Ø 5DRDDBEMNDWQ Workers from the B&H employed on build. sites abroad in report. quarter

³ C X f U Y b] ' g U h] ' f Number of working hours referred to workers on building sites

Kvartalnim izvještajem o građevinskim radovima u inostranstvu (GRAD - 33) prikupljaju se podaci o građevinskoj djelatnosti u inostranstvu, a izvor podataka su obračuni koji se podnose inostranom investitoru, te evidencije o radnicima na inostranim gradilištima.

Obuhvat građevinske djelatnosti usklađen je sa područjem F – Građevinarstvo u Klasifikaciji djelatnosti Bosne i Hercegovine (KD BiH 2010), a radovi na građevinama razvrstavaju se prema Klasifikaciji vrsta građevinskih objekata (KVGGO BiH). Obje klasifikacije usklađene su s odgovarajućim klasifikacijama koje je propisao Statistički ured EU-a (NACE Rev. 2 i Classification of Types of Construction – CC, final version).

Definicije

Vrijednost izvršenih radova uključuje vrijednost rada, ugrađenog materijala i gotovih proizvoda za ugradnju, goriva i energije koje je nabavila pravna osoba, druge troškove koje je pravna osoba imala, a u vezi su s obavljanjem radova, kao i dobit.

Nove narudžbe su ukupna vrijednost zaključenih ugovora u izvještajnom kvartalu o izvođenju građevinskih radova u inostranstvu bez obzira na to je li ugovor sklopljen neposredno s inostranim investitorom ili sa nekim drugim domaćim preduzećem koje je glavni ugovaralac radova u odnosu na inostranog investitora.

Vrijednosti su preračunate u KM na osnovu pariteta 1 američki dolar = 1,4190 KM (kursna lista broj 257. Centralne banke BiH utvrđena na dan 31. 12. 2013. godine).

Aim of the quarterly report on construction works abroad (GRAD-33) is to collect data on the value of construction activities performed abroad from reports submitted to a foreign investor and records on workers on building sites abroad.

Coverage of construction activities is harmonised with section F-Construction in Classification of activities BiH (KD BiH 2010), construction works are classified according to the Classification of Types of Construction (KVGGO BiH). Both classifications are harmonised with adequate classifications of Eurostat (NACE Rev.2 Classification of Types of Construction – CC, final version).

Definitions

The value of construction works comprises the value of works, building material used, finished products which are built in, fuel and energy and all other expenses incurred by the company in respect to performance of works, as well as profit.

New orders are the total value of signed contracts on carrying out construction works abroad in the reporting quarter, irrespective of whether a contract is signed directly with a foreign investor or with other domestic company who is the main negotiator of construction works in regard to the foreign investor.

Values are calculated at the medium exchange rates of the Central Bank of BiH No. 257 of 31.12.2013. (1 USD = 1.4190 KM).
