GODINA/ YEAR XIV

SARAJEVO, 16.08.2019.

BROJ/ NUMBER 4

POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE *AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS*

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U II TROMJESEČJU 2019.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN
BOSNIA AND HERZEGOVINA IN 2nd QUARTER 2019*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u drugom tromjesečju 2019. godine manja je za 16,50% u odnosu na isti period 2018. godine. Proizvodnja sortimenata četinjača manja je za 19,81% dok je proizvodnja sortimenata listača manja za 12,67%.

Proizvodnja trupaca četinjača manja je za 18,95% dok proizvodnja trupaca listača bilježi pad od 12,54%. Pad proizvodnje se bilježi kod jamskog drva četinjača od 23,60%, kod ostalog dugog drva četinjača od 13,23%, kod prostornog drva četinjača od 21,47%, kod ostalog dugog drva listača od 51,97% i kod ogrijevnog drva listača od 12,92%. Rast proizvodnje od 13,35%, u odnosu na drugo tromjesečje 2018 godine bilježi se jedino kod prostornog drva listača. Kod proizvodnje ostalog grubo obrađenog drva, ogrijevnog drva četinjača i jamskog drva listača radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema utjecaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 2nd quarter of 2019 decreased for 16,50%, compared to the same period in 2018. Production of coniferous (softwood) assortments is, for 19,81% lower while the production of broadleaf (hardwood) assortments decreases for 12,67%.

Production of coniferous logs is 18,95% lower while production of broadleaf logs records decreasing of 12,54%. Decreased production has been recorded to coniferous mining wood of 23,60%, to other coniferous long wood of 13,23%, to coniferous cordwood of 21,47%, to other broadleaf long wood of 51,97% and to broadleaf fuelwood of 12,92%. Production increase of 13,35%, has only been recorded in broadleaf cordwood production, compared to 2nd quarter of 2018. Other roughly worked wood, coniferous fuelwood and broadleaf mining wood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

Tablica 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U II TROMJESEČJU 2019.

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 2nd QUARTER OF 2019

	Proizvodnja (Production)			Prodaja (Sale)

Ostalo grubo obrađeno drvo	37	0	-	62	95	-	Other wood, roughly worked

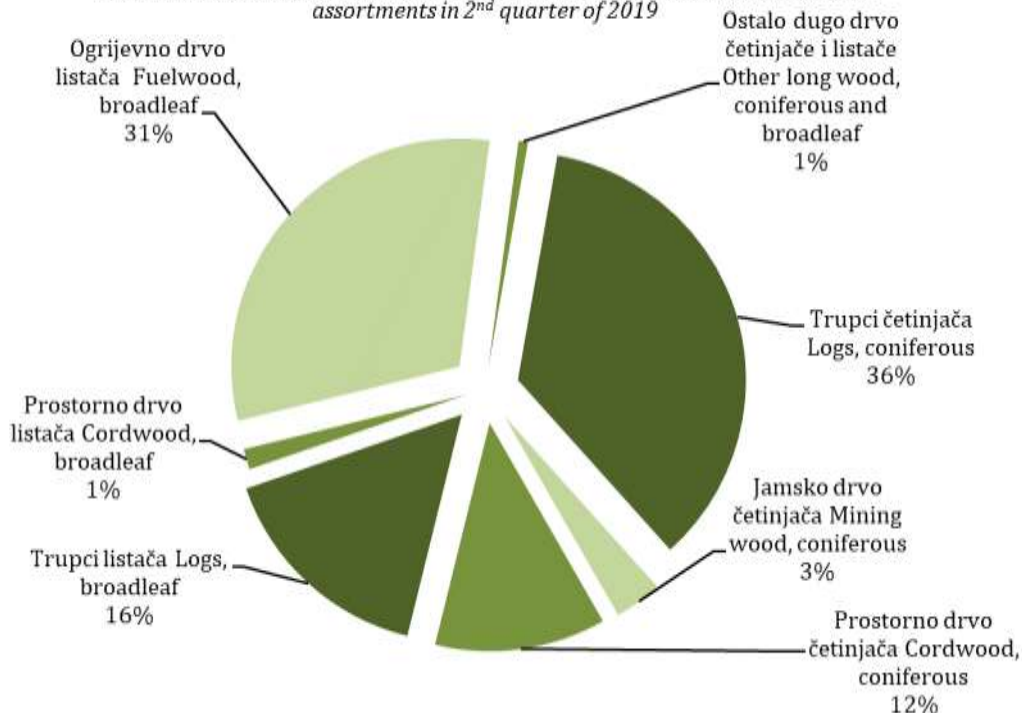

Graf 1. Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - II tromjesečje 2018 i 2019 god.

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 2nd quarter of 2018 and 2019

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u II tromjesečju 2019 god.

Percentage participation of different assortments in total production of forest assortments in 2nd quarter of 2019

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom priopćenju, urađeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinjače su vrste drveća iz klase golosjemenica (Gymnospermae), pretežito iz obitelji Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinjača ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*

Listače su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća listača kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih listača iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih listača. Drvo liščara je složenije građe u odnosu na drvo četinjača i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u kemskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
