Metodološka objašnjenja

Podaci o drumskom i željezničkom prometu dobiveni su obradom mjesečnih statističkih izvješća, koja su entitetski statistički zavodi prikupili od poduzeca i drugih poslovnih subjekata koji se bave prijevozom putnika i robe (tereta) u unutrašnjem i međunarodnom prijevozu.

Za željeznički prijevoz u ovom priopćenju su raspoloživi slijedeći pokazatelji: broj prevezenih putnika, tone prevezene robe (tereta) i broj putničkih i tonskih kilometara. Za drumski prijevoz, pored naprijed navedenih indikatora, raspoloživi su i podaci o predenim kilometrima vozila.

U drumskom prijevozu nije obuhvaćen prijevoz putnika i robe koji, svojim prijevoznim sredstvima, poduzeca obavljaju za vlastite potrebe (interni transport).

Pod pojmom prijevoz u prometu, podrazumijeva se kretanje putnika ili tereta od jednog mjesta (mjesto ukrcaja) do drugog mjesta (mjesto iskrcaja) i predstavlja mjeru aktivnosti prijevoznih poduzeca.

Putnički kilometar je izračunata jedinica mjere koja uslovno predstavlja prijevoz 1 putnika na udaljenosti od 1 kilometra. Indikator - putnički kilometar je kompleksan indikator koji je izračunat i dostavljen od strane poduzeca – izvještajnih jedinica. Ovaj indikator iskazuje agregiranu jedinicu mjere broja prevezenih putnika u odnosu na predenu dionica puta. Radi se o mjeri fizičkog obima prijevoza i pokazatelj je rentabilnosti rada prijevoznog poduzeca.

Na isti način, tonski kilometar je jedinica mjere koja predstavlja prijevoz 1 tone robe na udaljenosti od 1 kilometra.

Notes on Methodology

Data on road and railway transport were obtained by processing monthly statistical data from surveys conducted by the Statistical Offices at the Entity level. The reporting units for these surveys are enterprises and other business subjects engaged in domestic and international transport of passengers and goods.

For the railway transport the following indicators can be obtained from these Release: number of transported passengers, freight (tons of transported goods), and the passenger and tons of goods/kilometre. The data on road transport also includes the indicator of vehicle-kilometers covered.

Road transport data excludes the transport of passengers and goods undertaken by the business entities for their own needs and by their own means (internal transport).

Under the term of transport we mean the movement of the passengers and goods from point one (place of loading) to point two (place of unloading), which represents the measurement of the activities done by the enterprises engaged in transport.

Passenger kilometre is an indicator that represents the transport of one passenger at the distance of one kilometre. It is a complex indicator calculated and delivered by enterprises- reporting units. It represents the relation between the aggregated number of transported passengers and the number of covered kilometres. It is the measure of physical quantity of transport and it is an indicator of enterprises work rentability.

In the same way, by ton/kilometre we mean the transport of one ton of goods at the distance of one kilometre.

Oblast telekomunikacija u priopćenju je predstavljena osnovnim indikatorima o poštanskom i telefonskom prometu, a ulazni podaci dobiveni su na temelju mjesečnih izvješća poduzeta registriranih za tu djelatnost.

Podaci za pismonosne i paketne pošiljke u unutrašnjem i međunarodnom prometu sadrže transfere: pisama, preporučenih pošiljki, vrijednosnih pisama i paketa primljenih za otpremu i prispjelih za dostavu i isporuku, bez tranzita, a uključena je i otprema časopisa i tiska upućena pretplatnicima.

Unutarnji mjesni i međumjesni telefonski razgovori uključuju samo polazne, a međunarodni i polazne i dolazne razgovore.,

Podaci o mobilnim telefonima – razgovori odnose se na Federaciju BiH. Republički zavod za statistiku Republike Srpske još uvijek ne prikuplja podatke o mobilnoj telefoniji.

The area of telecommunications is covered by basic indicators on postal and telephone traffic for which the input data are based on monthly reports delivered by the enterprises registered for these activities.

The data on number of letters and parcels in domestic and international transport comprise: letters, special letters, letters of value, and deliverable parcels including the delivery of subscribed magazines and newspapers, excluding the transit.

Local and inter-local domestic telephone calls include only outgoing calls, while the international phone traffic comprise both incoming and outgoing calls.

The data on mobile phones calls refers only to the territory of Federation of Bosnia and Herzegovina. Republic Institute of Statistics of Republika Srpska still does not collect referred data.
