BRUTO DOMAĆI PROIZVOD ZA BOSNU I HERCEGOVINU GROSS DOMESTIC PRODUCT OF BOSNIA AND HERZEGOVINA 2005-2015 / ESA 2010

U ovom saopćenju Agencija za statistiku BiH (BHAS) objavljuje revidirane godišnje procjene bruto domaćeg proizvoda (BDP) po proizvodnom i dohodovnom pristupu za Bosnu i Hercegovinu za period 2005-2015. godina prema metodologiji Evropskog sistema nacionalnih računa 2010. **(ESA 2010)**.

Od septembra 2014. u svim zemljama članicama Evropske unije, nacionalni računi se sastavljaju u skladu s metodološkim uputama ESA 2010. ESA 2010 je evropska verzija svjetskog metodološkog okvira Sistema nacionalnih računa (SNA 2008) Ujedinjenih naroda. Posjedovati jedinstvenu metodologiju na nivou Evropske unije izuzetno je važno kako bi se ostvarila ujednačena, uporediva i pouzdana proizvodnja ekonomskih statistika u zemljama članicama.

Postojeći metodološki okvir ESA 95 primijenjuje se gotovo 20 godina. U tom periodu znatno se promijenila privreda sa sve većom važnošću nematerijalne imovine, proizvoda i usluga intelektualnog vlasništva, informacijskih i komunikacijskih tehnologija u proizvodnim procesima. Stoga je bilo potrebno prilagoditi i način kompiliranja makroekonomskih statistika kako bi one odražavale te promjene.

Revizija obuhvata slijedeće elemente metodoloških poboljšanja: prikazivanje izdataka za istraživanje i razvoj kao investicije, proizvodnju softvera u vlastitoj režiji, alokaciju bruto vrijednosti proizvodnje Centralne banke, poboljšanja u obračunu neživotnog osiguranja.

*In this First Release, the Agency for Statistics of Bosnia and Herzegovina (BHAS) presents the revised annual gross domestic product (GDP) by production and income approach for Bosnia and Herzegovina for period 2005-2015 according to the methodology of European System of National Accounts 2010 **(ESA 2010)**.*

Since September 2014, in all Member States of the European Union national accounts are compiled according to the methodological guidelines of the ESA 2010. The ESA 2010 is the European version of the System of National Accounts (SNA 2008) of the United Nations, a world-wide methodological framework. It is crucial to have such a methodological rulebook in the EU, in order to ensure that statistics on Member States' economies are compiled in a consistent, comparable and reliable way.

The current methodological framework ESA 95 has been applied for almost 20 years now. In that period, substantial changes impacted economies, particularly in relation to the growing importance of intangible assets, intellectual property products and information and communication technologies in production processes. Therefore, the way in which macroeconomic statistics are compiled needed to be adjusted in order to reflect these changes.

The revision consists of the following methodological improvements: the capitalisation of research and development expenditure, calculation of own-account software, allocation of the Central bank output, the improvements in calculation of the non-life insurance.

U okviru revizije, osim promjena ESA 2010, napravljena su dodatna metodološka poboljšanja zbog korištenja boljih izvora podataka (poboljšanja u obračunu outputa mikrokreditnih organizacija, obračun poreza na proizvode i subvencije na proizvode u stalnim cijenama).

Uticao ove statističke revizije na nivo BDP-a u nominalnim vrijednostima čini u prosjeku povećanje od 0,09% u cijelom periodu od 2005. do 2015. godine. Na nominalno povećanje BDP-a, u cijelom periodu, izdaci na istraživanje i razvoj u prosjeku imaju uticaj od 0,07%. Ostali elementi revizije imaju pozitivan ili negativan uticaj na nivo BDP-a. Alokacija output-a Centralne banke ima negativan uticaj na BDP prema ESA 2010 metodologiji jer nije vršena alokacija outputa Centralne banke BiH u ranijim obračunima prema preporukama ESA 95 metodologije. Ilegalne aktivnosti nisu uključene u obračun.

Ovom revizijom realne stope rasta se nisu znatnije promijenile.

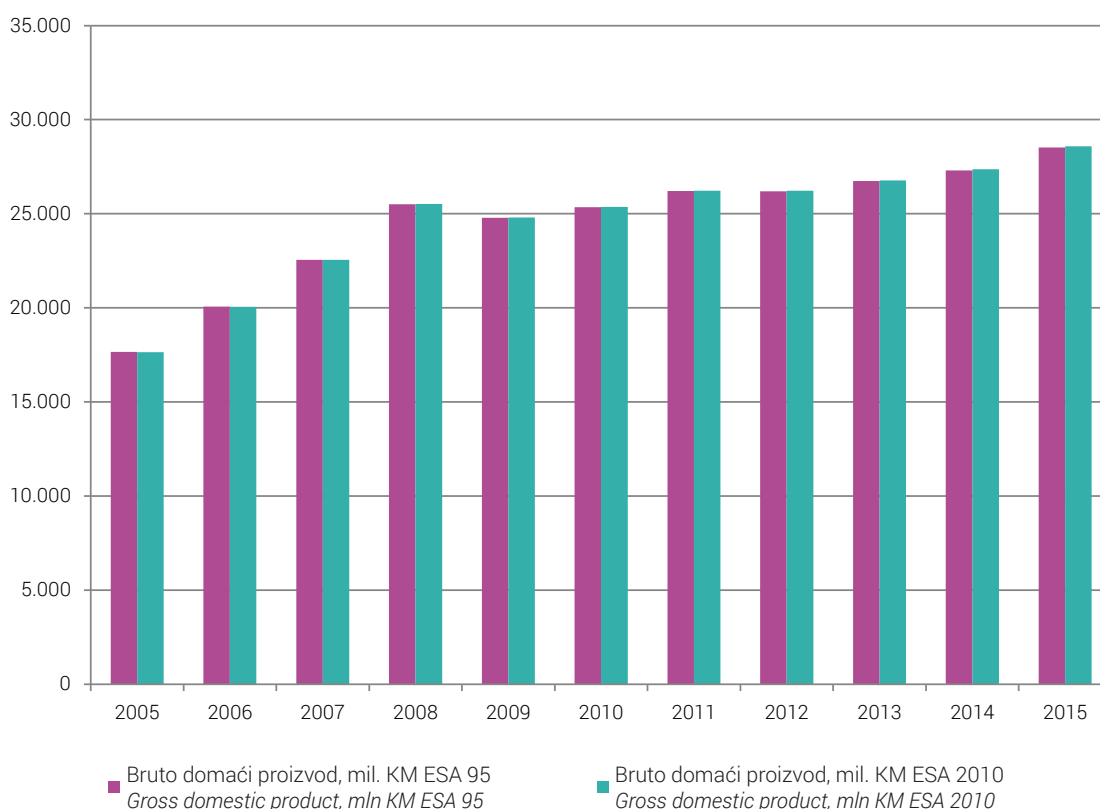

U ovom saopćenju prikazana je serija podataka od 2005. do 2015. godine. Podaci su prikazani u tekućim cijenama, stalnim cijenama prethodne godine i lančano povezanim vrijednostima u cijenama 2010. godine.

In this revision, except the ESA 2010 changes, some additional methodological changes have been made due to the use of the better data sources (improvements relating to the calculation of output for microcredit organisations, the calculation of taxes on products and subsidies on products at previous year prices).

This statistical revision affected the average increase of 0,09% at the GDP level in nominal terms throughout the whole period from 2005 to 2015. On a nominal increase of GDP, expenditure on research and development, throughout the whole period, had average impact of 0.07%. Other revision elements had a positive or negative impact on the level of GDP. The allocation of the output of the Central Bank has a negative impact on GDP according to the ESA 2010 methodology because it is not done allocation output Central Bank in previous accounts as recommended by the ESA 95 methodology. Illegal activities are not included in the calculation.

This revision did not significantly change real growth rates.

This Release presents data series for period from 2005 to 2015. Data are presented at current prices, at constant prices of a previous year and chain linked at prices 2010.
