GODINA/ YEAR IX

SARAJEVO, 20.08.2014.

BROJ/ NUMBER 4

ŠUMARSTVO

Forestry

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U II KVARTALU 2014.

PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 2nd QUARTER 2014

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u drugom kvartalu 2014. godine manja je za 13,85% u odnosu na isti period 2013. godine. Proizvodnja sortimenata četinarskih vrsta drveća smanjena je za 7,04% dok je proizvodnja sortimenata lišćarskih vrsta manja za 20,70%. Proizvodnja trupaca četinara smanjena je za 9,64% dok proizvodnja trupaca lišćara bilježi pad od 23,13%. Pad proizvodnje od 18,48% u odnosu na prvi kvartal 2013. godine bilježi se i kod ogrijevnog drveta lišćara. Rast proizvodnje se bilježi kod ostalog dugog drveta četinara od 10,00% i kod prostornog drveta četinara od 4,36%. Najveći pad je u proizvodnji ostalog dugog drveta lišćara od 40,08% i kod prostornog drveta lišćara od 32,09%. Pad proizvodnje od 24,18% bilježi se i kod jamskog drveta četinara. Kod proizvodnje ostalog grubo obrađenog drveta i ogrijevnog drveta četinara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 2nd quarter of 2014 has decreased for 13,85% compared to the same period in 2013. The production of coniferous (softwood) assortments is, for 7,04% lower while the production of broadleaf (hardwood) assortments decreases for 20,70%. Production of coniferous logs is 9,64% lower while production of broadleaf logs records decrease of 23,13%. Decrease of 18,48%, compared to 2nd quarter of 2013 has also been recorded in broadleaf fuelwood production. Production increase has been recorded in production of other coniferous long wood of 10,00% and coniferous cordwood of 4,36%. The highest production drop records production of broadleaf other long wood of 40,08% and broadleaf cordwood of 32,09%. Production decrease of 24,18% also records coniferous mining wood. Other roughly worked wood and coniferous fuelwood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U II KVARTALU 2014.

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 2nd QUARTER OF 2014

	Proizvodnja (Production)			Prodaja (Sale)			
	II kvartal 2 nd quarter 2013	II kvartal 2 nd quarter 2014	Indeksi <i>Indicies</i> IV-VI 2014 IV-VI 2013	II kvartal 2 nd quarter 2013	II kvartal 2 nd quarter 2014	Indeksi <i>Indicies</i> IV-VI 2014 IV-VI 2013	
	m ³			m ³			
UKUPNO	1.130.670	974.067	86,15	1.083.932	913.391	84,27	TOTAL
ČETINARA	567.031	527.119	92,96	522.193	449.740	86,13	CONIFEROUS
LIŠĆARA	563.639	446.948	79,30	561.739	463.651	82,54	BROAD LEAF
Trupci četinara	378.980	342.441	90,36	345.440	298.005	86,27	Logs, coniferous
Jamsko drvo četinara	41.224	31.258	75,82	42.122	24.198	57,45	Mining wood, coniferous
Ostalo dugo drvo četinara	3.801	4.181	110,00	3.656	3.473	94,99	Other long wood, coniferous
Prostorno drvo četinara	142.761	148.983	104,36	130.709	123.100	94,18	Cordwood, coniferous
Trupci lišćara	185.611	142.684	76,87	195.851	150.525	76,86	Logs, broadleaf
Jamsko drvo lišćara	1.004	954	95,02	1.014	1.096	108,09	Mining wood, broadleaf
Ostalo dugo drvo lišćara	4.329	2.594	59,92	5.157	2.663	51,64	Other long wood, broadleaf
Prostorno drvo lišćara	23.496	15.955	67,91	23.551	20.004	84,94	Cordwood, broadleaf
Ogrijevno drvo četinara	265	256	96,60	266	956	-	Fuelwood, coniferous
Ogrijevno drvo lišćara	349.163	284.647	81,52	336.083	289.291	86,08	Fuelwood, broadleaf
Ostalo grubo obrađeno drvo	36	114	-	83	80	-	Other wood, roughly worked

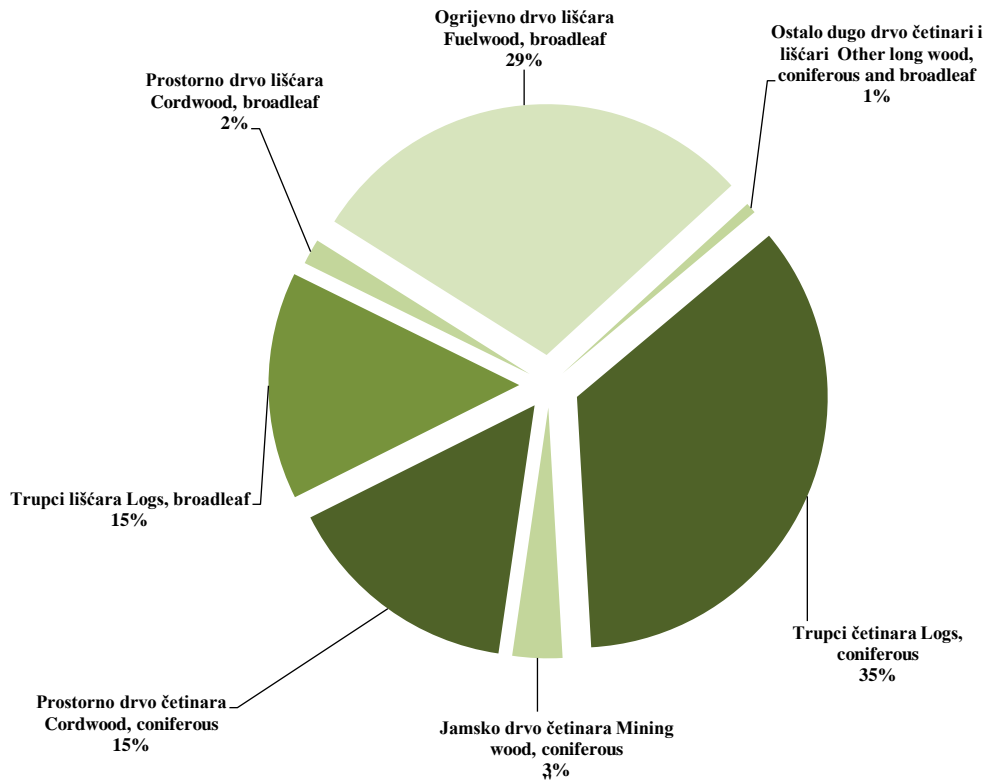

Graf 1. Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - II kvartal 2013 i 2014 god.

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 2nd quarter of 2013 and 2014

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u II kvartalu 2014. god.

Percentage participation of different assortments in total production of forest assortments in 2nd quarter of 2014

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapremninskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinarara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood include technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
