GODINA/YEAR XV

SARAJEVO, 20.05.2021.

BROJ/NUMBER 3

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U I KVARTALU 2021.

PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 1st QUARTER OF 2021.

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u prvom kvartalu 2021. godine manja je za 12,54% u odnosu na isti period 2020. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 20,03% dok je proizvodnja sortimenata liščarskih vrsta manja za 4,09%.

Proizvodnja trupaca četinara manja je za 21,22% dok proizvodnja trupaca lišćara bilježi pad od 9,93%. Pad proizvodnje u odnosu na prvi kvartal 2020. godine bilježi se kod sljedećih šumskih sortimenata: kod jamskog drveta četinara 22,02%, kod ostalog dugog drveta četinara 5,79%, kod prostornog drveta četinara 15,61%, kod prostornog drveta lišćara 37,99% i kod ogrjevnog drveta lišćara 0,06%. Rast proizvodnje od 93,44% bilježi se samo kod ostalog dugog drveta lišćara. Kod proizvodnje ostalog grubo obrađenog drveta, ogrjevnog drveta četinara i jamskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 1st quarter of 2021 has been decreased for 12,54% compared to the same period in 2020. Production of coniferous (softwood) assortments is for 20,03% lower while the production of broadleaf (hardwood) assortments decreases for 4,09%.

Production of coniferous logs is 21,22% lower while production of broadleaf logs records decreasing by 9,93%. The production fall, compared to 1st quarter of 2020, has been recorded to following forest assortments: to coniferous mining wood by 22,02%, to coniferous other long wood by 5,79%, to coniferous cordwood by 15,61%, to broadleaf cordwood by 37,99% and to broadleaf fuelwood by 0,06%. The production rise by 93,44% has only been recorded to broadleaf other long wood. Other roughly worked wood, coniferous fuelwood and broadleaf mining wood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

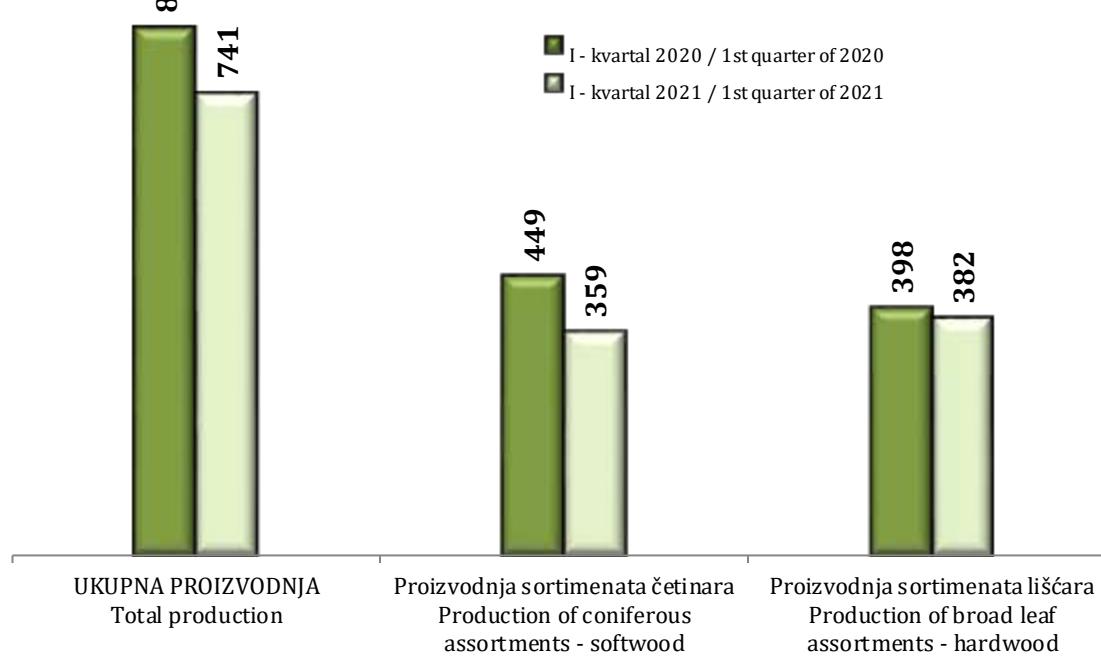

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U I KVARTALU 2021

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 1st QUARTER OF 2021

	Proizvodnja (Production)			Prodaja (Sale)			
	I kvartal 1 st quarter 2020	I kvartal 1 st quarter 2021	Indeksi Indices I-III 2021 I-III 2020	I kvartal 1 st quarter 2020	I kvartal 1 st quarter 2021	Indeksi Indices I-III 2021 I-III 2020	
	m³			m³

Ostalo grubo obrađeno drvo	0	0	-	9	0	-	Other wood, roughly worked

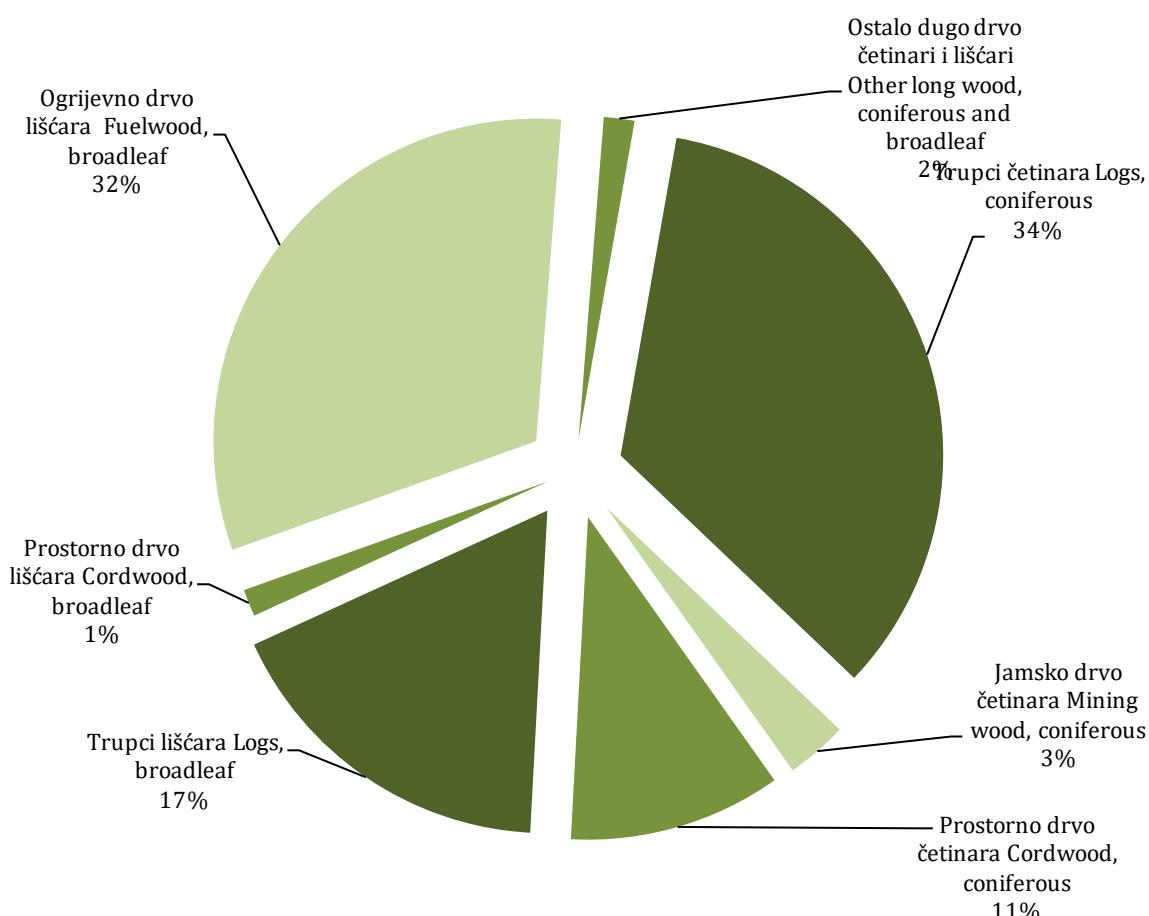

Graf.1 Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - I kvartal 2020. i 2021. god.

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 1st quarter of 2020 and 2021

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u I kvartalu 2021. god.

Percentage participation of different assortments in total production of forest assortments in 1st quarter of 2021

Metodološka objašnjena

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesечноg istraživanja.

Mjesečni izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvnu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (Abies alba), smrča (Picea abies) te bijeli (Pinus sylvestris) i crni bor (Pinus nigra). Drvo četinara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (Abies alba), Spruce (Picea abies), Scots Pine (Pinus sylvestris) and European Black Pine (Pinus nigra). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Liščari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća liščara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih liščara iz rođova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih liščara. Drvo liščara je složenije građe u odnosu na drvo četinara i u medjunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumske drvne sortimente odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvne sortimente povoljnijih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrjevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Broadleaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
