	100,3
B. Mining and quarrying	104,8
C. Manufacturing	103,0
D. Electricity, gas and hot water supply	105,2

Industrial producer price indices in BiH, 2020 (Ø2015=100)

Producer Price Index is a short-term statistical indicator that represents the measurement of change of prices of industrial products produced and sold by enterprises. This statistical indicator serves as the measure of inflation. It can also serve as the indicator of economical performances, escalator in long-term contracts, deflator for output values, intermediate consumption, and capital consumption in National Accounts, and as a important tool in creating monetary and fiscal politics. PPI in Bosnia and Herzegovina is calculated based on the representative list of products and it's producers making a sample of cca. 570 producers and 918 products. Each month 4255 prices are collected directly form producers through th unique questionnaire. Since January of 2017 indices are published based on the average of 2015.

COMPARATIVE PRICE LEVELS FOR SELECTED GROUPS OF CONSUMPTION IN THE WESTERN BALKANS COUNTRIES AND THE REGION, EUROSTAT-OECD PURCHASING POWER PARITIES PROGRAMME, 2020 (EU=100)

	Household final consumption	Food and non-alcoholic beverages	Alcoholic beverages and tobacco	Clothing	Consumer electronics	Personal transport equipment	Hotels and restaurants
Austria	113	124	100	103	96	104	111
Italy	103	109	101	100	94	102	103

N. Macedonia	50	61	48	76	97	90	45

COMPARATIVE PRICE LEVEL FOR THE WESTERN BALKANS COUNTRIES AND THE REGION

Total expenditure for the final household consumption, 2020 (EU=100)

The comparative price level is expressed in the price level indices (PLIs). Price level Indices provide a comparison of countries' price levels with respect to the EU average: if the PLI is higher than 100, the country concerned is relatively expensive compared to the EU average, and vice versa.

Production on own account (0) is the production accomplished by the observation unit (enterprise/local unit) on own account by utilizing the purchased or its own raw materials. The observation unit is the owner of a finished product and sells its own products in the market.

Production under contract (1) is contractual agreement between a principal and a contractor. It represents production that is done when a contracted business entity, from raw materials owned by the principal, produces or processes a product defined by the Nomenclature of Industrial Products BiH 2010.

Sale value and value of provision is total value of products produced in own (regular) production (0) or contracted (1), and which were sold (invoiced) in the reporting year.

TOTAL PRODUCTION (0+1) Value of sale and value of provision by regions and year

PRODUCTION UNDER CONTRACT (1) Value of provision by region and year

PRODUCTION ON OWN ACCOUNT (0) Value of sale, by region and year

Other services turnover in 2020, structure in %

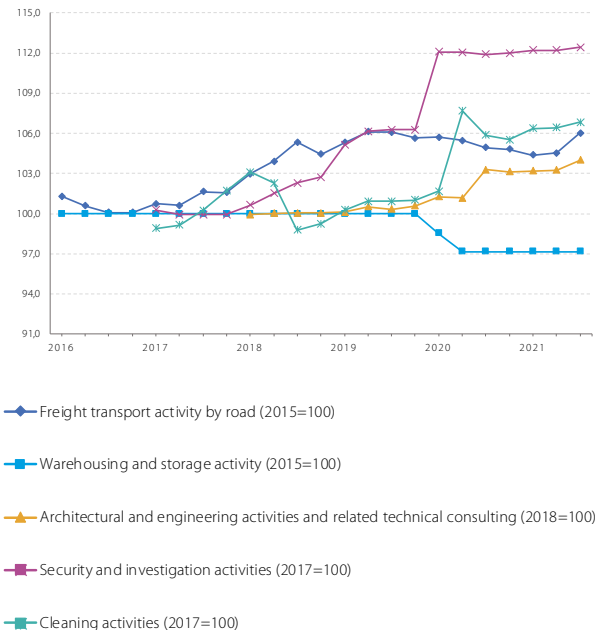

Turnover is the total invoiced amount that a business entity calculates for goods sold or services provided during the reference period to third parties and corresponds to their market value. It also includes the costs connected to sale/service provided even though those amounts are shown separately on the invoices. Value added tax (VAT) is excluded from the turnover. Index of other services turnover is shown in nominal values and calculated in relation to base (2015) year which is applied in index calculation since 2018. Turnover index is expressed in current prices (unadjusted for price change).

Services producer price index represents the measurement of the average movements of prices valued at basic prices received by domestic service producers. Price index for the specific service industry represents the average price development in the service industry concerned. Services producer price index for selected service industries is calculated on the basis of representative prices collected by regular statistical surveys. Services producer price index is primarily used as deflator for calculations of national accounts. Also it is used for describing short-term inflationary pressures on various sectors of the economy and as an index clause in agreements. All indices are presented in a gross, unadjusted form, they are not adjusted for seasonal influences and calendar days. Indices are published on regular quarterly basis.

Annual Growth Rates in Retail Trade, in current prices

Turnover of retail trade includes the value of all goods sold to individuals for personal use or use in household in the observed period. The turnover of consumables includes turnover generated by business subjects registered in the activities 47.11 and 47.2 (mainly food, beverages and tobacco products). The turnover of non-food products includes retail trade of various goods generated by business subjects registered in the activities 47.19, 47.4-47.9.

Value index of retail trade is expressed in **current prices** (unadjusted for price change). For users of statistical data it is very important to monitor the dynamics of the occurrence over time and for this purpose, we use the real index of retail trade. Volume index is expressed in **constant prices**, and is calculated by deflating retail trade turnover by adjusted consumer price index.

Producer Price Index in Construction is defined as an output price index for the type of construction works performed by construction enterprises. The price includes invoiced unit value of the built-in materials, labour costs, and the margin of contractors for each type of construction work by appropriate measurement unit, expressed in BAM (excluding VAT). Producer Price Indices for residential buildings in BiH are calculated by using the Standard Components Method (SCM). Entrepreneurs are not included in the survey.

¹⁾ For 2009, BH Telecom has provided only data for mobile network prepaid subscribers.

Telecommunication services include the telecommunication traffic realized in fixed and mobile telephone networks.

The domestic traffic in fixed and mobile network includes the total traffic realized in the own fixed and mobile network, the traffic directed to other fixed and mobile networks.

The international traffic includes the total traffic realized in the fixed and mobile network that starts within and ends outside Bosnia and Herzegovina.

A fixed network is a telecommunications network in which all elements are connected by using wires.

Mobile network is a telecommunications network in which some elements are not connected by using wires. In that way, a connection is possible even when users are physically moving.

Yield of fruit and grapes is shown as granary yield of standard humidity after deducting all losses during the harvest and transportation.

Trees and vines of bearing age are those trees and vines capable of bearing fruit under standard conditions, regardless of whether or not they bore fruit during reporting year.

Yield per tree or per vine is computed for the bearing trees or vines.

Utilised agricultural area is total area taken up by arable land, permanent grassland (meadows and pastures), permanent crops and kitchen gardens, used by the holding regardless of the type of tenure or whether it is used as common land.

Harvested area is the part of the cropped area that is harvested. It can therefore be equal to or less than the cropped area.

Harvested production is total production, including on-holding losses and wastage, quantities consumed directly on the farm and marketed quantities, indicated in units of basic product weight.

IMPORT AND EXPORT OF LOGS IN AND TO BIH, 2020

1000 m ³	Conifers	Broad leaved trees
Import	136,1	26,1
Export	32,2	18,1

Conifers: species from systematic class of naked-seed plants (*Gymnospermae*) mostly from Pinaceae tree family. Here belong commercial domestic or foreign tree species from genera *Pinus* (pine), *Picea* (spruce), *Abies* (fir), *Larix* (larch), *Pseudotsuga* (Douglas fir) etc.

Broad-leaved trees: Commercial domestic and foreign tree species from systematic class of covered-seed plants (*Angiospermae*) and genera *Quercus* (oak), *Fagus* (beech), noble broadleaf hardwood - genera *Fraxinus* (ash), *Acer* (maple), *Ulmus* (elm), *Prunus avium* (wild cherry tree) and other hardwood and softwood broadleaves - genera *Populus* (poplar), *Alnus* (alder), *Carpinus* (hornbeamtree), *Tilia* (lime) etc .

Logs: Forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Production and sales of forest assortments in BiH, 2020

m³

Technical roundwood: Forestry wood products with favourable physical and mechanical properties whose natural shape, dimensions and properties are used for manufacture of wood products like: pit props, utility poles, construction scaffolding pillars, masts, wooden piles etc and small technical wood like hop or vineyards poles, rods, wooden stakes, wooden sticks, arms, wooden bands etc.

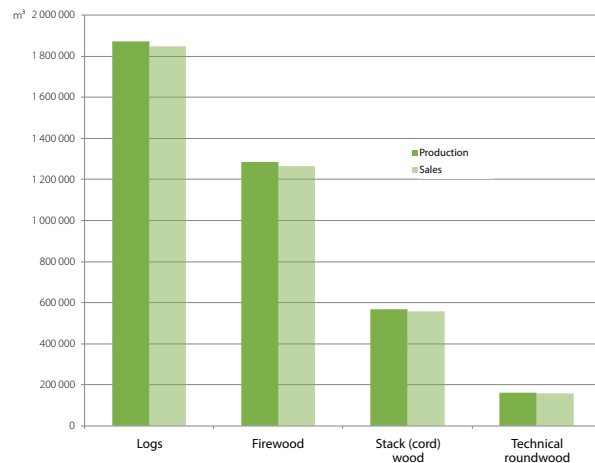

Stack(cord) wood: Wood of bad technical quality , round or split, which is used for chemical processing of pulp, wooden wool, tannin etc.

Industrial wood: includes all forest wooden assortments for mechanical and chemical processing including technical wood.

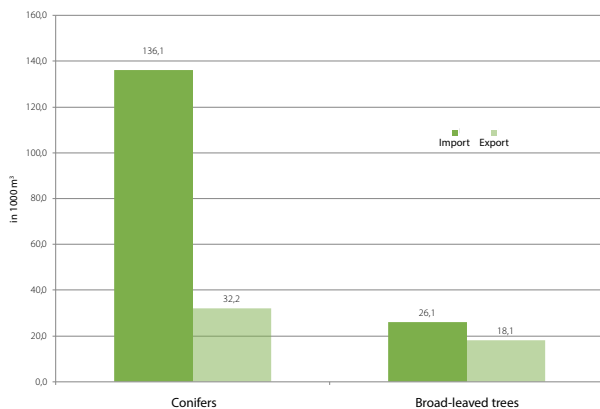

Firewood: Wood used for heating and charcoal manufacture.

Production and sales of forest assortments in BiH, 2020

Average length of stay (nights) - Domestic	2,0	2,0	2,1	2,2	2,5
Average length of stay (nights) - Foreign	2,1	2,1	2,1	2,0	2,5

Arrivals represent the total number of persons (tourists) who have checked in and spent the night at an accommodation facility.

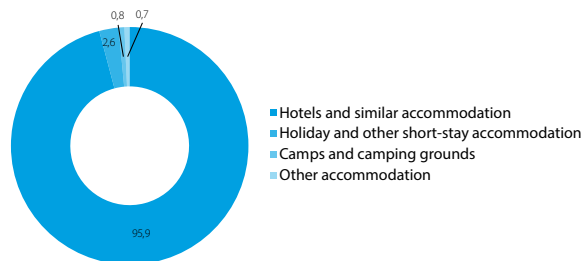

Nights include all registered tourists nights in accommodation facilities.

The average length of stay is the ratio of the total number of nights and the number of arrivals in BiH.

Structure of domestic tourist nights in 2020, in %

Structure of foreign tourist nights in 2020, in %

Number of foreign tourist nights in BiH by the country of residence 2020

Available accommodation capacities on December 31st

Accommodation capacities are displayed as number of rooms, apartments, camping sites and number of permanent beds.

Permanent beds are those that are regularly ready-made for renting to guests.

Room /apartment is a unit that consists of one room or more rooms making an indivisible rental unit in a catering facility for accommodation.
