GODINA/YEAR XVI

SARAJEVO, 22.11.2021.

BROJ/NUMBER 5

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U III KVARTALU 2021.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 3rd QUARTER
OF 2021.*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u trećem kvartalu 2021. godine veća je za 4,42% u odnosu na isti period 2020. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 0,77% dok je proizvodnja sortimenata lišćarskih vrsta veća za 9,36%.

Proizvodnja trupaca četinara veća je za 4,03% dok proizvodnja trupaca lišćara bilježi rast od 15,96%. Rast proizvodnje u odnosu na treći kvartal 2020. godine bilježi se kod sljedećih šumskih sortimenata: kod ostalog dugog drveta četinara 39,01%, kod prostornog drveta lišćara 90,55% i kod ogrjevnog drveta lišćara 6,96%. Pad proizvodnje bilježi se kod jamskog drveta četinara 6,41% i kod ostalog dugog drveta lišćara od 94,31%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrjevnog drveta četinara i jamskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 3rd quarter of 2021 has been increased for 4,42% compared to the same period in 2020.

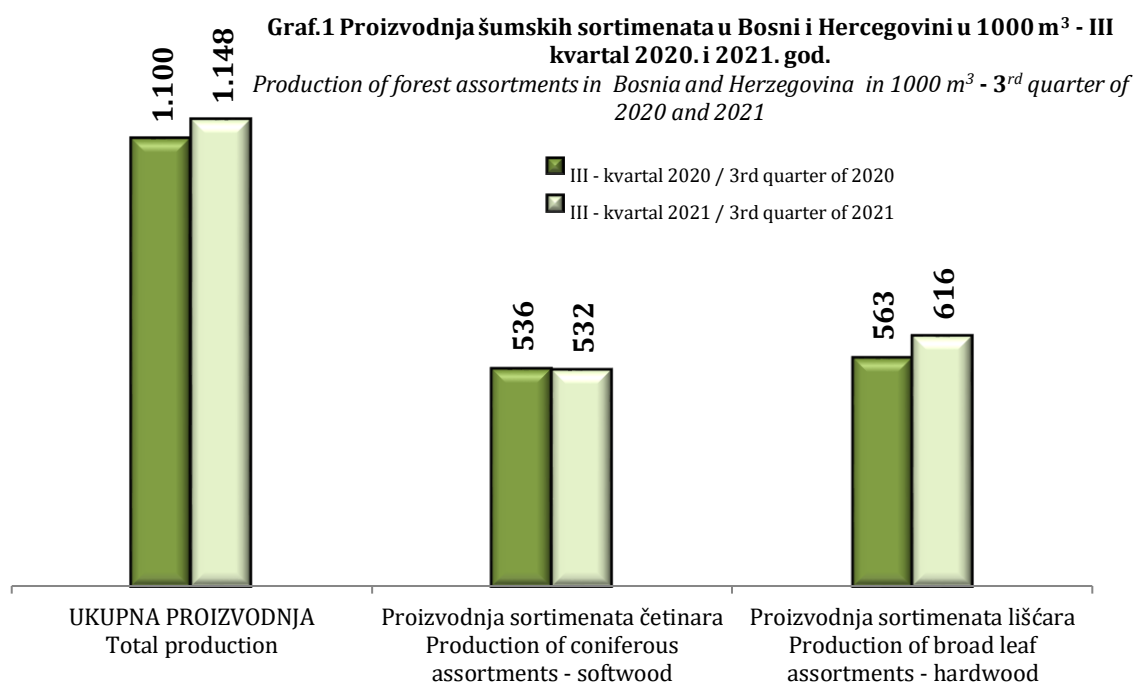

Production of coniferous (softwood) assortments is for 0,77% lower while the production of broadleaf (hardwood) assortments increases for 9,36%.

Production of coniferous logs is 4,03% higher while production of broadleaf logs records increasing by 15,96%. The production rise, compared to 3rd quarter of 2020, has been recorded to following forest assortments: to coniferous other long wood by 39,01%, to coniferous cordwood by 90,55% and to broadleaf fuelwood by 6,96%. The production fall has been recorded to coniferous mining wood by 6,41% and to broadleaf other long wood by 94,31%. Other roughly worked wood, coniferous fuelwood and broadleaf mining wood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U III KVARTALU 2021

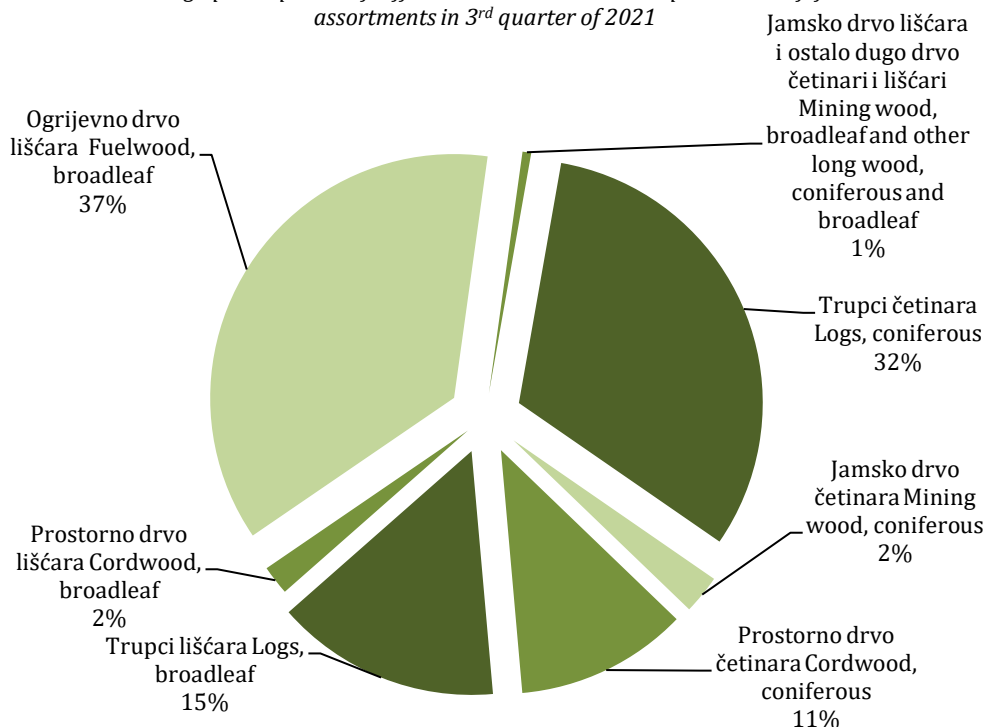

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 3rd QUARTER OF 2021

	Proizvodnja (Production)			Prodaja (Sale)

Prostorno drvo liščara	11.720	22.332	190,55	15.595	28.310	181,53	Cordwood, broadleaf
Ogrijevno drvo četinarara	522	734	-	654	1.048	-	Fuelwood, coniferous
Ogrijevno drvo liščara	394.259	421.685	106,96	422.279	452.147	107,07	Fuelwood, broadleaf
Ostalo grubo obrađeno drvo	44	0	-	59	0	-	Other wood, roughly worked

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u III kvartalu 2021. god.

Percentage participation of different assortments in total production of forest assortments in 3rd quarter of 2021

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za

izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrjevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
