PRIJEVOZ I VEZE

Metodološka objašnjenja

Podaci o cestovnom i željezničkom prometu dobiveni su obradom mjesečnih statističkih izvješća, koja su entitetski statistički zavodi prikupili od poduzeća i drugih poslovnih subjekata koji se bave prijevozom putnika i robe (tereta) u unutrašnjem i međunarodnom prijevozu.

Za željeznički prijevoz u ovom priopćenju su raspoloživi slijedeći pokazatelji: broj prevezenih putnika, tone prevezene robe (tereta) i broj putničkih i tonskih kilometara. Za cestovni prijevoz, pored naprijed navedenih pokazatelja, raspoloživi su i podaci o pređenim kilometrima vozila.

U cestovnom prijevozu nije obuhvaćen prijevoz putnika i robe koji, svojim prijevoznim sredstvima, poduzeća obavljaju za vlastite potrebe (interni transport).

Pod pojmom prijevoz u prometu, podrazumijeva se kretanje putnika ili tereta od jednog mjesta (mjesto ukrcaja) do drugog mjesta (mjesto iskrcanja) i predstavlja mjeru aktivnosti prijevoznih poduzeća.

Putnički kilometar je izračunata jedinica mjere koja uslovno predstavlja prijevoz 1 putnika na udaljenosti od 1 kilometra. Pokazatelj - putnički kilometar je kompleksan pokazatelj koji je izračunat i dostavljen od strane poduzeća – izvještajnih jedinica. Ovaj pokazatelj iskazuje agregiranu jedinicu mjere broja prevezenih putnika u odnosu na pređenu dionicu puta. Radi se o mjeri fizičkog obujma prijevoza i pokazatelj je rentabilnosti rada prijevoznog poduzeća.

Na isti način, tonski kilometar je jedinica mjere koja predstavlja prijevoz 1 tone robe na udaljenosti od 1 kilometra.

Gradski prijevoz predstavljen je podacima o pređenim kilometrima vozila i prevezenim putnicima na određenim gradskim linijama sa fiksiranim postajama i utvrđenim voznim redom. Podacima je obuhvaćen prijevoz putnika koji se obavlja gradskim autobusima, tramvajima i trolejbusima. U Republici Srpskoj ne postoje tramvajske i trolejbuske linije.

Notes on Methodology

Data on Road and Railway transport were obtained by processing monthly statistical data from surveys conducted by the Statistical Offices at the level of Entities. The reporting units for these surveys are enterprises and other business subjects engaged in domestic and international transport of passengers and goods.

For the Railway transport the following indicators can be obtained from this Release: number of transported passengers, freight (tons of transported goods), and the passenger and tons of goods/kilometre. The data on Road transport also includes the indicator of vehicle-kilometers covered.

Road transport data excludes the transport of passengers and goods undertaken by the business entities for their own needs and by their own means (Internal transport).

Under the term of transport we mean the movement of the passengers and goods from point one (place of loading) to the point two (place of unloading), which represents the measurement of the activities done by the enterprises engaged in transport.

Passenger kilometer is an indicator that represents the transport of 1 passenger at the distance of 1 kilometer. It is a complex indicator calculated and delivered by enterprises-Reporting units. It represents the relation between the aggregated number of transported passengers and the number of kilometers covered. It is a measure of physical quantity of transport and it is an indicator of enterprises work profitability.

In the same way, by ton/kilometer we mean the transport of 1 ton of goods at the distance of 1 kilometer.

Data on Urban/suburban transport is represented by the indicators of kilometers covered and passenger transported on given city lines with fixed stations and itinerary. It includes the data on passenger transport by city busses, trams and trolleys. In the Republika Srpska there are no tram and trolley lines.

Oblast telekomunikacija u priopćenju je predstavljena osnovnim pokazateljima o poštanskom i telefonskom prometu, a ulazni podaci dobiveni su na temelju mjesečnih izvješća poduzeća registriranih za tu djelatnost.

Podaci za pismonosne i paketne pošiljke u unutrašnjem i međunarodnom prometu sadrže transfere: pisama, preporučenih pošiljki, vrijednosnih pisama i paketa primljenih za otpremu i prispjelih za dostavu i isporuku, bez tranzita, a uključena je i otprema časopisa i tiska upućena pretplatnicima.

Podaci o mobilnim telefonima – razgovori odnose se na Federaciju BiH. Republički zavod za statistiku Republike Srpske još uvijek ne prikuplja podatke o mobilnoj telefoniji. Isto tako ovo priopćenje ne sadržava podatke o obavljenim telefonskim razgovorima za područje Republike Srpske zbog promjene načina obračuna trajanja razgovora od strane Telecoma Srpske, naime razgovori su ranije izražavani u impulsima a od oktobra 2005.godine se izražavaju u minutama razgovora što je onemogućilo redovito objavljivanje podataka u 2006.godinu.

The area of telecommunications is covered by basic indicators on postal and phone traffic for which the input data are based on monthly reports delivered by enterprises registered for these activities.

The data on number of letters and parcels in domestic and international transport comprise: letters, special letters, letters of value, and deliverable parcels including the delivery of subscribed magazines and newspapers, excluding the transit.

The data on mobile phone calls refers only to the territory of Federation of B&H, since the Statistical Institute of Republika Srpska still does not collect those data. Also this Release does not contain the data on dialed and received phone calls for the territory of Republika Srpska due to the fact that the Telecom Srpske has changed their calculation units (they have changed impulses into minutes of conversation), that has made a regular publication of data for 2006. impossible.
