***UVOD***  
***INTRODUCTION***

## U V O D

Podaci za BiH publikovani u ovom Biltenu predstavljaju pocetak realizacije Plana statistickih aktivnosti za BiH u 1999. godini koji je uskladen sa programima statistickih istraživanja Federalnog zavoda za statistiku Federacije BiH i Republickog zavoda za statistiku Republike Srpske.

Prema Odluci Vijeca ministara Bosne i Hercegovine od 20.08.1998. godine ("Službeni glasnik BiH", broj 16/98) Agencija za statistiku BiH nadležna je da u skladu sa medunarodno prihvacenom metodologijom izrađuje i objavljuje statisticke podatke za Bosnu i Hercegovinu, a na osnovu podataka zavoda za statistiku entiteta.

Za prikupljanje podataka i njihovu obradu za nivo entiteta odgovorni su zavodi entiteta, dok je Agencija za statistiku BiH odgovorna za agregiranje, harmonizaciju i distribuciju podataka na nivou Bosne i Hercegovine.

Za ovu publikaciju Agencija za statistiku BiH obezbjedila je podatke za one oblasti statistickih istraživanja koja se provode po istoj metodologiji. Aktivnosti na uskladivanju metodologija za druge oblasti statistickih istraživanja su trajan zadatak Agencije i zavoda za statistiku entiteta.

U narednom periodu bit cemo u mogucnosti da publikujemo podatke za više oblasti za prethodne godine.

Sve sugestije korisnika statistickih podataka koje vode daljem poboljšanju ove publikacije sa zahvalnošću cemo prihvatiti.

Sarajevo, juni 1999.

POSLOVODNI ODBOR

## INTRODUCTION

The data for B&H published in this Bulletin represent the beginning of the realisation of the Plan of Statistical Activities for B&H in 1999, which are harmonised with the programs of the Federation of B&H and of the Republika Srpska Statistical Offices.

According to the Decision of the Council of Ministry of Bosnia and Herzegovina, made on the 20.08.1998. ("Official Gazette B&H", number 16/98) the Agency of Statistics of Bosnia and Herzegovina is in charge "of the production and publishing, of aggregated statistics for Bosnia and Herzegovina in accordance with the International accepted methodology, based on data submitted by the Entity Statistical Institutes".

The Statistical Offices of the Entities are responsible for collecting and processing the data at their level. The Agency of Statistics of Bosnia and Herzegovina is responsible for the aggregating, harmonising and distributing data at the level of Bosnia and Herzegovina.

For this publication the Agency for Statistics of Bosnia and Herzegovina provides data for statistical areas in which the same methodology has been used. The harmonisation of methodologies of other statistical areas is the long task of this Agency and of the Offices of the Entities.

Soon we will be able to publish data on previous years for other areas.

All suggestions by users of statistical data, which lead to further improvement of this publication, will be accepted with pleasure.

Sarajevo, June 1999

MANAGEMENT BOARD

## **SKRACENICE, ZNAKOVI I KURSEVI**

U statistickim tabelama primjenjeni su slijedeći znakovi:

-	nema pojave
...	ne raspolaže se podatkom
0	podatak je manji od 0,5 od date jedinice mjere
( )	nepotpun, nedovoljno provjeren, odnosno procijenjen podatak
*	ispravljen podatak
φ	prosjeak
1)	oznaka za napomenu ispod tabele
Δ	promjena
(BiH)	statistički podaci na nivou Bosne i Hercegovine
(Fed)	statistički podaci na nivou Federacije
(RS)	statistički podaci na nivou Republike Srpske
CV	koeficijent varijacije
KM	konvertibilna marka
JKD	Jugoslovenska klasifikacija ekonomskih aktivnosti

Zvanica valuta u BiH je konvertibilna marka: 1 Konvertibilna marka (KM) = 1 Njemacka marka (DM). Do 1998. u Republici Srpskoj kao zvanica valuta korišćeni su jugoslovenski dinar i konvertibilna marka. Slijedeće kurseve je koristila BHAS za preračun vrijednosti u KM za nivo Bosne i Hercegovine da bi se omogućilo poređenje podataka:

Januar – Mart	1998	1 KM = 1 DM = 3,3 Dinara
April – Oktobar	1998	1 KM = 1 DM = 6 Dinara
Novembar	1998	1 KM = 1 DM = 7 Dinara
Decembar	1998	1 KM = 1 DM = 6 Dinara

Poslije januara 1999. podaci iz Republike Srpske dobivaju se izraženi u KM.

## **ABBREVIATIONS, SYMBOLS AND CURRENCY EQUIVALENCE**

In statistical tables we have the following signs

-	no entry
...	data not available
0	value is less than 0,5 of the unit of measure being used
( )	uncomplete, not reliable, estimated data
*	corrected data
φ	average
1)	indicates note beneath table
Δ	change
(BiH)	state level statistics
(Fed)	Federation level statistics
(RS)	Republic Srpska level statistics
CV	coefficient of variation
KM	convertible currency (mark)
JKD	Yugoslavian classification of economic activities

The official currency in BiH is the Konvertible Mark: 1 Konvertible Mark (KM) = 1 Deutshe Mark (DM). Up to 1998 in Serbs Republic as an official currency was used Yugoslav Dinar and Konvertible Mark. The following exchange rates have been used by BHAS to be calculated values in KM for the state level statistics concerning monetary values:

January – March	1998	1 KM = 1 DM = 3,3 Dinars
April – October	1998	1 KM = 1 DM = 6 Dinars
November	1998	1 KM = 1 DM = 7 Dinars
December	1998	1 KM = 1 DM = 6 Dinars

After January 1999. data from Serbs Republic is directly received in KM.

## STATISTIKA RADA

Cilj statistike zaposlenosti, nezaposlenosti i placa, koja je važna oblast društvene statistike, je da pruži informaciju o tržištu rada i o odgovarajućim pitanjima putem administrativnih informacija, pojedinačnih intervjuova ili drugih načina putem kojih će se dobiti informacije o ovoj materiji.

Cilj statistike rada je da prikupi podatke o radnom stanovništvu (15 godina i više) i da ih razvrsta u **tri uzajamno isključive** grupe: zaposlene osobe, nezaposlene osobe i neaktivne osobe. Ukrštanjem drugih informacija (ukupan broj stanovništva, starost, pol, prethodni posao, naredni posao itd) zajedno sa ovom moguće je napraviti interesantne (zajedničke) indikatore. Dobar primjer je Evropska Anketa radne snage, koju provode zemlje članice EU i koju koordinira EUROSTAT od 1973.

Definicije zaposlenosti i nezaposlenosti korištene u zemljama EU, usvojene su na 13. Međunarodnoj Konferenciji Statisticara rada koja je održana u Ženevi 1982. godine.

## PLACE

### *Metodološka objašnjenja*

Prosječne mjesečne bruto i neto plate po zaposlenom dobijene su na osnovu mjesečnog statističkog istraživanja o zaposlenim i placama. Prema metodologiji koja se koristi u BiH nema razlike između poslodavca i zaposlenih radnika. Podaci o neto i bruto placama su dostupni. U podacima o prosječnoj neto i bruto placi nisu obuhvaćene isplate zaposlenih u Ministarstvu odbrane i Ministarstvu unutrašnjih poslova.

Mjesečna neto plata obuhvaća plate zaposlenih za izvršene poslove na osnovu redovnog radnog odnosa i naknada za godišnji odmor, bolovanja do 30 dana, državnih praznika, plaćenog dopusta, čekanja i zastoja bez krivnje zaposlenog. Nisu obuhvaćena primanja koja terete materijalne troškove, naknade za bolovanja preko 30 dana i primanja na osnovu ugovora o djelu.

Mjesečna bruto plata obuhvaća sve vrste neto isplata na osnovu redovnog radnog odnosa i zakonom propisana obavezna izdvajanja, doprinose i poreze.

Prosječna neto i bruto plata po zaposlenom izračunava se dijeljenjem ukupnih isplata s brojem zaposlenih koji su primili placu.

Prosječna mjesečna plata dobijena je pomoću formule:

$$\bar{X} = \frac{\sum_{i=1}^{n_i} X_i + \sum_{j=1}^{n_j} X_j}{n_i + n_j}$$

gdje je

$\bar{X}$

- prosječna plata

$X_i$  - isplaćena masa placa u Federaciji;

$X_j$  - isplaćena masa placa u Republici Srpskoj;

$n_i$  - broj zaposlenih koji su primili placu u Federaciji BiH;

$n_j$  - broj zaposlenih koji su primili placu u Republici Srpskoj.

## **STATISTICS ON LABOUR FORCE**

The objective of statistics on employment and wages, an important branch of social statistics, is to give information on the labour market and related issues by means of administrative data, personal interviews or other relevant sources of data.

The main statistical objective of the Labour Force data is to divide the population of working age (15 years and above) in three mutually exclusive groups: persons in employment, persons unemployed and inactive persons. Within these groups other characteristics (total population, age, sex, previous job, second job, etc) are identified to provide key indicators. The European Labour Force Survey for example, has been carried out by the Member States of the EU and co-ordinated by EUROSTAT since 1973.

The definitions of employment and unemployment used in EU countries, closely follow those adopted by the 13<sup>th</sup> International Conference of Labour Statisticians, in 1982.

## **WAGES**

### *Notes on Methodology*

Data on average monthly gross and net salaries (wages) were obtained on the basis of monthly reports of the enterprises and not enterprises. According to methodology currently used in B&H, there is no distinction made between employers and employees. Data related to net wages and gross wages are available. Data related to net and gross salaries are not including wages of the persons in the Ministry of Defence and the Ministry of Foreign Affairs.

Net monthly earning includes the income of a person in employment earned for work during regular working hours and some other payments; annual leave, sickness up to 30 days, public holidays, paid leave, lay-off and job stop caused against person's will and of no faults of his own.

Gross monthly earning includes all kinds of the net payments on the basis on permanent employment plus participation, co-payments, contributions and taxes, as prescribed by the law.

Average net and gross earning per one person in employment are calculated by dividing the total of payments by the number of persons in paid employment.

Average monthly pay at state level can be calculated by the following formula:

$$\bar{X} = \frac{\sum_{i=1}^{n_i} X_i + \sum_{j=1}^{n_j} X_j}{n_i + n_j}$$

$\bar{X}$  - is average monthly pay

$X_i$  - is the total pay of the enterprise  $i$ , that belongs to the Federation

$X_j$  - is the total pay of the enterprise  $j$ , that belongs to the Republic Srpska

$n_i$  - is the total number of persons working in the Federation enterprises

$n_j$  - is the total number of persons working in the Republic Srpska enterprises

Ovdje postoji **jedna specifična poteškoca**: velike su neredovnosti u isplatama, a statistika podrazumijeva plaćanja u mjesecu, a ne mjesečno ugovorene, uobičajene ili prosječne plaće. To znači da u toku jednog mjeseca, na primjer, jedna osoba nije primila ni jednu konvertibilnu nit Deutch marku, a u narednom mjesecu ta osoba može primiti i dvije plaće.

U biltenu su predstavljene slijedeće tabele:

- Prosjek bruto plaća isplaćenih tokom mjeseca u skladu sa ekonomskom aktivnošću (JKD)
- Prosjek neto plaća isplaćenih tokom mjeseca u skladu sa ekonomskom aktivnošću (JKD)
- Prosjek bruto plaća po periodima (kumulativni prosjek) u skladu sa ekonomskom aktivnošću (JKD)
- Prosjek neto plaća po periodima (kumulativni prosjek) u skladu sa ekonomskom aktivnošću (JKD)

There is a **main specific difficulty**: there is a great irregularity in payments and the statistics concern pay in **the** month and **not** monthly contractual, usual or average salary. This means that in one month, for instance, one person may receive zero KM (1 **K**onvertible **M**ark = 1 **D**eutsche Mark) and in the next month twice his normal salary. When BHAS publish longer monthly series with wages, convergence indicators are included (see Bulletin 2). In this bulletin it is not necessary.

The following tables are presented in the bulletin:

- Average gross wages paid during the month according to economic activity (JKD)
- Average net wages paid during the month according to economic activity (JKD)
- Average gross wages of the accumulated paid up to this month according to economic activity (JKD)
- Average net wages of the accumulated paid up to this month according to economic activity (JKD)

## ***2. NEZAPOSLENOST*** ***UNEMPLOYMENT***

## **NEZAPOSLENOST**

### *Metodološka objašnjenja*

Podatke o nezaposlenim osobama zavodi za statistiku entiteta preuzeli su od nadležnih organizacija za zapošljavanje u Federaciji BiH i Republici Srpskoj.

Podaci o nezaposlenim osobama baziraju se na evidencijama koje se prema zakonskim propisima vode u nadležnim organizacijama za zapošljavanje. Navedene evidencije su izvor statističkih podataka o nezaposlenosti. Podaci o broju nezaposlenih osoba prikazuju se sa stanjem na dan posljednjeg dana u mjesecu. Godišnji prosjek izračunat je kao aritmetička sredina mjesečnih stanja u tekućoj godini.

Prema definiciji “nezaposlena osoba” smatra se osoba sposobna za rad, koja je evidentirana u nadležnoj organizaciji za zapošljavanje kao tražitelj zaposlenja, a nije u radnom odnosu, nije vlasnik ili suvlasnik u preduzeću, ne obavlja samostalnu djelatnost i nije redovni učenik, student ili penzioner. Ovo je administrativna informacija ali je prema međunarodnim definicijama gruba procjena broja nezaposlenih osoba.

## UNEMPLOYMENT

### *Notes on Methodology*

Data on unemployment are obtained from the two Statistical Offices of the Entities that receive them from the registers of the Employment Offices.

Data on unemployed persons are presented with the situation on the last day of the month. The annual average is calculated as an arithmetical means of monthly figures.

According to the Bosnian definition an “unemployed person“ is a person capable of work, registered in the Employment Service as job-seeker, reporting regularly, having no regular job, not an owner or shareholder owning, not self-employed, not a regular pupil, student or retired person. This is an administrative information but a rough *proxy* of the number of unemployed persons according to international definitions.

For the moment it is not possible to define one unemployment rate conform with the same indicators in EU countries. Some figures can be calculated for Federation and will be included in future publications (see also Bulletin 2 of BHAS).

**3. ŠUMARSTVO**  
**FORESTRY**

## **ŠUMARSTVO**

### *Metodološke upute*

Podaci o proizvodnji, prodaji i zalihama šumskih sortimenata, obradeni u ovom biltenu, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja. Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Stoga je podacima obuhvaćena samo proizvodnja, prodaja i zalihe šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Podaci se daju na osnovu izvršenog premjera šumskih sortimenata. Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u kubnim metrima.

Industrijsko drvo je ono drvo koje ima povoljna fizička i hemijska svojstva za dalju industrijsku upotrebu i preradu. Industrijsko drvo razvrstava se u dvije grupe: industrijsko drvo za mehanicku preradu (trupci, drvo za ploče i sl.) i industrijsko drvo za hemijsku preradu (celulozno drvo, drvo za suhu destilaciju i sl.).

Tehnicko drvo namjenjeno je za razne tehnicke svrhe (rudnicko drvo, stubovi za elektro i telefonske vodove i sl.), te njegova fizička i hemijska svojstva upravo odgovaraju toj namjeni.

Ogrijevno drvo je namjenjeno neposredno za ogrijev ili za proizvodnju drvenog uglja.

## **FORESTRY**

### *Notes on Methodology*

Data on production, sales and stock of forestry products in this bulletin was prepared on the basis of results processed by the Entity Statistical Offices from regular monthly surveys.

All companies engaged in permanent production of forestry items from state forests submit monthly statistical reports regardless of the fact whether for them the exploitation of forests is a basic or a secondary activity.

Therefore, this data covers only production, sales and stock of forestry products from state forests, while forestry products which are produced by private forestry are not included.

Quantities are given in net wood of mass product which are measured by cubic meter.

The industrial wood is the one which properties allow further industrial using and processing.

Industrial wood is classified in two groups: industrial wood for mechanical processing (trunks, wood for plates etc.) and industrial wood for chemical processing (cellulose wood, wood for dry distillation).

Technical wood is for different technical uses (mining wood, pillars for electric and telephone cables), and its physical and chemical features just meet these uses.

The fuel wood is for fuel or for the production of charcoal.

**CONSTRUCTION**

## **GRAĐEVINARSTVO**

### *Metodološke upute*

Podaci u ovom biltenu dati su na bazi obrade statističkih podataka mjesečnog izvještaja građevinarstva koji zavodima za statistiku u oba BiH entiteta dostavljaju preduzeća koja se bave građevinskim radovima.

Pod pojmom građevinski radovi obuhvaćene su djelatnosti: pripremni radovi na gradilištu (uključujući rušenje građevinskih objekata, zemljane radove i ispitivanje terena za gradnju); izgradnja objekata visokogradnje, niskogradnje i hidrogradnje (izgradnja kompletnih objekata ili njihovih dijelova, rekonstrukcija, dogradnja i održavanje objekata); svi instalacioni radovi (struja, voda, gas, grijanje, ventilacija i hlađenje); izolacioni radovi i završni građevinski radovi (fasaderski radovi, malterisanje, ugradnja stolarije, postavljanje podnih i zidnih obloga, molerski, staklarski i ostali završni radovi).

Grđevinski objekat je svaka nadzemna i podzemna gradnja kao i vodogradnja, koja u građevinskom smislu predstavlja odvojenu samostalnu cjelinu sa unaprijed određenom namjenom, a fiksirana je za određenu lokaciju.

Podaci o vrijednosti izvršenih radova računati su na bazi privremenih mjesečnih situacija i predstavljaju obracunatu vrijednost izvršenih radova, a ne vrijednost naplacenih radova. Vrijednost je data u tekucim cijenama, a iskazana je u hiljadama KM. Ovaj podatak podlozan je korekcijama pri izradi konacnih obracuna.

Podatak o izvršenim efektivnim satima rada predstavlja ukupan broj sati koji su ostvarili radnici na građevinskim objektima u izvještajnom mjesecu u redovnom i prekovremenom radu, bez obzira da li su placeni po satu, normi ili akordu. U ovaj broj nisu ukljuceni sati rada inženjera i tehnicara.

Podatak o broju radnika odnosi se na stanje zaposlenih radnika posljednjeg dana u mjesecu na koji se podaci odnose, a ne ukljucuje radnike na administrativnim i inženjersko - tehničkim poslovima.

Za mjernje promjena podataka o radnoj snazi u građevinarstvu (broj izvršenih efektivnih radnih sati i broj radnika na gradilištima) računati su stope promjena u odnosu na prethodni mjesec za obje varijable. Podaci su računati prema slijedećoj formuli:

$$\Delta = \{[Vrijednost (t) - Vrijednost (t-1)] / Vrijednost (t-1)\} \times 100$$

gdje (t) predstavlja vrijednosti iz tekuceg mjeseca, a (t-1) vrijednosti iz prethodnog mjeseca.

## **CONSTRUCTION**

### *Notes on methodology*

The data in this bulletin are given on the basis of processing data obtained by monthly reports on construction, which are delivered to both entity Statistics Offices by construction companies.

Under the term “construction works” are covered the following activities: preparatory works on building sites (including destroying construction objects, land works and area exploration for building), buildings, civil engineering and hydraulic engineering (building complete objects or its parts, reconstruction, rebuilding and maintenance of objects); all installation works (electricity, water, gas, heating, ventilation and air devices); insulation works and final construction works (façade works, plastering with mortar, building joiner’s trade, building floor and wall linings, painting, glazier and other final works).

The construction object is each overground and underground building as and water building, that in constructive sense represents separated the independent part with advance determined using and fixed for certain location.

Data on the value of completed works is calculated on the basis of temporary monthly situation and represent the estimated value of completed works, and not the value of paid works.

The value is given in the current prices, and is presented in thousands of convertible mark (KM). This data is subject to corrections after final calculations.

Data on completed effective hours represents total number of hours that workers realized on building sites in reported month in regular and overtime work, independently of whether they are paid by hour, norm or chord.

In this number are not included the hours worked by engineers and technicians.

Data on number of workers refer to the situation of employed workers on the last day of the month to which the data is related.

This information does not include workers in administrative and engineering or technical sector.

To calculate the change of data on employment in construction (number of completed effective working hours and number of workers on building sites) the rates of change in relation to the previous month for both variables were taken into account. Change is calculated according to the following formula:

$$\Delta = \{[\text{Value } t - \text{Value } (t-1)] / \text{Value } (t - 1)\} \times 100$$

Where Value (t) represents value from current month, and Value (t-1) value from previous month.

## **SAOBRAČAJ I VEZE**

### *Metodološke napomene*

Podaci o drumskom i željezničkom saobraćaju dobiveni su obradom mjesečnih statističkih izvještaja, koje su entitetski statistički zavodi prikupili od preduzeca i drugih poslovnih subjekata koji se bave prijevozom putnika i robe (tereta) u unutrašnjem i međunarodnom saobraćaju.

Za željeznički saobraćaj u ovom biltenu su raspoloživi slijedeći pokazatelji: broj prevezenih putnika, tone prevezene robe (tereta) i broj putničkih i tonskih kilometara. Za drumski saobraćaj, pored naprijed navedenih indikatora, raspoloživi su i podaci o pređenim kilometrima vozila.

U drumskom saobraćaju nije obuhvaćen prijevoz putnika i robe koji, svojim prijevoznim sredstvima, preduzeca obavljaju za vlastite potrebe (interni transport).

Pod pojmom prijevoz u saobraćaju, podrazumjeva se kretanje putnika ili tereta od jednog mjesta (mjesto ukrcavanja) do drugog mjesta (mjesto iskrcavanja) i predstavlja mjeru aktivnosti saobraćajnih preduzeca.

Putnički kilometar je izračunata jedinica mjere koja uslovno predstavlja prijevoz 1 putnika na udaljenosti od 1 kilometra. Indikator - putnički kilometar je kompleksan indikator koji je izračunat i dostavljen od strane preduzeca – izvještajnih jedinica. Ovaj indikator iskazuje agregiranu jedinicu mjere broja prevezenih putnika u odnosu na predenu dionica puta. Radi se o mjeri fizičkog obima prijevoza i pokazatelj je rentabilnosti rada saobraćajnog preduzeca.

Na isti način, tonski kilometar je jedinica mjere koja predstavlja prijevoz 1 tone robe na udaljenosti od 1 kilometra.

Gradski saobraćaj predstavljen je podacima o pređenim kilometrima vozila i prevezenim putnicima na određenim gradskim linijama sa fiksiranim stanicama i utvrđenim voznim redom. Podacima je obuhvaćen prijevoz putnika koji se obavlja gradskim autobusima, tramvajima i trolejbusima. U Republici Srpskoj ne postoje tramvajske i trolejbuske linije.

Oblast telekomunikacija u biltenu je predstavljena osnovnim indikatorima o poštanskom, telegramske i telefonske saobraćaju, a ulazni podaci dobijeni su na osnovu mjesečnih izvještaja preduzeca registrovanih za tu djelatnost.

Podaci za pismo i paketske pošiljke u unutrašnjem i međunarodnom prometu sadrže transvere: pisama, preporučenih pošiljki, vrijednosnih pisama i paketa primljenih za otpremu i prispjelih za dostavu i isporuku, bez tranzita, a uključena je i otprema časopisa i novina upućena pretplatnicima.

Platni promet obuhvata uplate i isplate poštanskim uplatnicama, žiro i tekucim računima, računskim knjižicama, štednim ulozima i sl., na poštanskim šalterima.

## **TRANSPORT AND COMMUNICATIONS**

### *Notes on methodologies*

Data on road and railway transport were obtained by processing monthly statistical surveys, which the entity Statistical Office collected from enterprises and other businesses unities which carry out the transport of passengers and goods in internal and international transport.

For railway transport the following indicators are available in this bulletin: number of transported passengers, tons of transported goods (freight) and number of passengers and tons/kilometres.

For road transport, besides the above mentioned indicators, at disposal are data on kilometres covered by means of transport.

Road transport does not comprise the transport of passengers and goods which is carried out by firms for their own needs and with their own means of transport.

By transport we mean the movement of passengers or cargo from one place (place of loading) to another (place of unloading).

Passenger kilometre is an indicator which represents the transport of one passenger for the distance of one kilometre.

This indicator is a complex one, which is calculated and delivered by firms. This indicator is obtained from the aggregated number of transported passengers in relation with the distance of transportation.

It concerns a measure of physical quantity of transport and it is an indicator of rentability work of a transport company.

To the same effect, ton kilometres is a measurement unit which represents the transportation of one ton of goods for the distance of one kilometre.

Urban transport is presented by data on kilometres covered by means of transportation and transported passengers on certain urban lines with fixed stations and scheduled drive time.

The data comprise transport of passengers which is carried out by city buses, trams and trolley buses. Republika Srpska has neither trams nor trolley bus lines.

In the bulletin the area of telecommunications is presented by basic indicators on post, telegram and telephone traffic, and the input data were obtained from monthly reports by firms which are registered for these activities.

Data for letters and parcels in internal and international transport comprise: letters, special letters, valuable letters and parcels received for delivering, without transit while included deliver magazines and newspaper sent to subscribers.

Payment of turnover comprises the payment done on the post window by post invoices, giro and current accounts, accounting books, savings deposits.

U unutrašnjem telegramskom prometu obuhvaceni su samo otpremljeni telegrami, a u međunarodnom prometu i otpremljeni i primljeni telegrami.

Mjesni i međumjesni, unutrašnji telefonski razgovori, obuhvataju samo polazne, a međunarodni, polazne i dolazne razgovore.

Telegramski promet i telefonski razgovori iskazani su brojem impulsa, koji predstavlja tehničku jedinicu mjere za tu vrstu saobraćaja.

Podaci o mobilnim telefonskim razgovorima odnose se samo na Federaciju BiH, obzirom da u Republici Srpskoj još uvijek nije uspostavljena mreža mobilne telefonije.

Domestic telegraph services cover only delivered telegrams, while the international cover both, delivered and received telegrams.

Local and interlocal, domestic telephone calls, comprise only departure calls, while international comprise both outgoing and incoming calls.

Telegraph services and telephone calls are given by the number of telephone impulses, which represent a technical unit for such a type of communication.

The data on mobile telephone calls refer only to the territory of the Federation, as the network for mobile telephony in Republika Srpska has not been established yet.

**6. *TURIZAM***  
***TOURISM***

## **TURIZAM**

### ***Metodološka objašnjenja***

Podaci o turističkom prometu (dolasci i nocenja) su rezultat statističkih istraživanja koja se provode u entitetskim zavodima za statistiku, a dobiveni su na osnovu mjesečnih izvještaja koje dostavljaju poslovni subjekti koji se bave pružanjem smještajnih usluga turistima. Izvještaji se sastavljaju na osnovu evidencija u knjigama gostiju.

Podacima je obuhvaćen broj dolazaka i nocenja, a ne broj turista.

***Turistom*** se smatra svaka osoba koja putuje u neko mjesto izvan svog prebivališta i provede najmanje jednu noc u ugostiteljskom ili nekom drugom objektu za smještaj gostiju, a motiv boravka u ugostiteljskom objektu može biti: odmor, poslovi (kongresi, sajmovi i izložbe, misije međunarodnih organizacija i sl.), zdravlje, ucestvovanje u sportskim aktivnostima i sl.

***Domacim turistom*** se smatra svaka osoba s prebivalištem u Bosni i Hercegovini koja u nekom mjestu u Bosni i Hercegovini, izvan mjesta svog prebivališta, provede najmanje jednu noc u ugostiteljskom ili drugom objektu za smještaj gostiju.

***Strani turist*** je svaka osoba s prebivalištem izvan Bosne i Hercegovine koja privremeno boravi u Bosni i Hercegovini i koja provede najmanje jednu noc u ugostiteljskom ili drugom objektu za smještaj gostiju.

## **TOURISM**

### *Notes on Methodology*

**Data** on tourist turnover (number of guests and overnight stays) are collected from the monthly reports by business entities or parts of business entities, which provide accommodation services to tourists or act as agencies. The reports are usually made on the basis of reception records in guest books.

Data cover the number of arrivals and the number of guests and overnight stays.

**A tourist** is considered every person travelling outside of his place of permanent residence, and spending at least one night in catering or some other accommodation facility for one of the reasons: rest, business, (congresses, fairs, exhibitions, mission of international organisation etc), health and participation in sport activities.

**A domestic tourist** is a person with permanent residence in B&H spending at least one night in some place in Bosnia and Herzegovina outside of its place of normal accommodation or other accommodation facilities for guests.

**A foreign tourist** is each person with permanent residence outside B&H, but that temporally resides in B&H and spends at least one night in catering or in some other accommodation facility.
