ŠUMARSTVO

Forestry

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U III KVARTALU 2012.

PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 3rd QUARTER 2012

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u trećem kvartalu 2012. godine veća je za 4,00% u odnosu na isti period 2011. godine. Proizvodnja sortimenata četinarskih vrsta drveća povećana je za 7,51% dok je proizvodnja sortimenata lišćarskih vrsta veća za 1,07%. Proizvodnja trupaca četinara povećana je za 8,19%, dok proizvodnja trupaca lišćara bilježi povećanje od 4,94%. Porast proizvodnje, od 2,92% bilježi i ogrijevno drvo lišćara. Najveći porast proizvodnje je kod prostornog drveta četinara od 14,55%. Najveći pad se bilježi kod proizvodnje ostalog grubo obrađenog drveta od 93,27%. Kod proizvodnje ostalog grubo obrađenog drveta radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 3rd quarter of 2012 has increased for 4,00% compared to the same period in 2011. The production of coniferous (softwood) assortments is 7,51% higher while production of broadleaf (hardwood) assortments increases for 1,07%. Coniferous logs production is 8,19% higher while production of broadleaf logs records increase of 4,94%. Production increase, of 2,92% also records broadleaf fuel wood. Highest production increase of 14,55% has coniferous cordwood. Highest reduction in production, of 93,27% has other roughly worked wood. Other roughly worked wood is produced in small quantities and its changes in production do not affect variations in total production of forest assortments.

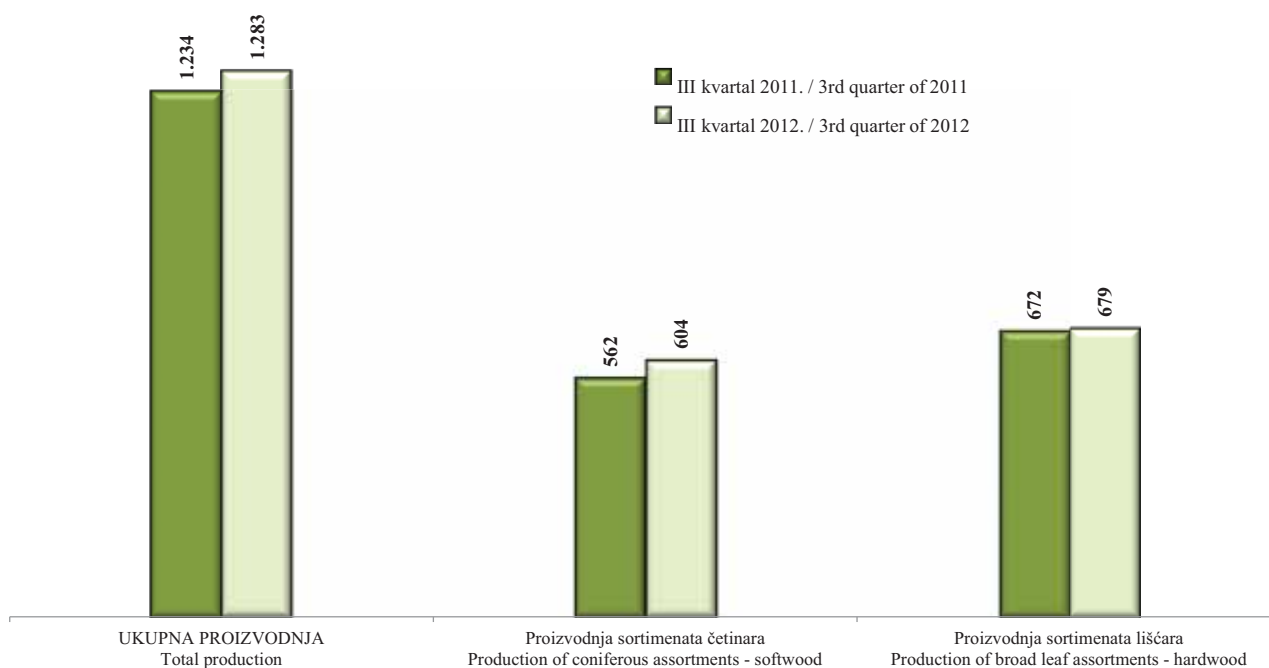

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U III KVARTALU 2012.

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 3rd QUARTER OF 2012

	Proizvodnja (Production)			Prodaja (Sale)			
	III kvartal 3 rd quarter 2011.	III kvartal 3 rd quarter 2012.	Indeksi Indicies VII-IX 2012	III kvartal 3 rd quarter 2011.	III kvartal 3 rd quarter 2012.	Indeksi Indicies VII-IX 2012	
	m ³			m ³			
UKUPNO	1.233.945	1.283.354	104,00	1.300.385	1.328.427	102,16	TOTAL
ČETINARA	562.221	604.452	107,51	580.162	606.876	104,60	CONIFEROUS
LIŠĆARA	671.724	678.902	101,07	720.223	721.551	100,18	BROAD LEAF
Trupci četinara	365.142	395.063	108,19	380.228	395.530	104,02	Logs, coniferous
Rudničko drvo četinara	40.757	38.978	95,64	43.879	41.033	93,51	Mining wood, coniferous
Ostalo dugo drvo četinara	35.752	32.727	91,54	35.407	32.912	92,95	Other long wood, coniferous

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 3rd quarter of 2011 and 2012

Grafikon 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u III kvartalu 2012. godine

Percentage participation of different assortments in total production of forest assortments in 3rd quarter of 2012

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*), te bijeli (Pinus *sylvestris*) i crni bor (Pinus *nigra*). Drvo četinara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara, kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*), te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemijskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće sl.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
