GODINA/ YEAR VII

SARAJEVO, 24.02.2012.

BROJ/ NUMBER 01

ŠUMARSTVO

Forestry

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U IV KVARTALU 2011.

PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 4TH QUARTER 2011

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u četvrtom kvartalu 2011. godine manja je za 2,97% u odnosu na isti period 2010. godine. Proizvodnja sortimenata četinarskih vrsta drveća smanjena je za 3,78% dok je proizvodnja sortimenata lišćarskih vrsta manja za 2,33%. Proizvodnja trupaca četinara smanjena je za 5,53% dok proizvodnja trupaca lišćara bilježi manji pad od 0,55%. Najveći pad se bilježi kod proizvodnje rudničkog drveta lišćara 54,27% dok se najveći porast proizvodnje bilježi kod proizvodnje ogrijevnog drveta četinara od 50,13%. I kod rudničkog drveta lišćara i ogrijevnog drveta četinara radi se o proizvodnji malih količina sortimenata čije variranje nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 4th quarter of 2011 is decreased for 2,97% compared to the same period in 2010. Production of coniferous (softwood) assortments records a 3,78% decrease while production of broadleaf (hardwood) assortments decreases for 2,33%. Production of coniferous logs is for 5,53% less than in the same period of 2010 while production of broadleaf logs recorded lower decrease of 0,55%. Most significant production drop of 54,27% has broadleaf mining wood while production of coniferous fuel wood recorded highest rise of 50,13%. Both broadleaf mining wood and coniferous fuel wood are regularly produced in small quantities and their variations do not significantly affect the total production of forest assortments.

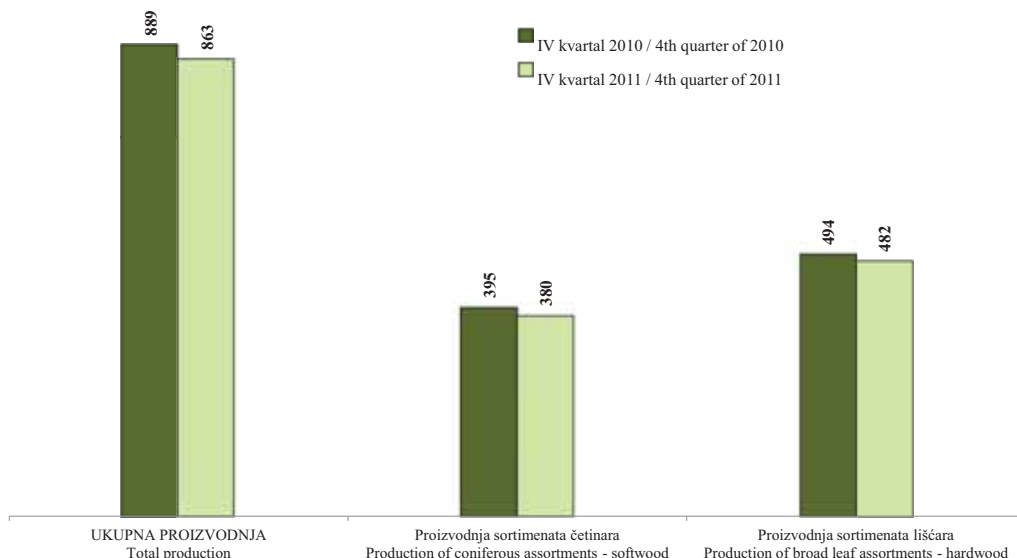

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U IV KVARTALU 2011.

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 4th QUARTER OF 2011

	Proizvodnja (Production)			Prodaja (Sale)			
	IV kvartal 4 th quarter 2010.	IV kvartal 4 th quarter 2011.	Indeksi Indicies X-XII 2011	IV kvartal 4 th quarter 2010.	IV kvartal 4 th quarter 2011.	Indeksi Indicies X-XII 2011	
	m ³		X-XII 2010	m ³		X-XII 2010	
UKUPNO	889.155	862.740	97,03	911.455	894.500	98,14	TOTAL
ČETINARA	395.235	380.310	96,22	421.991	422.225	100,06	CONIFEROUS
LIŠĆARA	493.920	482.430	97,67	489.464	472.275	96,49	BROAD LEAF
Trupci četinara	259.643	245.287	94,47	265.161	266.947	100,67	Logs, coniferous
Rudničko drvo četinara	24.691	29.302	118,67	31.531	33.546	106,39	Mining wood, coniferous
Ostalo dugo drvo četinara	18.815	18.676	99,26	23.990	22.152	92,34	Other long wood, coniferous
Prostorno drvo četinara	91.711	86.482	94,30	100.641	98.917	98,29	Cordwood, coniferous
Trupci lišćara	136.851	136.104	99,45	145.890	147.879	101,36	Logs, broadleaf
Rudničko drvo lišćara	2.143	980	45,73	1.692	1.019	60,22	Mining wood, broadleaf
Ostalo dugo drvo lišćara	4.566	3.028	66,32	2.966	3.667	123,63	Other long wood, broadleaf
Prostorno drvo lišćara	37.294	30.231	81,06	36.467	30.990	84,98	Cordwood, broadleaf
Ogrijevno drvo četinara	375	563	150,13	668	663	99,25	Fuelwood, coniferous
Ogrijevno drvo lišćara	312.903	311.889	99,68	302.173	288.427	95,45	Fuelwood, broadleaf
Ostalo grubo obrađeno drvo	163	198	121,47	276	293	106,16	Other wood, roughly worked

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ 4th quarter of 2010 and 2011

Grafikon 2. Procentualno učešće šumskih sortimenata u ukupnoj proizvodnji u Bosni i Hercegovini u IV kvartalu 2011. godine

Percentage participation of forest assortments in total production in Bosnia and Herzegovina in 4th quarter of 2011

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*), te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva, označava nazivom *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*), te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva, označava nazivom *hardwood*.

Trupci su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemijskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
