PROIZVODNJA VOĆA I GROŽĐA U 2011. GODINI

PRODUCTION OF FRUIT AND GRAPES IN 2011

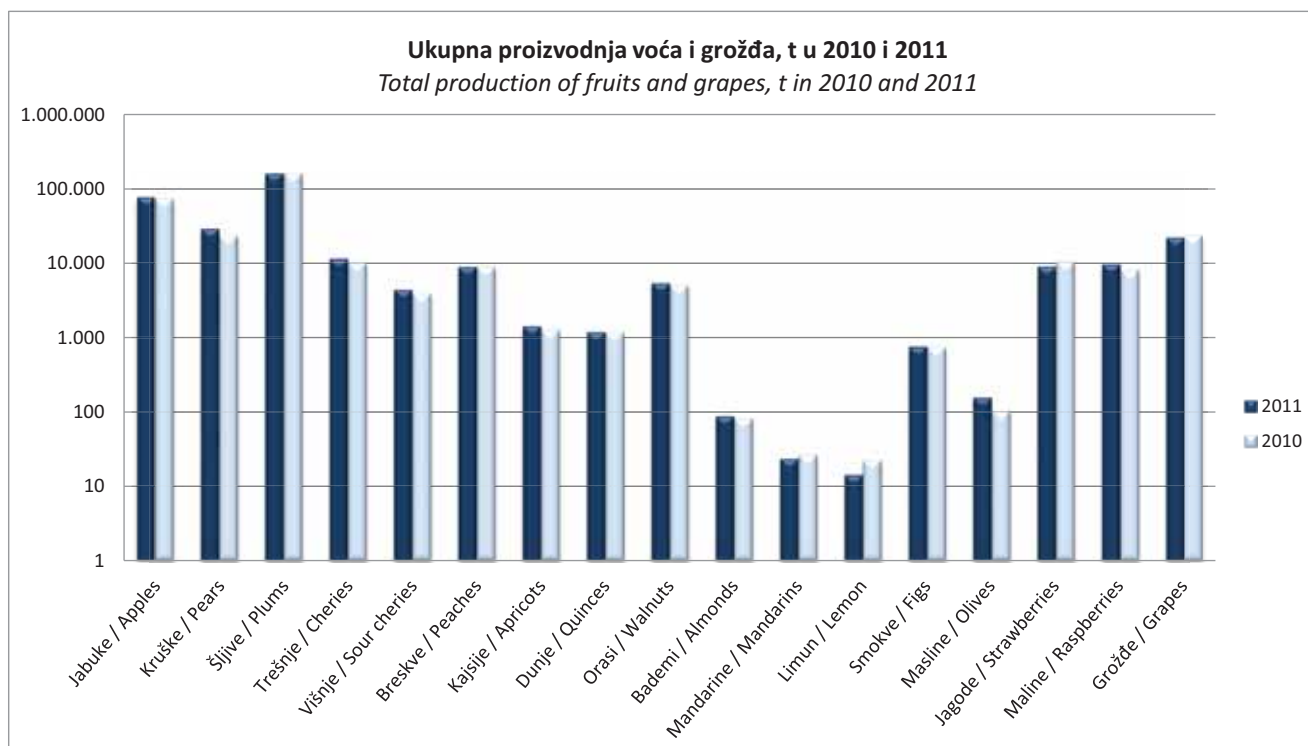

Prema podacima o proizvodnji voća i grožđa u 2011. godini ukupan prinos je smanjen i to: mandarina za 10,9%, limuna za 34,9%, jagoda za 14,4%, i grožđa za 6,7%, dok je ukupan prinos povećan kod jabuka za 5,1%, krušaka za 23,5%, trešanja za 14,3%, višanja za 12,6%, oraha za 7%, maslina za 24,4%, i malina za 19,2%.

According to fruit and grapes production data in 2011 the total yield decreased as follows: mandarins by 10,9%, lemon by 34,9%, strawberries by 14,4% and grapes by 6,7%, while the total yield of apples increased by 5,1%, pears by 23,5%, cherries by 14,3%, sour-cherries by 12,6%, walnuts by 7%, olives by 24,4% and raspberries by 19,2%.

Metodološka objašnjenja

Podaci o proizvodnji voća i grožđa u Bosni i Hercegovini dobijeni su agregiranjem podataka dobivenih redovnim statističkim istraživanjima u entitetskim zavodima za statistiku i Podružnici Brčko. Pravni subjekti dostavljaju podatke na osnovu knjigovodstvene i druge evidencije, dok se za individualna poljoprivredna gazdinstva vrše procjene od strane statističkih procjenitelja po pojedinim općinama.

Definicije

Rodna stabla voća i čokoti/trsovi vinove loze su stabla, odnosno čokoti/trsovi koja su prema svojoj fiziološkoj zrelosti sposobna da pod normalnim uslovima za vegetaciju zametnu plod, bez obzira da li su u odnosnoj godini rodila ili ne.

Prinos/prirod voća i grožđa je iskazan kao hambarski prinos/prirod normalne vlažnosti po odbitku svih gubitaka prilikom berbe i transporta.

Prinosi/prirodi po stablu-čokotu/trsu obračunati su na rodna stabla, odnosno čokote/trsove vinove loze.

Notes on methodology

Data on production of fruit and grapes in Bosnia and Herzegovina are aggregated from the Regular statistical surveys conducted by the Statistical Institutes at the level of Entities and Brcko District. Legal entities are submitting data based on book-keeping and other records whereas the municipal statistical estimators are making estimations for the individual households.

Definitions

Trees and vines of bearing age are those trees and vines capable of bearing fruit under standard conditions, regardless of whether or not they beared fruit during reporting year.

Yield of fruit and grapes is shown as the granary yield of standard humidity after deductions all losses during the harvest and transportation.

Yield per tree or per vine is computed for the bearing trees or vine.
