## STANOVNIŠTVO

### *Metodološka objašnjenja*

Podaci o stanovništvu prikupljaju se svakih deset godina prema jedinstvenoj metodologiji na cjelokupnom području Bosne i Hercegovine. Procjena broja stanovnika redinom godine kao stope prirodnog kretanja stanovništva temelje se na popisnim rezultatima i podacima o prirodnom priraštaju. Izvori podataka za rođene, umrle i vjencane su matične knjige, a za razvedene brakove dokumentacija nadležnih sudova.

**Podaci iz popisa** odnose se na stalno stanovništvo na području Bosne i Hercegovine. Stalno stanovništvo jednog mjesta čine sve osobe koje u tom mjestu stalno stanuju tj. Imaju prebivalište, bez obzira na to gdje su se u trenutku popisa nalazile, u mjestu prebivališta ili su bila privremeno odsutna, bilo u zemlji ili inozemstvu (stanovništvo "de jure"). Osobe na privremenom radu, kao i članovi porodice koji s njima borave u inozemstvu popisane su kao stalni stanovnici odgovarajućih naselja u zemlji u kojima je njihovo prebivalište.

Domacinstvom se smatra porodična ili druga zajednica osoba koje su izjavile da zajednički stanuju i troše prihode, kao i svaka osoba koja živi sama (samacko domacinstvo) ili stanuje sa drugim osobama s kojima ne troši svoje prihode. U popisima 1961. i 1971. kao stalni stanovnici popisane su sve osobe koje su se zatekle u mjestu rada ukoliko se nisu svakodnevno vraćali u mjesto stanovanja porodice, dok su 1981. i 1991. te osobe popisane kao stalni stanovnici mjesta u kojima su nastanjene njihove porodice, čime je smanjen broj samackih domacinstava.

Podaci o **nacionalnoj pripadnosti** rezultat su slobodno izražene nacionalne pripadnosti stanovnika preko deset, odnosno petnaest godina starosti, odnosno roditelja (staratelja) kada su u pitanju djeca mlada od 10, odnosno 15 godina u popisima 1971, 1981 i 1991.

Popisima prije 1981. godine Muslimani su iskazivani pod različitim nazivima. U popisu 1953. godine lica koja su izjavila da su Muslimani svrstani su u grupu – "jugoloveni-neopredjeljeni" zajedno sa ostalim licima jugoslovenskog porijekla koja su izjavila da su Jugosloveni, dok su u popisu 1961. godine iskazani pod nazivom "Muslimani u etničkom smislu", a 1971. kao "Muslimani u smislu narodnosti".

**Starost** Stanovništvo je u popisu i u vitalnoj statistici grupisano po starosti, prema navršenim godinama života. Svaka grupa starosti obuhvata osobe koje su navršile godine života unutar granica intervala. Tako su npr. U grupi od 15 do 19 godina, obuhvacene osobe koje imaju 15 i više godina, a još nisu navršile 20 godina života.

**Školska sprema** je najviši stepen obrazovanja koje je lice steklo po okoncanju redovnog školovanja ili škole koja zamjenjuje redovne, polaganjem privatnih ispita u nekoj redovnoj školi, ili pohađanjem kursa za skraćeno završavanje neke škole kojim se po postojećim popisima stice određena školska sprema.

## **POPULATION**

### *Notes on methodology*

The data on population and household have been collected by Censuses every ten years and by unified methodology on all areas of B&H. Estimating a number of midyear population and data on natural movement of population was computed on the basis of results of Population Census and data on natural increased. Data on births, deaths and marriages have been collected and submitted by registrars and data on divorces by courts of justice.

**The data of population census** related to the resident population in B&H territories. It means that every inhabitant had to be enumerated in the place of residence, and also in the case when at the Census data he/she was absent from that place due to any reason: travel, education on field work, temporary work abroad, medical treatment etc. Data on these persons were furnished their households.

As a household is considered every family or other community of persons, whose members live together and pool their resources and share their expences.

Also every person living singly (regardless of wheter he/she lives with another single person or with members of other family household, but with whom he/she does not share own income) is considered as a separate population enumerated every person where he/she happened to be at the Census data, while in 1981 and 1991. Census these persons enumerated as a resident population in the places where their families live.

The data on nationality are the result of freely expressed nationality of population over 10 or 15 years of age, respectively parents (guardians) in the case of children under 10 or 15 years of age in the 1971, 1981, 1991 census.

In the censuses before 1981. the Moslems introduced by different names. In the 1953 census the Moslems of the Yugolsav ethnic origin who did not opt for any of Yugoslav national groups were grouped into "Yugoslav without options". This group covers all other persons of Yugoslav ethnic origin who responded with "Yugoslav" to the question on ethnic nationality, while in 1961 census was presented the group "Moslems in the ethnic sense" and in 1971 census as a "Moslems in the national sense".

**Age** In census and in demographics statistics the population is grouped by age according to the age on last birthday.

**Literacy** Data on literacy of population relate to population aged 10 year and over. Under literate population was covered every person who could read and write a text dealing with everyday life regardless of the language. All other persons including also those who only could read, where considered as illiterate.

**Educational background** is the highest level of education which a person got when they completed regular school or the school which substitute a regular school, or some courses which giving a rank of certain school.

**Stanovništvo u zemlji** Ovaj kontingent cine svi stalni stanovnici, osim lica na privremeno radu u inozemstvu kod inostranog poslodavca ili samostalno i clanova njihovih porodica koji snjima borave u inozemstvu.

**Prema aktivnostima** stanovništvo je razvrstano na aktivno, stanovništvo sa osobnim prihodima i izdržavana lica. Aktivno je ono stanovništvo koje obavlja neko zanimanje i tako osigurava sredstva za život. Aktivnim se smatraju i lica koja traže zaposlenje, služe vojni rok, kao i lica na izdržavanju kazne. Osobama sa osobnim prihodom smatraju se umirovljenici svih kategorija, osobe koje primaju socijalnu skrb, ili imaju prihode od davanja u zakup zemlje, kuce, radnje i druge imovine. Izdržavanim osobama (djeca, učenici, studenti, domacice i dr.) smatraju se osobe koje nemaju vlastitih prihoda ni po kojem temelju, nego ih izdržavaju roditelji, rodaci ili druge osobe, kao i osobe s prihodima koji im ne obezbjeđuju ekonomsku samostalnost.

Poliprivredno stanovništvo u popisima 1981. i 1991. cine sve osobe cija se zanimanja nalaze u skupini "poljoprivrednici" i "ribari i lovci", kao i sve osobe koje oni izdržavaju.

Podaci o radanjima, umiranjima i sklopljenim brakovima dobijaju se preko maticara, a o razvedenim brakovima od sudova nadležnih za razvode brakova.

Prema pravnim propisima o vodenju maticnih knjiga, slucajevi rođenja, smrti i zakljecenja braka obavezno se upisuju u maticne knjige podrucja na kome su se desili, bez obzira da li osobe na koje se odnose stanuju na tom podrucju ili ne.

Obradeni podaci o živorodenim i mrtvorodenim se daju prema mjestu stalnog stanovanja majke, o umrlim prema mjestu stalnog stanovanja umrle osobe, za sklopljene brakove prema mjestu stalnog stanovanja mladoženje, a o razvedenim brakovima prema posljednjem zajednickom prebivalištu.

U statistici rođenih jedinica posmatranja je rođeno, odnosno živorodeno i mrtvorodeno dijete.

**Živorodenim** se djetetom smatra svako dijete koje prilikom rođenja diše i pokazuje druge znakove života kao što su kucanje srca, pulsiranje pupcane vrpce inesumljivo kretanje voljnih mišica.

Ako dijete ubrzo nakon poroda umre, najprije se registruje kao živorodeno, a zatim kao umrlo dojenje.

Mrtvorodenim se smatra dijete rođeno, odnosno izvadeno iz tijela majke bez ikakvih znakova života, tj. Ako nije disalo niti pokazivalo neki drugi znak života, a nošeno je duže od 28 tjedana (približno 7 mjeseci). Izbacivanje mrtvog ploda koji je nošen manje od 28 tjedana, smatra se pobacajem (abortusom), bez obzira na to da li je rijec o prirodnom ili namjernom.

### **Postupak izrade osnovnih demografskih pokazatelja**

**Opća stopa nataliteta** predstavlja odnos između broja živorođenih i procjenjenog broja stanovnika, računato na 1000 stanovnika.

**Opća stopa mortaliteta** predstavlja odnos između broja umrlih i procjenjenog broja stanovnika, računato na 1000 stanovnika.

**Opća stopa prirodnog priraštaja** predstavlja razliku između stope nataliteta i stope mortaliteta za godinu promatranja.

**Stopa smrtnosti odojcadi** predstavlja odnos između broja umrle odojcadi i broja živorođenih iste godine, računato na 1000 živorođenih.

**Stopa nupcijaliteta** predstavlja odnos između broja sklopljenih brakova, u tijeku jednogodišnjeg perioda, i procjenjenog broja stanovnika, računato na 1000 stanovnika.

than 28 weeks and shows no signs of life after removal from mother's body is considered as miscarriage, irrespective of whether natural or artificial. These cases are not registered in population registers, nor are the data shown in the tables on stillborn.

**General mortality rate** is the ratio between a number of dead and an estimated number of inhabitants per 1000 population.

**Stopa divorcijaliteta** predstavlja odnos između broja razvedenih brakova, u tijeku jednogodišnjeg perioda, i procjenjenog broja stanovnika, računato na 1000 stanovnika.

Temeljni materijal statistike prirodnog kretanja stanovništva priprema se i obrađuje u Federalnom zavodu za statistiku Federacije BiH i Republickom zavodu za statistiku Republike Srpske.

Sadržaj obrazaca, prema kojima je radena obrada propisan je Programima statističkih istraživanja od interesa za Federaciju BiH i Republiku Srpsku.

**General rate of natural increase** is the difference between the natality and mortality rates in given year.

**Infant mortality rate** is the ratio between the number of dead infants and the number of live-born children a given year per 1000 population.

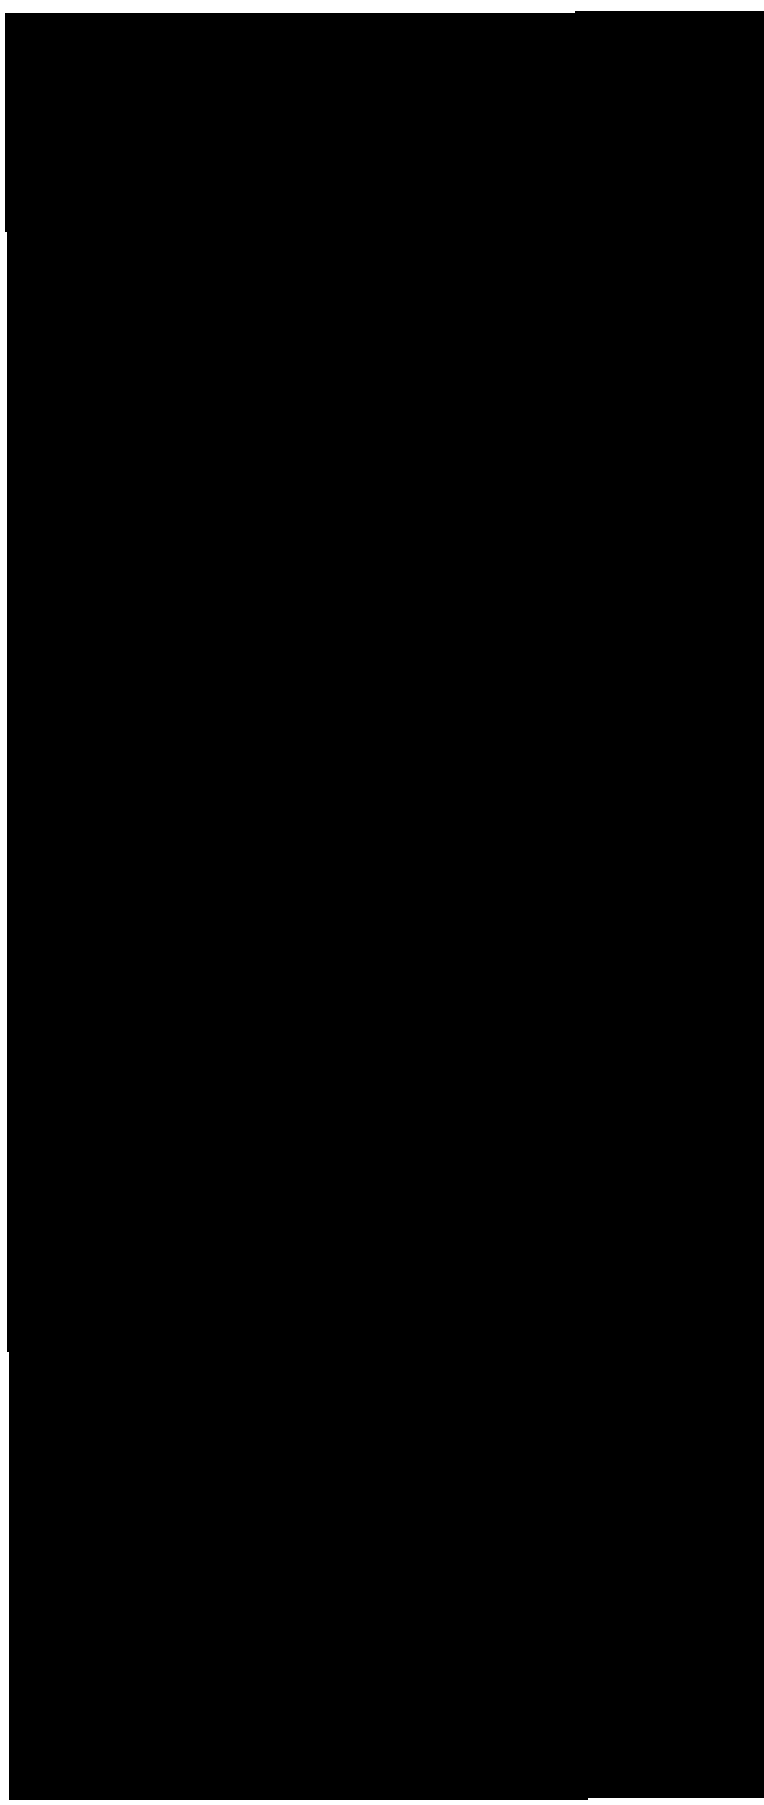

**Marriage rate** is the relation between the number of marriage in one year period and the estimated number of inhabitants per 1000 population.

**Divorce rate** is the relation between the number of divorces in one year period and the estimated number of inhabitants per 1000 population.

Basic material on demographics statistics is being prepared and procesed in the Entity Statistical Institutes.

The contents of forms, used for data processing, is prescribed by programs of the Federation of B&H and of the Republika Srpska.
